

Thank you for choosing our AI Voice Timer! This product is an intelligent, voice - activated timer that supports setting time via voice input. It comes with a dual - timer function, a large and easily readable LCD display, and many other features. Whether you're in the kitchen cooking, working out, or handling work tasks, it allows you to manage your time with ease, making your life more efficient and convenient.

### Product Features

- **Voice Input for Time Setting**  
Supports voice input to set times ranging from 1 to 60 minutes.
- **Dual - Timer Functionality**  
Enables the simultaneous operation of two timers, catering to multi - tasking needs.
- **Large Display Screen**  
Equipped with an extra - large LCD display that provides clear time information.

- **Progress Bar Indicator**  
Offers a visual representation of the timer's progress, allowing for easy monitoring.
- **Gradual Light Flash**  
As the timer nears completion, the light flashes more rapidly as a visual cue.
- **Customizable Volume Settings**  
Allows you to adjust the volume according to your preferences.
- **Magnetic Backplate & Iron Stand**  
Designed with a magnetic backplate and an iron stand for flexible mounting on various surfaces.

## Operation Instructions

- **Power On & Off**  
**Power On:** Press and hold any button to turn on the timer.  
**Power Off:** The timer will automatically shut down if there are no timing tasks and no button is pressed for 30 seconds.
- **Setting Time**  
Press and hold the right button. The LCD will display a microphone icon. Then, clearly speak the desired time (1 - 60 minutes), for example, "five minutes". If the recognition is incorrect, you can re - input the time. Once you release the button, the timer will automatically start.
- **Switching Between Timers**  
Tap the right button to switch between the two timers.
- **Pause/Resume/Cancel**  
**Pause/Resume:** Tap the left button to pause or resume the current timer.  
**Cancel:** Press and hold the left button to cancel the current timer.
- **Switching Between Countdown & Count - up Modes**  
When the timer is running, double - tap the right button to switch between countdown and count - up modes.
- **Launching the Previous Timer**  
If the timer is stopped and you want to use the settings from the last timer session, simply double - tap the right button. The timer will then initiate with the previously used settings.
- **Adjusting Volume**  
To adjust the volume of the timer, double - click the right button. The volume will cycle through the levels of Low, Medium, and High with each double - click.
- **Magnetic Mounting**

Use the magnetic backplate to effortlessly attach the timer to metallic surfaces. Additionally, an iron stand is included, along with adhesive for firmly securing the timer to non-metallic surfaces like walls or kitchen appliances.

### **Precautions**

- Please use 2 AA batteries for power supply, with a battery life of up to 3 years(normal usage).
- As the timer approaches its end, the light will flash more frequently. Please pay close attention.

### **Troubleshooting**

- If the timer fails to work properly, please check if the batteries are installed correctly or if they have run out.
- If you encounter voice recognition issues, please ensure that your speech is clear, your speaking speed is moderate, and you are in a quiet environment, as excessive noise can interfere with recognition.
