

# SHRINK TECH SYSTEMS

## VANGUARD SHRINK FILMS

Shrink Tech Systems is an American manufacturer of world-class high speed and intermittent motion shrink-wrapping equipment. Our equipment can run a variety of films. STS also manufactures a variety of in-feed conveyors, custom conveyors and other special material handling machinery.

Vanguard Shrink Films is the North American master distributor for High Performance shrink packaging films. We represent one of the world's leading manufacturers of high clarity, thin gauge polyolefin shrink films. We are centrally located to speed product delivery and support from coast to coast.

### STS Side Seal Shrink Wrappers

STS Wrappers can handle products from:

- 3" wide to 60" wide
- 1/8" tall to 14" tall
- All wrapper are Infinite Length
- Up to 100 packages per minute

### STS Shrink Tunnels

STS Shrink Tunnels :

- 17" wide to 60" wide
  - 12" high to 25" high
  - 4' long to 10' long
- Tunnel Conveyor Options  
Teflon Mesh Belt / Plastic Belt  
Live Roller / Stainless Steel

### STS "L" Sealers

- STS Automatic L Sealer w/ Closing Conveyor
- STS Manual L Sealer w/ Take Away Conveyor

### STS Conveyor Series

- Belted Conveyors
  - Lugged Conveyors
  - Flight Bar Conveyors
- Custom Conveyors to meet your material handling needs

### STS Centerfolders

### STS Accumulating Turntables

**Have a product that needs special equipment ?** Contact STS, we build custom wrappers, tunnels and conveyors to run a wide variety of applications and materials.

**CCL** is a high clarity crosslinked LLDPE shrink film with the versatility to shrink wrap a variety of products. CCL is formulated and produced to ensure performance characteristics to meet the toughest shrink wrapping applications.

**CXV** is a multilayer polyolefin shrink film with the versatility to shrink wrap a variety of products. CCL is a more cost effective alternative to crosslinked films. This film combines good gloss and sparkle with excellent shrink capabilities.

**CCS** is a clean, low shrink force film engineered to give a tight shrink without deforming or bending the package being wrapped. In addition, CCS is easy to shrink at lower temperature than the typical crosslinked films. These features make CCS one of the most forgiving films on the market today.

**HY** (High Yield) is an advanced biaxially oriented thin gauge, high clarity, crosslinked film. HY enables users to lower packaging material costs and achieve greater productivity and product sustainability.

**RG** (Heavy Duty) is designed to reduce packaging waste by eliminating corrugated and other costly packaging materials. RG's strength, high shrink percentage and high clarity provides excellent package containment and product visibility.
