

CHASING Control Console

Professional Control, Viewable in direct sunlight

Accessory specially designed for use with
CHASING M2, CHASING M2 PRO, CHASING M2 PRO MAX

CHASING Control Console

is a professional control platform designed for high-end professional users. The Aluminum-alloy shell is strong and durable. The built-in 13.3-inch 1080P display delivers real-time ROV underwater images, which are clearly visible in even direct sunlight. The ergonomic control platform, with a number of well-designed switches, buttons and interfaces, makes it can control ROV and USV simultaneously, as well as AC direct power supply, USBL, manipulator arm, image sonar, external lights and other professional accessories. Four brackets can be set separately to adapt to various terrains. With rollers at the bottom, it can be easily carried like a suitcase after folding. It can work anywhere easily.

Built-in 13.3-inch 1080P Display
