

How to Apply for your NFA Tax Stamp Through E-Forms

To purchase a suppressor, SBR, or AOW, you will need to apply for a Tax Stamp through the BATFE. The agency has now made this process electronic, thereby shortening the time required for approval from several months to even a year, down to 45 to 60 days in many cases. Knighthorse Firearms can help you through the process.

You will need to have your fingerprints scanned and converted to an electronic file. To do this, go to www.printscan.com Once there click on Make Appointment:

Next, choose ATF as the service required

After that, follow all prompts and choose the location/time for your fingerprinting. The cost is currently \$45

When you are done, they will provide you with a link to download your Electronic Fingerprint File (EFT) which we will use to upload to the ATF. Bring that, your \$200 tax stamp fee, and a passport style photo (or we can take that for you) to Knighthorse Firearms, choose your suppressor, and we will fill out all paperwork and submit the files electronically.
