

Who are We ?

We are Stabilize Revitalize Fort Pierce

StabilizeRevitalizeFortPierce.org

Stabilize Revitalize Fort Pierce Is a 501(c)(3) private foundation.

Our Mission is simple, to Stabilize and Revitalize our community.

To eliminate conditions that jeopardize public health or public safety to Stabilize our structures, Revitalize our neighborhoods and Build our real estate tax base. To facilitate the development of a viable urban community, including fair housing and a suitable living environment, for persons of very low to moderate-income, as well as stabilize and revitalize small businesses. The elimination of blighted structures and vacant lots gives our community residents visible signs of positive change and creates hope and empowerment to work towards continued improvement. One of the missions of Stabilize Revitalize Fort Pierce is to provide children living in the community with a place worthy of calling home.

We have been taking action in areas of Fort Pierce that need our help the most these areas have challenges that range from crime, drug addiction, mental health, homelessness and blight.

Stabilize Revitalize Fort Pierce has developed what we believe to be a novel approach to address these challenges. Our two-prong approach consists of boots on the ground clean-up efforts by volunteers and our walk-and-talk mental health initiative.

The concept for our walk-in talk consists of a three-member street team counseling team. The team will consist of one of our volunteers one licensed mental health professional and one individual from the local PD community policing division. This team will walk the streets several times a week meeting greeting and talking to homeless people who are also struggling with mental health issues. We believe many of these individuals do not have the ability or wherewithal to walk into a facility for treatment. The walk and talk initiative will bring a mental health model which has never before been mobilized. Our goal is to provide mental health services to the citizens of our community that are at their lowest and have no resources or even the will to pull themselves up from their current situation and seek treatment. The cost of the mental health professionals involved on the team will be covered by the licensed mental health professionals required pro bono hours. We are asking all licensed mental health professionals to consider the walk-in talk initiative and how they could get involved in their town. If you're a licensed mental health professional in the state of Florida please reach out to us so that we can give you additional information on our initiative.
