

My Story

Patty Peritz

I've been able to clearly hear Spirits, Guides and Angels since I was a young child. Everyone has at least one Angel, Spirit Guide and at *least one loved one* who is *Over There* that they communicate with, right?

From an early age I thought everyone heard and received communication from *Over There*. I realized later in life, that everyone can but not everyone does.

I was brought to light at my grandmother's passing when I was 5 years old. She came to see me in my astral travels during my sleep. I saw with my grandmother *the tunnel of light with an endless stream of shadowy figures walking towards and into the light*. During that moment I was able to help my grandmother release her fears and resistance to go with them to the *Other Side*.

I was born and raised in the South Side of Chicago with a Roman Catholic foundation. Religion along with spirituality were always a strong presence in our household. As the years passed, spirituality transcended beyond my religious beliefs. Our household spiritual activities were as common as a nightly game of Scrabble. Spiritual activities included séances, practicing hypnotism, table tipping, using the Ouija board and playing Scrabble.

My teenage and young adult years were tumultuous, full of battling and challenging relationships and addictions, always trying to silence the shoulder angels, my clairaudience. Trying to silence my clairaudience never worked. Above it all, Spirit communication was always there and well heard.

In my late 30's, my mother died and a year later my father died. During my father's passing, I witnessed his soul leaving his body.

A couple years later, I moved from the South Side of Chicago of 40 years, to the Rocky Mountains of Colorado. Living in Colorado is where I started reading for clients professionally.
