Water District – pwswd.com

Please report all water issues and emergencies anytime to 303-823-5345

This is the time of year when our water source, the Little Thompson, contains a lot of tannin (discoloration of the water). During spring runoff, our water will take on a yellowish hue. This is normal and will pass when the river settles down. The water is safe and is tested weekly. Please see the Consumer Confidence Report on our website for more information or call the water office to discuss your problem.

We continue to hold our meetings via Zoom. To be included on the next agenda or to receive a Zoom invite for our **Wednesday, May 25th 7:00 pm** meeting, please call (303.823.5345) or email Gabi Benson at (pswdadmin@att.net)

We are looking for someone to volunteer their skills for the good of the community. If interested, call 303.823.5345 or email pinewoodspringspoa@gmail.com.
