

Family and Adolescent Services

Outpatient Counseling

Family and Adolescent Services strives to provide a wide variety of community-based mental health counseling services. Our focus is to provide therapeutic services to individuals, couples, families, and groups of all ages. Our therapists are trained to utilize evidence-based, best practice interventions.

The staff is comprised of licensed and license-eligible professionals with years of experience. They are clinically trained to assist individuals with daily stressors: depression, anxiety, trauma, anger management, domestic violence, substance abuse, marital conflict, and issues of abuse & neglect. In addition, our clinicians provide therapy for foster care children, individuals moving towards independent living and those participating in Employee Assistance Programs.

Our therapy is conducted in a safe, secure, and family-like environment that helps to encourage individual and family involvement.
