Substance Use Outpatient Programs

Family and Adolescent Services

offers a range of substance abuse services, including comprehensive assessments and tailored treatment recommendations. Our intensive outpatient programs provide individuals with greater independence while delivering high-quality care, making them more appealing to those facing substance abuse challenges.

Substance Abuse Intensive Outpatient Program (IOP):

Substance Use Intensive Outpatient Services is a person-centered service for adults includes three-hour group sessions several days a week. Our supportive staff offers relapse prevention techniques, education on addictive behaviors and triggers, and risk management training. This program can also serve as a step-down option from inpatient treatment and crisis services.
