Complete Retail
Lottery Tracking

The Problem:

- Lottery Tickets are one of the biggest temptations for your employees and customers.
- With a 6% sales commission, a single loss of $1.00 takes $16.67 in lottery sales to break-even.
- Manual methods for tracking lottery sales are time consuming and error-prone.
- Can you honestly say that you don't worry about Lottery Ticket theft?

The Solution:

The Lottery Tracking Module of Complete Retail!

How Does It Work?

- All ticket deliveries are checked-in.
- When a new book is put into a display case it is activated.
- Cashier's enter the ending ticket numbers and on-line sales information at the end of their shift.
- All numbers are automatically reconciled with POS sales information providing the manager with lottery information when a cashier's drawer is being balanced.
- Extensive Reporting Capabilities

Features:

- Easy to Use
- Fully Integrated with Complete Retail

Benefits:

- Improved Cashier Accuracy
- Increased Control
- Decreased Lottery Shrink
- Improved Inventory Management
- Reduced Management Time Tracking Lottery
