

## MECHANICAL FEEDERS

Plumb Products, LLC manufactures quality one-, two- and three-row precision mechanical Stagger Feeds. Our feeds are designed to improve productivity by saving material costs and cutting loading time on presses; thus, improving your organization's bottom line.

By staggering the stock fed into your press, you save material costs with less scrap and more blanks per coil. More blanks per coil results in less "down time". Plumb Products, LLC's stagger feeds deliver your material into your die with repeatable accuracy.

Plumb Products' stagger feeds are chain driven and precisely timed with your press. This direct mechanical connection to your press maintains accurate timing. Our feeders require minimal air, which saves on expensive compressed air consumption.

Plumb Products, LLC's stagger feeds operate on a revolutionary "double push" principle. Our feeders utilize two feeding clamp heads, not one. This alternating clamping retains positive material control.

Plumb Products, LLC's feeds are low maintenance, need only one adjustment for blank size and are easy to install. Their proven reliability is unsurpassed.

Whether you make millions or billions of parts, run it for one shift or around the clock, dollar for dollar, the durability, versatility and ease of adjustment and repair make these units the best value.

- ◆ 11% material cost savings with 3-Row Stagger Feed

- ◆ High production rates

- ◆ 8% material cost savings with 2-Row Stagger Feed

- ◆ Mount on the front or rear of the press

- ◆ Mechanically timed to the press

- ◆ 3-Row blank diameter starting from .6250"

- ◆ 2-Row easily converts to single-row

- ◆ "Double push" clamp head principle

- ◆ Low air consumption saves energy costs

- ◆ One stroke plate adjustment for blank size

1 Year Warranty on all Models

All parts are precision CNC machined with black oxide or Teflon finish

Compact and simple to install
