Hello, my name is Joshua Atusparia. My parents came around 20 years ago not knowing any English. Ever since I was little I've been learning both English and Spanish. I always wanted to help other people to learn a second language, so when they go to a different place they are comfortable to speak any language. This program helps people that may not have the money or a lot of time to learn a new language. I would be grateful to help anyone who just wants to culturize themselves better.
