

You were warned. This is another warning.

You advocated for a never-before-taken unknown “vaccine,” and even invited the director of McCullough Hyde Hospital in to a City Council meeting in an attempt to get him to encourage everyone in town to take a "booster shot." You also paid city workers \$100 to take the shots. How's that working out so far?

How many did your Finance Director take? Can you not see that the only people getting sick and dying are the jabbed?

What you've actually done, is you've encouraged everyone to take a defined biological weapon.

This so-called “vaccine” is in fact a categorized biological weapon by definition (as the Pfizer paperwork in Karen Kingston’s articles states below), with only one intent; to kill those who take it. In an *EXPOSE* article below, it is proven, along with countless peer-reviewed articles referenced within, that the COVID bio-weapon shots are causing permanently compromised immune systems among all who take them; also referred to as AIDS (acquired, immune-deficiency syndrome) or VAIDS (vaccine, acquired, immune-deficiency syndrome), and the endless “syndromes” (i.e., illnesses) that come about as a result.

These shots also contain Graphene Oxide and self-forming nanoparticle metals that are directly manipulated by EMF radiation, magnetism and 5G technology, along with wireless internet environments at high frequencies that may be inescapable.

On a personal note, ask yourself the following: Have you taken these shots? How many have you taken? How many times have you been ill since your first shot? Has this ever happened to you in years past? Do you think this is normal?

Your inability to understand these topics and their connections to one another at face value, is not an excuse. Your duty as elected officials and citizens of the United States of America (as per your oaths of office) is to inform yourselves about these topics and not blindly follow suggestions, recommendations or monetary contracts; when implementation of such devices and substances can be harmful to you and anyone you represent.

As a result of this direct communication, are now in possession of names, articles, scientific proof, and individuals involved in combating this issue, legally speaking. It is incumbent upon you to remove the COVID-19 bioweapon shots from the City of Oxford, and communicate the removal of them with any administration or organization that is responsible for their purchase and or distribution, along with the removal of 5G towers. These entities named below are suing these government agencies in court, and that alone should be proof enough to not move forward with any of these harmful substances and technologies (COVID bio-weapon shots or 5G) or the contracts that you are engaging in.

You have also been lied to. You, too, personally, have been taken advantage of. Now, your ignorance is being counted on by those at the top to carry out their technologies to harm yourselves and others. This has already worked, as upwards of 20 million worldwide (and counting) are dead from the COVID-19 “vaccines.” I bet you didn’t know that.

Many more will die with each passing day. The continued implementation of 5G towers will only amplify these ill-effects and outcomes. Your ignorance on these issues is not an excuse to dismiss these statements.

It is also your responsibility to move this communication and documentation to all of those within your departments who are responsible for addressing such issues. This is not my responsibility. Do not “pass the buck” or “kick the can” down the road within your departments to avoid involvement or keep people in the dark.

It would be foolish to ignore this message and warning. The State has been warned. The Butler County Commissioners office has been warned and notified, as have our local state representatives.

I wouldn't dismiss this email if I was you. Sooner or later, it will become painfully obvious what you have done to yourselves and what you encouraged and told others to do.

You're running out of time.
