

“Strategist of Business Growth & Development”

It all started with a dream and a laptop.....

This introduction is about a boy, a boy that had above-average intelligence, and excelled at just about anything he set out to do. While in school, he would act out because the curriculum was too easy. Now, this boy did not realize his potential and had a troubled upbringing and a hard start in life. Most of his youth and early adulthood was spent on the streets and incarcerated. Eventually, he said enough is enough, and spent two whole years isolated and focused solely on getting to know himself. That is when he found out he had abilities that were not only above average, but near genius level

The results were always the same. Strategy, Analysis, Comprehension, Communication, Tact. when it came to those four areas, no one alive excelled as high as he. Because of this, he envisioned creating an exclusive concierge styled company that not only guaranteed satisfactory results, but could accomplish any goals concerning business growth and development. No matter the problem, no matter the goal, he could formulate and execute timely and effective strategies that would always produce the desired solution. Thus, Numina Solutions was born. He started his company with a dream, and a laptop. Now, every client that has retained services, has achieved growth beyond anything they could have dreamed of...No matter where you came from, one can do anything they put their minds to..We are the strategists of business growth & development, offering simple, yet powerful solutions. Period..Your move..

Numina Solutions

What we do

We take pride in offering professional, yet affordable, marketing, consulting, management, and business development services. No matter if you have no employees or 10,000, we can help you achieve any goals you've set for your business and offer a unique perspective on others. We do not just grow companies, we create lasting legacies.

Our Process

Every step in our process is unique and tailored to succeed in any endeavour you need assistance with. We are all about the bottom line. Growth, sustainability, and the profitability of a business. By developing innovative strategies and turn-key processes, we produce satisfactory results every time. Every word, color, sound, context, and graphic, is analyzed and broken down piece by piece. Once we determine what effect it has on your target market, we craft a campaign with whatever CTA you want, and produce the results you seek. Every single time. Marketing is the ability to sway the consumer in believing there is value in purchasing a business's products or services. We help consumers discover that value. As long as you follow our process, any goals you want to achieve, consider it done.

A Concierge Company

Numina has many differences compared to others in this industry. We are flexible, affordable, and analytic by nature. One of the main differences about Numina Solutions, compared to other companies in the same industry, is we are a concierge only company. This means that we are not an open-market business. Only select individuals and companies can retain our services. You set goals for us to accomplish, we do just that. No if, or maybe, we can solve any problem, and fulfil any request concerning business growth and development. Because of that, we only take on clients that are referred by current clients or preferred by Numina Solutions. Our high level of success and service is given only to those that have the ability to dedicate themselves 100% to their business.

Growth & Development

Creating Legacies

We offer 2 plans. The legacy plans and the empire plans. **The legacy phase 1** plan is the foundation building contract. We create and or enhance your company's digital presence and turn your business into a competitive company. Legacy plans are for businesses that are start-up, need improvement, or do not have a solid foundation yet. However, sometimes even corporations need to repair their foundational cracks as well. By the time this phase is completed, your company will have increased exposure digitally and territorially, increased and acquired additional revenue streams, and website and social monetization. Your business will become the leading company in your industry.

Legacy Phase 2

Once your business has reached foundational building goals and becomes competitive, **Legacy Phase 2** comes into action. Depending at which stage of development you're at, and what industry you're in, this phase focuses primarily on revenue and creating a turn-key system for your business. If sponsors are what you need, we draft proposals and create email marketing strategies to get them. This stage is all about sustainability and continuous profitability for your company. Monetization, CTA's, sales outreach, and customer acquisition are most important.

Sustaining an Empire

By now, your business has a strong, impenetrable foundation, a turn-key process of development, and has multiple revenue streams coming in. Now it's time to **build an empire**. Our empire plan is all about growth and continual development. We help you keep your business competitive, profitable, and organized. We run campaigns, promotions, CTA's, and manage your digital presence. If exposure is down, we correct it. If your social media pages are down, we correct it. If any adjustments need to be made to ensure continuous success of your company, we do it. This plan is a year by year contract, renewable each year by the beginning of the 4th quarter. We monitor and manage your brand, and assist with any and all goals or business ventures. It's all about building, sustaining, and managing an empire.

Benefits & Cost

The one big misconception among most entrepreneurs is that they believe they can save money, by doing everything themselves. This could not be further from the truth. In fact, you could end up losing money in numerous ways. Ineffective marketing, promoting, digital ads, just to name a few. You wouldn't hire a plumber to fix your car, or a mechanic to build your house. We are professionals, educated in the area of our profession. We honed our craft, and perfected our techniques to become not just the leading concierge company, but THE only growth and development company in the industry. None other can compare to the high-level of service and success we offer. The benefits are endless when you hire us for your business needs, let's discuss just a few.
