

Our team has been dedicated to helping those in need. Whether it is a matter of documenting the unexplained activity or helping spirits cross over, we sincerely believe in what we do. We understand that most people are curious about the unknown and plenty of people are terrified by what they are experiencing. Through education and personal commitment, we strive to help anyone in need. Each situation is different so we do not simply approach every location the same way. Given the nature of our work we understand that many people are worried about being judged for reporting such unexplained activity and your information will remain confidential unless you decide otherwise.

When you decide to contact a team for help there are a few aspects that you need to consider. The first question you should ask is whether or not the team charges for their services. Currently most teams do not charge for residential and business investigations. Next, be sure to find a team that is located in your general area or ask if they would be able to help from their location. Most paranormal teams are utilizing Facebook so do your homework and if they have a page- check it out. Make sure their level of confidence and professionalism is what you are seeking. The final important aspect of the team you are looking for is whether or not they can provide the service you are looking for. While many teams investigate locations, only a portion will truly attempt to document (and provide you with a copy of any potential activity) and much less teams are equipped to handle negative locations. If you are experiencing very active negative energy, then simply having a team that can't help treat the situation will not provide the results you are looking for.

Please feel free to check out the posts on our Facebook page at www.facebook.com/eliteparasoc/. There are many helpful postings about the paranormal field ranging from investigative tips to realizing you have abilities. There are also training videos that can teach you about using recorders, cutting and making audio clips with Audacity and much more!
