In accordance with California Building Code Section 11B-202.1, all new and altered elements in existing nonresidential buildings under this permit application shall comply with the accessibility requirements of Chapter 11B.

In addition to accessibility for new and altered elements, existing elements of the path of travel to the area of alteration are required to be accessible as outlined in Section 11B-202.4, including Exceptions 1 through 10.

For the subject project, select one of the following paths to compliance. This form is required to be completed for all nonresidential alterations or additions to existing buildings and signed by the project designer prior to obtaining a building permit.

- ☐ I have visited the site and confirm that all elements of the path of travel specified in Section 11B-202.4 are existing and in compliance with the requirements of Chapter 11B. The following calculation justifies that at least 20% of the total adjusted construction cost is being dedicated to improvements to the path of travel. Priority should be given to those elements that will provide the greatest access in the order listed below.

The adjusted construction cost of alterations, structural repairs, or additions shall not include the cost of alterations to the path of travel elements required to comply with section 11B-202.4.

Adjusted Construction Cost: (A)

Total Adjusted Construction Cost of all work performed in this area in the past 3 years: (B)
