To carnation city council

short and to the Fucken point your damn alert system killed my cat on Wednesday January 31, 2024 when it went off at 12pm Noon I rushed him to the Emergency vet Hospital because of your New damn alert system that you put in on 60th and 203 its so loud it shook the windows and killed my indoor cat vet said he died of a heart attack he was only 2 years old and in very good shape I'm out seven thousand dollars that's a lot of money what happened about informing the public last year you mailed out information on the damn but what about this New damn Alert pole and since when did you decid to start blowing it again you Never blow it back in the seventies or Eighties I've Lived in the Valley for fifty Eight years No damn alert system very went at all Not even when my kids went to school in carnation why know I'm so so angree and much more words cant express my anger you Need to inform the public much better so people like me don't go throo this pain and anger of LOSing a pet a Love one.

I heavily suggest you start doing your job inform the public so the know what's going on and be prepared next time and start blowing that fucken alarm system once a month or once a year and turn the volume down and another thing why is it in the city limits where it is at it in king county who do I go after for the murder of my cat the city of carnation or the Seattle damn system who my cat didn't ask to die on wednesday Jan 31, 2024 at Noon buy the damn alart system

thank you

very very angry citizen
Jeannette
