

Department of Public Works December 2020

Highlights / Accomplishments

- DPW crew replaced damaged floats at the 621 pond. These floats automatically operate the stormwater lift station pumps whenever water is present in the retention pond.
- The Operations Superintendent held a department wide meeting and conducted the department's annual training. 2020 year in review and 2021 project and capital plans was discussed. Working collectively with Chief Larsson, the team also participated in a personality assessment.
- Annual tub grinding was completed. The crew continues to load the contractor with excessive waste produced by this year's grindings. Fill, asphalt and other spoils were also hauled to dump sites.
- Monthly sewer maintenance was performed, no issues were found.
- Crew members completed many building maintenance issues including lighting, plumbing and door repairs. Also, crews installed large white boards for the IT department.
