

## Highlights / Accomplishments

- As part of the new weekly training program, the North Shore Fire Department presented a roll call workshop on how police officers can aid firefighters in response to fires.
- The Department received \$5,000 for high visibility speed enforcement from June 1 through September 15, 2021. This was \$1,000 less than requested.
- Body armor for three officers is being ordered. Using a longstanding grant from the federal government, the Village will pay 50% of the \$800 cost. Funds are set aside each year to meet the match requirement.
- Declining citation revenue, being examined by Lieutenant Miller, appears to be a result of lowered enforcement by police officers during the worst of the pandemic.
- The successor agreement between the Village and the Teamster Union (Police Officers) has been ratified by the police officers. It will be presented to the Village Board at a near date for approval.
