Grazing Goats Are Here!

They have arrived and are working hard! The Village is partnering with Grazing Goats Wisconsin in the coming weeks, utilizing goats to clear approximately 3.5 acres of stormwater management facilities near the North Shore Fire Department on Brown Deer Road in Bayside.

Due to the grade, elevations, and volume of material in this area, mowers are not a feasible option and string trimming over three acres is not viable or cost-effective alternative. Clearance of the 621 East Brown Deer Road Pond, along Indian Creek, and Bio-Retention pond facility south of the 621 pond is essential to maintain flow of stormwater and clear significant vegetation build up in and around the area to ensure stormwater flow.

Utilizing a goat grazing program will allow the Village to clear the unwanted vegetation in a sustainable manner and avoid chemical use. The goats will be within a secured, fenced area. We appreciate the hard work of the grazing goats. The new crew will be in the area for about three weeks.

The goats are located on private property behind a low voltage fence. The goats, nor the fence, should be touched. From time to time you may see Village Staff or Grazing Goats staff by the goats, however the public should not enter the gated area.

The goats will be in Bayside for approximately 3 weeks.
