

Camp Fire State Hazard Tree Removal Program

Who is on my property?

Did you submit a *Right of Entry* form to 'opt in' to the government-managed hazard tree removal program?

TREE ASSESSMENT is the first stage of the state-managed program. As part of this stage, CalRecycle contractors will:

- Inspect trees on your property
- Mark assessed trees
- Enter information into a database to track each tree through the removal process.

Please look for this laminated lime green HTRP (Hazard Tree Removal Program) placard in vehicles used by state employees and contractors.

Who are the assessment teams?

CalRecycle has contracted with registered professional foresters (RPFs) and certified arborists employed by Arcadis and its subcontractors MGE and Davey.

Assessment team members should be clearly identified by safety vests with the logo of Arcadis, MGE, or Davey.

If you have any questions about state-managed crews, please call the Tree Removal Operations Center at (530) 767-7011 or (530) 767-7012.
