

**CAMBRIDGE TOWNSHIP
CRAWFORD COUNTY, PENNSYLVANIA
ORDINANCE NO. 01 OF 2021**

AN ORDINANCE OF CAMBRIDGE TOWNSHIP, CRAWFORD COUNTY,
COMMONWEALTH OF PENNSYLVANIA, AMENDING THE 2016
CAMBRIDGE TOWNSHIP ZONING ORDINANCE, TO PROVIDE
REGULATIONS FOR SOLAR ENERGY SYSTEMS

IT IS HEREBY ENACTED AND ORDAINED by the governing body of the Township of Cambridge as follows:

Section 1 – Amendment of Article II, Section 201 of the 2016 Cambridge Township Zoning Ordinance entitled “Specific Terms”. Section 201 of the 2016 Cambridge Township Zoning Ordinance is hereby amended to add or amend the following definitions to the ordinance.

ACCESSORY BUILDING: A building which (1) is subordinate to and serves a principal building; (2) is subordinate in area, extent, or purpose to the principal building; (3) contributes to the comfort, convenience, or necessity of occupants of the principal building; and (4) is located on the same lot as the principal building.

ACCESSORY SOLAR ENERGY SYSTEM (ASES): A small scale solar energy system used to capture solar energy, convert it to electrical energy (capable of producing 15 kw or less) or thermal power and supply electrical or thermal power, for use on private property where the system is located to reduce the consumption of utility power or fuels. An accessory solar energy system consists of one (1) or more free-standing ground, or roof mounted, solar arrays or modules, energy storage devices, or solar related equipment and is intended to primarily reduce on-site consumption

APPLICANT: The individual or entity seeking permission or authorization under the provisions of this ordinance to engage in an activity in whole or in part by this ordinance. The applicant may be a person, partnership, business, or corporation.

ENVIRONMENTALLY STABLE: The proper placing, grading, construction, reinforcing, lining, and covering of soil, rock, or earth to ensure their resistance to erosion, sliding or other movement, as well as prevent alteration of any kind to existing watercourse, wetland, or natural impoundment.

GLARE: The effect produced by light with an intensity sufficient to cause annoyance, discomfort or loss in visual performance and visibility.

MUNICIPALITY: Cambridge Township, Crawford County, Pennsylvania.

PRINCIPAL BUILDING: A building or structure in which is conducted the principal use of the lot on which the building or structure is located.

PRINCIPAL SOLAR ENERGY SYSTEM (PSES): A large scale solar energy system used to capture solar energy, convert it to electrical energy or thermal power and supply electrical or thermal power principally for the sale of commercial energy to electrical utilities. Principal solar energy systems consist of one (1) or more free-standing ground, or roof mounted, solar collector devices, energy storage devices, solar related

equipment and other accessory structures and buildings including light reflectors, concentrators, and heat exchangers; substations; electrical infrastructure; transmission lines and other appurtenant structures.

SOLAR ENERGY: Radiant energy (direct, diffuse and/or reflective) received from the sun.

SOLAR ENERGY SYSTEM: A solar photovoltaic cell, module, or array, or solar hot air or water collector device, which relies upon solar radiation as an energy source for collection, inversion, storage, and distribution of solar energy for electricity generation or transfer of stored heat.

1. SOLAR ARRAY: A grouping of multiple solar modules with the purpose of harvesting solar energy.
2. SOLAR CELL: The smallest basic solar electric device which generates electricity when exposed to light.
3. SOLAR MODULE: A grouping of solar cells with the purpose of harvesting solar energy.

SOLAR RELATED EQUIPMENT: Items including a solar photovoltaic cell, module, or array, or solar hot air or water collector device panels, lines, pumps, batteries, mounting brackets, framing and possibly foundations or other structures used or intended to be used for collection of solar energy.

SOLAR PANEL: The part or portion of a solar energy system containing one or more receptive cells or modules, the purpose of which is to convert solar energy for use in space heating or cooling, for water, heating and/or for electricity.

Section 2 – Amendment of Article III of the 2016 Cambridge Township Zoning Ordinance entitled “Table 302A – A – Agricultural District List of Uses,” “Table 303A – RR – Residential District List of Uses,” “Table 306A – C – Commercial District List of Uses,” and “Table 307A – I-1 Industrial and I-2 Industrial Park Districts List of Uses,” of the 2016 Cambridge Township Zoning Ordinance. “Table 302A – A – Agricultural District List of Uses,” “Table 303A – RR – Residential District List of Uses,” “Table 306A – C – Commercial District List of Uses,” and “Table 307A – I-1 Industrial and I-2 Industrial Park Districts List of Uses,” of the 2016 Cambridge Township Zoning Ordinance are hereby amended to add “Principal Solar Energy Systems (See Section 541)” as Conditional Uses, to the aforementioned Zoning Districts.

Section 3 – Amendment of Article IV of the 2016 Cambridge Township Zoning Ordinance entitled “Table 406.4” of the 2016 Cambridge Township Zoning Ordinance. “Table 406.4” of the 2016 Cambridge Township Zoning Ordinance are hereby amended to add “Accessory Solar Energy Systems (See Section 412)” as Permitted Accessory Uses, in all Zoning Districts.

Section 4 – Amendment of Article IV of the 2016 Cambridge Township Zoning Ordinance entitled “Supplemental Restrictions” to add a new Section 412 for regulation of Accessory Solar Energy Systems. There is hereby added a new Section 412, with related subsections, to Article IV of the 2016 Cambridge Township Zoning Ordinance, entitled “Supplemental Restrictions” to add regulations for the use of Accessory Solar Energy Systems (ASES) which shall read as follows:

412 – Accessory Solar Energy Systems (ASES).

412.1 Regulations Applicable to All Accessory Solar Energy Systems.

- A. Accessory Solar Energy Systems are a Permitted Use in all Zoning Districts.
- B. Exemptions. ASES constructed prior to the effective date of this Section shall not be required to meet the terms and conditions of this Ordinance. Any physical modification to an existing ASES, whether or not existing prior to the effective date of this Section that materially alters the ASES, shall require approval under this Ordinance. Routine maintenance or like-kind replacements do not require a permit.
- C. The ASES layout, design and installation shall conform to applicable industry standards, such as those of the American National Standards Institute (ANSI), Underwriters Laboratories (UL), the American Society for Testing and Materials (ATSM), Institute of Electrical and Electronics Engineers (IEEE) and recognized Solar Rate and Standards organizations and shall comply with the PA Uniform Construction Code, and with all applicable fire and life safety requirements. The manufacturer specifications for the key components of the system shall be submitted as part of the application.
- D. All on-site utility, transmission lines, and plumbing shall be placed underground to the greatest extent possible.
- E. All solar energy systems should be designed and located to ensure solar access without reliance on and/or interference from adjacent properties.
- F. All ASES shall be situated such that concentrated solar radiation or glare does not project onto nearby properties, structures, or roadways.
- G. In addition to the requirements of Article VI, Section 602 of the 2016 Cambridge Township Zoning Ordinance, zoning certificate applications shall document compliance with Section 412, and related subsections. Zoning certificates shall be revoked if the ASES, whether new or pre-existing, is moved or otherwise altered, either intentionally or by natural forces, in a manner which causes the ASES not to be in conformity with the Ordinance. In the case of nonconformity caused by natural forces, the owner shall have a minimum of 90 days to initiate necessary remedial action to bring the system back in conformance to the Ordinance.
- H. The ASES must be properly maintained and kept free from all hazards, including but not limited to faulty wiring and/or batteries, loose fastenings, being in an unsafe condition or detrimental to public health, safety, or general welfare. In the event of a violation, the Township and/or the Zoning Officer shall give written notice specifying the violations, pursuant to Article VI, Section 603.1 of the 2016 Cambridge Township Zoning Ordinance.

412.2 Ground Mounted Accessory Solar Energy Systems.

- A. Setbacks.
 - 1. The minimum setbacks from side and rear property lines shall be equivalent to the accessory building setbacks in the applicable zoning district.
 - 2. A ground mounted ASES shall not be located in front yards.

- B. Height. Freestanding ground mounted ASES shall not exceed 15 feet in height above the ground elevation surrounding the system.
- C. Screening. Ground mounted ASES shall be screened from any adjacent property that is residentially zoned or used for residential purposes. The screen shall consist of a native plant or shrub species, 6' to 8' when mature. In lieu of a plant or shrub screen, a decorative fence meeting the requirements of the 2016 Cambridge Township Zoning Ordinance may be used.
- D. Coverage.
 - 1. The post-development area beneath the ground mounted ASES may be considered equivalent to the pre-development conditions, if it can be shown that such conditions will not be changed or impacted by the proposed project. However, use of impervious construction materials under the system could cause the area to be considered impervious and subject to the overall lot coverage requirement for the applicable zoning district.
 - 2. Consideration of coverages resulting from the ASES shall be considered in accordance with the Township's Stormwater Management Ordinance requirements, and nothing stated herein shall be considered as an exemption or variance from conformance with the Township's Stormwater management Ordinance.
- E. Ground mounted ASES shall not be placed within any legal easement or right-of-way location, or be placed within any storm water conveyance system, or in any other manner that would alter or impede the pre-existing flow of storm water runoff within said stormwater conveyance system.
- F. If a ground mounted ASES is removed, any earth disturbance as a result of the removal of the ground mounted solar energy system shall be graded and returned to environmentally stable condition.
- G. Appropriate safety/warning signage concerning voltage shall be placed at ground mounted electrical devices, equipment, and structures. All electrical control devices shall be locked to prevent unauthorized access or entry.

412.3 Roof Mounted and Wall Mounted Accessory Solar Energy Systems.

- A. A roof mounted or wall mounted ASES may be located on a principal or accessory building.
- B. ASES mounted on roofs or walls of any building shall be subject to the maximum height regulations specified for buildings within each of the applicable zoning districts.
- C. Wall mounted ASES shall comply with the building setbacks in the applicable zoning districts.
- D. Solar panels shall not extend beyond any portion of the roof edge.
- E. The owner shall provide evidence certified by an appropriately licensed professional that the roof is capable of holding the load of the ASES.

Section 5 - Amendment of Article V of the 2016 Cambridge Township Zoning Ordinance entitled "Specific Use Standards" to add a new Section 541 for regulation of Principal Solar Energy Systems as Conditional Uses. There is hereby added a new Section 541, with related subsections, to Article V of the 2016 Cambridge Township Zoning Ordinance, entitled "Specific Use Standards" to add regulations for the use of Principal Solar Energy Systems (PSES) which shall read as follows:

541 – Principal Solar Energy Systems (PSES).

541.1 Regulations Applicable to All Principal Solar Energy Systems.

- A. Principal Solar Energy Systems are a Conditional Use in the Agriculture (AG), Residential (R-R), Commercial (C), Industrial (I-1), and Industrial Park (I-2) Zoning Districts.
- B. In addition to the requirements of Article VI, Section 602 of the 2016 Cambridge Township Zoning Ordinance, zoning certificate applications shall document compliance with Section 541, and related subsections. Zoning certificates shall be revoked if the PSES, whether new or pre-existing, is moved or otherwise altered, either intentionally or by natural forces, in a manner which causes the PSES not to be in conformity with the Ordinance. In the case of nonconformity caused by natural forces, the owner shall have a minimum of 90 days to initiate necessary remedial action to bring the system back in conformance to the Ordinance.
- C. In addition to the application requirements for Conditional Uses under Section 701.1 of the 2016 Cambridge Township Zoning Ordinance, a project narrative including the following shall be submitted with the Conditional Use application: an overview of the project, project location, the approximate generating capacity, the number, representative types, and heights of facilities to be constructed, including their generating capacity, dimension, and respective manufactures, and description of any ancillary facilities to the solar-energy systems. The project narrative shall also include the location in reference to residences, streams, and other features of land. In addition to the project narrative, a map from the Natural Resources Conservation Service identifying prime farmland and farmland of statewide importance; documentation from the Pennsylvania Natural Diversity Inventory (PNDI) regarding the presence of any identified critical habitat for rare, threatened, or endangered federal or state species; a Federal Emergency Management Agency map delineating floodplains and which also include evidence of water quality; and a letter from the Pennsylvania Historic and Museum Commission (PHMC) regarding known archaeological or cultural resources listed or eligible for listing on the National Register shall be included.
- D. Conditional Use approval is required prior to obtaining Land Development Plan approval. The Conditional Use approval and Land Development Plan approval processes can be concurrent. All necessary Stormwater Plan approvals, E & S and NPDES permits must be approved prior to receiving final Land Development Plan approval by the Board of Supervisors of Cambridge Township. An approved Land Development Plan is required for application for a Zoning Certificate.
- E. All PSES developments must comply with all applicable Federal, State, and local regulations and obtain permits required by any governmental regulatory agency with jurisdiction over any aspect of the development. Such requirements include, but shall not be limited to, Soil Erosion and Sedimentation Plans, and NPDES Plans.

- F. The PSES layout, design and installation shall conform to applicable industry standards, such as those of the American National Standards Institute (ANSI), Underwriters Laboratories (UL), the American Society for Testing and Materials (ATSM), Institute of Electrical and Electronics Engineers (IEEE) and recognized Solar Rate and Standards organizations and shall comply with the PA Uniform Construction Code, and with all applicable fire and life safety requirements. The manufacturer specifications for the key components of the system shall be submitted as part of the Building Permit Application and Zoning Certificate Application.
- G. Modifications. The Municipality may grant modification of the requirements of one or more provisions of Section 541, or related subsections, if the literal enforcement will exact undue hardship because of peculiar conditions pertaining to the property in question, provided that such modification will not be contrary to the public interest and that the purpose and intent of the Ordinance is observed. All requests for a modification shall be in writing and shall state in full the grounds and facts of unreasonableness or hardship on which the request is based, the provision or provisions of the Ordinance involved and the minimum modification necessary. All requests for modifications shall accompany the Conditional Use Application for consideration by the Board of Supervisors.
- H. All PSES applications after the effective date of this Ordinance shall be required to meet the terms and conditions of all applicable Cambridge Township Ordinances, including but not limited to Ordinance No. 01 of 2011 the Cambridge Township Stormwater Ordinance and Ordinance No. 001 of 1999, the Cambridge Township Subdivision and Land Development Ordinance.
- I. PSES constructed prior to the effective date of this Section shall not be required to meet the terms and conditions of this Ordinance. Any physical modification to any existing PSES, whether or not existing prior to the effective date of this Section that expands the PSES shall require approval under this Ordinance. Routine maintenance or replacements do not require a permit.
- J. An affidavit or similar evidence of agreement between the property owner and the solar-energy facility owner or operator demonstrating permission to apply for necessary permits for construction and operation of a solar-energy facility.
- K. The owner of a PSES shall provide the Municipality written confirmation that the public utility company to which the PSES will be connected has been informed of the customer's intent to install a grid connected system. No transmission lines connecting the PSES to the public utility company shall be placed underground in the Municipality's road right-of-way.
- L. Liability Insurance. The owner of the PSES shall maintain a general liability policy covering bodily injury and property damage with limits of at least \$1 million per occurrence and \$1 million in the aggregate. Certificates shall be provided to the Township on an annual basis.
- M. The PSES owner and/or operator shall maintain a phone number throughout the life of the project for the officials of Cambridge Township to contact with inquiries and verified complaints. The PSES owner and/or operator shall make reasonable efforts to respond to the inquiries and complaints. A contact name, with knowledge of the system, must be provided to Cambridge Township with updates due to employee advancement or turnover.

- N. All on-site utility transmission lines and plumbing shall be placed underground to the greatest extent feasible.
- O. No portion of a PSES shall contain or be used to display advertising.
- P. Glare.
 - 1. All PSES shall be situated such that concentrated solar radiation or glare does not project onto nearby properties, structures, or roadways.
 - 2. The applicant has the burden of proving to the satisfaction of the Township that any glare produced does not have significant adverse impact on neighboring or adjacent uses either through siting or mitigation.
- Q. Noise from a PSES shall not exceed 55 dBA, as measured at the property line.
- R. All solar energy systems should be designed and located to ensure solar access without reliance on and/or interference from adjacent properties.
- S. In addition to the solar energy system being properly maintained and be kept free from all hazards, including, but not limited to, faulty wiring and/or batteries, loose fastenings, being in an unsafe condition or detrimental to public health, safety, or general welfare, the PSES owner shall repair, maintain, and replace the PSES related solar equipment during the term of the permit in a manner consistent with industry standards as needed to keep the PSES in good repair and operating condition. In the event of a violation, the Township and/or the Zoning Officer shall give written notice specifying the violations, pursuant to Article VI, Section 603.1 of the 2016 Cambridge Township Zoning Ordinance.
- T. Local Emergency Services and Safety.
 - 1. The applicant shall provide a copy of the project summary and site plan to local emergency services, including paid and volunteer fire department(s).
 - 2. The applicant shall cooperate with emergency services to develop and coordinate implementation of an emergency response plan for the PSES.
 - 3. A sign shall be posted providing the name of the operator and a phone number to be used in case of an on-site emergency at the primary entrance of the PSES. Additionally, reflective signs shall be posted providing the name of the operator and a phone to be used in case of an on-site emergency along the perimeter of the PSES at intervals of 250 feet.
 - 4. The solar energy system must be properly maintained and be kept free from all hazards, including, but not limited to, faulty wiring and/or batteries, loose fastenings, being in an unsafe condition or detrimental to public health, safety, or general welfare.

U. Public Road Use and Bonding.

1. The owner shall identify all local public roads to be used within the Township to transport equipment and parts for construction, operation, or maintenance of the PSES.
2. During the construction phase of the PSES the owner shall provide the Township with a road bond in accordance with Cambridge Township Ordinance 04 of 2008, as same may be amended.

V. Decommissioning.

1. No construction of the PSES shall be undertaken until the facility owner shall have provided the Township with a bond to secure the estimated expense of dismantling and removing said PSES, including the restoration of the land for agricultural or other reasonable use based on a consideration of the former use of the land, the current estimated costs for removal and disposal, and an inflation factor. The amount of the bond shall be determined by the Township Engineer based on the submission of an estimate prepared by the PSES facility owner's Engineer and other applicable data.
2. An affidavit, or similar evidence, signed by the property owner and the PSES facility owner affirming a lease agreement with a decommissioning clause (or similar) and a Successors and Assigns clause. The decommissioning clause must provide for the dismantling and removal of the PSES, including all solar related equipment or appurtenances related thereto, including but not limited to buildings, electrical components, roads, and other associated facilities from the property. The Successors and Assigns clause must bind those successors and assigns to the lease agreement.
3. The PSES owner is required to notify the Township immediately upon cessation or abandonment of the operation. The PSES shall be presumed to be discontinued or abandoned if no electricity is generated by such system for a period of twelve (12) consecutive months and the owner has not initiated remedial actions to return the PSES to a generating site. If the PSES owner fails to dismantle and/or remove the PSES, including all off-site, adjacent or right-of-way facilities, including but not limited to powerlines and other electrical facilities which are owned by the PSES facility owner, within eighteen (18) months of cessation or abandonment, the Township shall have the right to use the bond to complete the decommissioning of the facility in accordance with applicable law.
4. During the operation of the facility, a new engineer's estimate of cost for decommissioning shall be submitted every ten (10) years to the Township. Upon approval of the estimated costs by the Township's engineer, a revised surety shall be provided to the Township in the amount of one hundred fifty percent (150%) of the new estimate. Bonds shall be provided and remain in effect for so long as the PSES remains on site and decommissioning has not been completed.

541.2 Ground Mounted Principal Solar Energy Systems.

- A. Minimum Lot Size. The PSES shall meet the lot size requirements of the applicable zoning district.

- B. Setbacks. PSES shall comply with the following setback requirements.
1. The building setbacks of the applicable zoning districts, except:
 - a. Solar panels of a PSES shall not be located within 225 feet of any existing residential dwelling, or 50 feet from any adjoining parcel with an existing residential dwelling.
 - b. The PSES perimeter fence shall comply with the building setbacks of the applicable zoning district, except when abutting a public road right-of-way when the setback shall be 75 feet from the edge of the right-of-way. Any area abutting a public road right-of-way, shall be properly maintained, and shall be mowed once between the months of April 1st and June 30th and once between July 1st and September 30th of each year.
 2. If the PSES occupies two or more adjacent properties, setbacks between the adjacent properties shall be waived along the shared property boundaries so that the PSES may be installed continuously and make the most efficient use of the project area.
- C. Height. The height of ground mounted PSES solar panels at the place where mounted, shall not exceed 18 feet above ground level.
- D. Impervious Coverage.
1. The post-development area beneath the ground mounted PSES may be considered equivalent to the pre-development conditions, if it can be shown that such conditions will not be changed or impacted by the proposed project. However, use of impervious construction materials under the system could cause the area to be considered impervious and subject to the overall lot coverage requirement for the applicable zoning district.
 2. Gravel and paved access roads servicing the PSES shall be considered impervious coverage and calculated as part of the impervious coverage limitation.
 3. Consideration of coverages resulting from the PSES shall be considered in accordance with the Township's Stormwater Management Ordinance requirements, and nothing stated herein shall be considered as an exemption or variance from conformance with the Township's Stormwater management Ordinance.
- E. Stormwater.
1. The Applicant shall submit a storm water management plan that demonstrates complete conformance with the Township's Stormwater Management Ordinance. As a primary design consideration all efforts shall be made to ensure that stormwater from the PSES will infiltrate into the ground beneath the PSES at a rate equal to that of the infiltration rate prior to the placement of the system. Demonstration of design efforts to promote and ensure post-development infiltration to the greatest extent possible shall be included as part of the stormwater management plan.

2. PSES owners shall use low maintenance and/or low growing native perennial vegetation on surfaces under the system as a best management practice for stormwater management and as identified by the Pennsylvania Department of Conservation and Natural Resources.
3. If upon investigation, the Township determines that the stormwater management measures approved as a part of the Stormwater Management Plan are inadequate to manage the stormwater in the manner required, the PSES owner/operator shall take prompt action to submit a plan for and to construct such remedial facilities to provide stormwater management controls to meet the requirements of applicable stormwater management regulations

F. Screening, Vegetation, and Ground Cover.

1. Road screening shall consist of an 8-foot-high opaque decorative or slat fence installed to create a continuous visual barrier, or a double staggered row of native shrubs, 6'-8' when mature, placed to create a continuous visual barrier, and properly maintained and replaced when necessary. Fencing shall consist of a color that will blend the facility into the natural setting and existing environment. A PSES owner shall use native shrub species identified by the Pennsylvania Department of Conservation and Natural Resources. Shrubs shall be planted outside the road right-of-way. Solar perimeter fence shall be placed between shrubs and solar panels. Reasonable modifications to these requirements may be requested pursuant to Section 541.1 G, Modification, above.
2. Screening from an adjoining parcel with an existing residential dwelling shall consist of an 8-foot-high opaque decorative or slat fence installed to create a continuous visual barrier; or a double staggered row of native evergreen conifers or native broadleaf evergreens spaced in accordance with the chosen species to achieve a continuous visual barrier reaching 6' to 8' in height within 2 years of planting and properly maintained and replaced when necessary, in order to create a continuous visual barrier; or a natural wooded buffer at least 30' in width. Fencing shall consist of a color that will blend the facility into the natural setting and existing environment. A PSES owner shall use native evergreen conifers or native broadleaf evergreens identified by the Pennsylvania Department of Conservation and Natural Resources. Screening from an adjoining parcel with an existing residential dwelling may be a combination of plantings and/or structures with prior approval by the Township. Reasonable modifications to these requirements may be requested pursuant to Section 541.1 G, Modification, above.

G. Perimeter fencing shall be placed between the selected screening and solar panels.

H. Large-scale removal of mature trees on the site is discouraged.

- I. Ground cover shall consist of native perennial vegetation and foraging habitat beneficial to gamebirds, songbirds, and pollinators. When establishing native perennial vegetation and beneficial foraging habitat, a PSES owner shall use native plant species identified by the Pennsylvania Department of Conservation and Natural Resources. In order to ensure adequate

sunlight to foster growth of ground cover, fixed, non-tracking solar arrays must be installed so that the lower drip edge of an array is no lower than 36" above grade.

- J. Use of herbicides to control ground cover growth is prohibited.
- K. Ground mounted PSES shall not be placed within any legal easement or right-of-way location, or be placed within any storm water conveyance system, or in any other manner that would alter or impede the pre-existing flow of storm water runoff within said stormwater conveyance system.
- L. Security.
 - 1. In accordance with the National Electric Code (NEC), all ground mounted PSES shall be completely enclosed by fencing with a locking gate. Current NEC code requires a minimum six (6) foot high fence with barbed wire, or a 7' high fence.
 - 2. A clearly visible warning sign shall be placed at the base of all pad-mounted transformers and substations and on the fence surrounding the PSES informing individuals of potential voltage hazards.
- M. Access Drives
 - 1. At a minimum, a 25' wide access road must be provided from a state or township roadway into the site.
 - 2. At a minimum, a 15' wide cartway shall be provided between the solar arrays to allow access for maintenance vehicles and emergency management vehicles including fire apparatus and emergency vehicles. Cartway width is the distance between the bottom edge of a solar panel to the top edge of the solar panel directly across from it.
- N. The ground mounted PSES shall not be artificially lighted except to the extent required for safety or applicable federal, state, or local authority. No lighting shall directly project or impose glare beyond the subject property boundary.
- O. If a ground mounted PSES is removed, any earth disturbance as a result of the removal of the ground mounted solar energy system must be returned to an environmentally stable condition.

541.3 Roof Mounted Principal Solar Energy Systems.

- A. The owner shall provide evidence certified by an appropriately licensed professional that the roof is capable of holding the load of the PSES.
- B. PSES mounted on roofs of any building shall be subject to the maximum height regulations specified for buildings within the applicable zoning district.

Section 6 – Construction and Severability.

- A. The provisions of this Ordinance shall be construed to the maximum extent possible to further the purposes and policies set forth herein, as consistent with applicable state statutes and regulations. If the provisions of this section and state law are in conflict, then state law shall prevail.
- B. It is the intention of the Municipality’s governing body that the provisions of this Ordinance are severable and if any provisions of this Ordinance shall be declared unconstitutional or invalid by the judgment or decree of a court of competent jurisdiction, such unconstitutionality or invalidity shall not affect any of the remaining provisions of this Ordinance.

Section 7 – Repealer. All prior ordinances that are inconsistent herewith are hereby repealed to the extent of such inconsistency.

Section 8 – Ratification. Except as amended by this Ordinance, all other portions, parts and provisions of the 2016 Cambridge Township Zoning Ordinance, as heretofore enacted and amended, shall remain in force and effect.

Section 9 – Effective Date. This Ordinance shall become effective five (5) days after its enactment.

Ordained and Enacted this 8th day of November, 2021.
