

Is this project located in the FEMA 100-Year Floodplain?

To check, follow these steps using King County iMap:

1. Go to the [iMap](#) website.
2. In the search bar at the top, enter the address of your project.
3. On the right side of the screen, find the Layer List (it may look like a stack of papers icon).
4. Click on the Layer List to open it.
5. Find and check the box next to "Flooding Info" to turn on the flood layers.
6. Click the small dropdown arrow next to "Flooding Info", and then select "FEMA 100-Year Floodplain" from the list.

This will display the FEMA 100-year floodplain areas on the map so you can see if your project is located within one.
