#### SECTION 1 -- INTRODUCTION

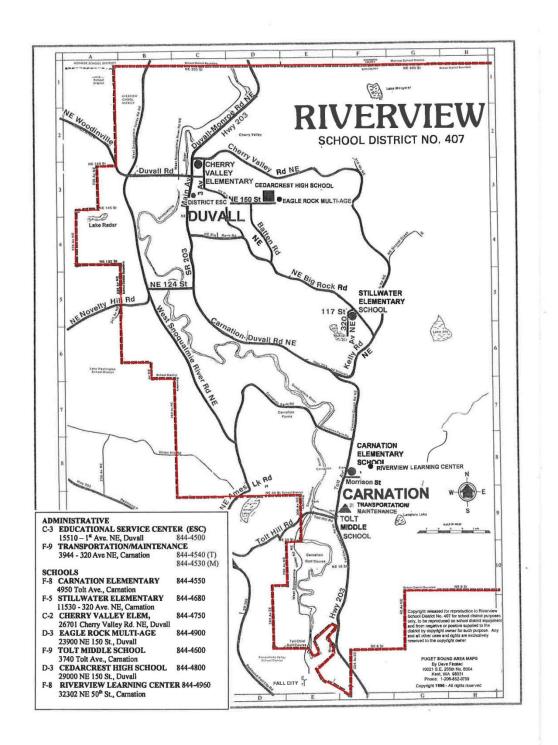

#### Purpose of the 20-Year Capital Facilities Plan Vision

Presented herein, to compliment the Riverview School District's Six Year Capital Facilities Plan. The first six years of the 20-year plan will duplicate of the content of the 6-year plan.

This Capital Facilities Plan is intended to provide our community with a description of facilities needed to accommodate projected student enrollment at acceptable levels of service over the next twenty years (2020 – 2040). Since the purpose of this plan is primarily aimed at identifying facility and property acquisition needs over the period, financing the projects with impact fees or bond issue(s) will not be the main focus of this plan. However, the district will continue to analyze the need to put construction measures on future voted bond propositions.

#### **Overview of the Riverview School District**

The Riverview School District services three jurisdictions: King County, the City of Carnation, and the City of Duvall. The district is 250 square miles and is located in northeast King County serving the Lower Snoqualmie Valley from the King/Snohomish County line south approximately 16 miles, and from the western ridge of the valley to the cascade foothills. The district currently serves an enrollment headcount of approximately 3,268 students, with three elementary schools, one middle school, one high school, three alternative high school programs, one alternative elementary school program, and a K-12 alternative parent partnership program. The grade configuration is kindergarten through fifth grade for elementary school, sixth through eighth for middle school, and ninth through twelfth for high school. Four of the alternative programs are housed at the Riverview Learning Center in Carnation.

#### **SECTION 2 -- STUDENT ENROLLMENT TRENDS AND PROJECTIONS**

#### **Projected Student Enrollment 2020-2040**

Enrollment projections are most accurate for the initial years of the forecast period. For later years, the review of enrollment patterns, housing trends, and other demographic changes are useful yearly indicators in evaluating and adjusting projections. This year's plan anticipates a 1% growth in student enrollment which is based on recent enrollment trends. Some of the trends are a result of: 1) transfers from private schools, 2) increases in kindergarten enrollment, 3) significant decreases in students attending school outside the district and 4) local growth in housing developments. Housing starts have increased in recent years and the district is experiencing slight enrollment growth. The City of Carnation estimates approximately 158 single family residences and 61 multi-family residences will be built in the next three years. Based on preliminary data from the City of Duvall, over 500 housing starts are expected within the upcoming five to six-year period and an additional 110 individual lots are expected to be created during that same period. Building homes on the additional lots is expected to occur after the current five-year term. In the event that enrollment growth slows, plans for new facilities can be delayed. It is much more difficult, however, to initiate new projects or speed projects up in the event that enrollment growth exceeds the projections.

The Riverview School District, like most school districts, projects enrollment using a modified "Cohort Survival" method combined with other enrollment factors, including local and surrounding housing growth. This method tracks groups of students through the K-12 system and notes and adjusts the projections to account for year-to-year changes, including local population growth.

Since the yearly figures for each grade are dependent on the previous year's grades, kindergarten projections are treated differently. Riverview projects its kindergarten enrollment based on historical kindergarten enrollment patterns and district enrollment growth patterns.

Table 2.1

Riverview School District Headcount Enrollment Projection

| Grade | 2019-20<br>Actual* | 2020-21 | 2021-22 | 2022-23 | 2023-24 | 2024-25 | 2025-26 | 2026-27 | 2027-28 | 2028-29 | 2029-30 | 2030-31 | 2031-32 | 2032-33 | 2033-34 | 2034-35 | 2035-36 | 2036-37 | 2037-38 | 2038-39 | 2039-40 |

#### **SECTION 3 -- DISTRICT STANDARD OF SERVICE**

School facility and student capacity needs are dictated by the types and amounts of space required to accommodate the district's adopted educational program. The educational program standards which typically drive facility space needs include grade configuration, optimal facility size, optimal school enrollment size, class size, educational program offerings, classroom utilization and scheduling requirements, and use of portable classroom facilities.

In addition to factors which affect the amount of space required, government mandates, contractual requirements, and community expectations may affect how classroom space is used. For example, the state financed All-Day Kindergarten program and lower-class sizes for kindergarten through 3rd grade is creating the need for additional classrooms at the elementary level. Traditional educational programs offered by school districts are often supplemented by nontraditional or special programs such as special education, expanded bilingual education, remediation, migrant education, alcohol and drug education, preschool and daycare programs, home school, elementary art classrooms, music programs, movement programs, etc. These special or nontraditional educational programs can have a significant impact on the available student capacity of school facilities.

Special teaching stations and programs offered by the Riverview School District at specific school sites include:

#### Elementary:

- Art Classrooms
- Classroom Computers
- Group Activities Rooms
- Program for Academically Talented (Gifted/PAT)
- Special Education (The District attempts to integrate special education students and regular education students to as great an extent as possible. Most special education students are served both in a regular education classroom and a special education classroom.)
- Learning Assistance Program (LAP)
- English Language Learners (EL)
- Home School Alternative (PARADE)
- Preschool Education Program (ECEAP)
- Multi-Age (Eagle Rock /ERMA)

#### Secondary:

- Computer Labs
- Alternative (CLIP & CHOICE high school program)
- Special Education
- Learning Assistance Program (LAP)
- English Language Learners (EL)
- Career and Technical Education (CTE)
- 18-21 Transition Program (PAIVE)
- School-to-Work

Variations in student capacity between schools are often a result of what special or nontraditional programs are offered at specific schools. These special programs require classroom space which can reduce the permanent capacity of some of the buildings housing these programs. Some students, for example, leave their regular classrooms for a short period of time to receive instruction in these special programs. Schools often require space modifications to accommodate special programs, and in some circumstances, these modifications may reduce the overall classroom capacities of the buildings.

The current Standard of Service data for Riverview, in terms of teaching station loading, is identified on Table 3.1. Class sizes are averages based on actual utilization as influenced by state funding and collective bargaining restrictions.

Riverview's Standard of Service also considers the different educational functions when considering student capacity needs. Those functions are as follows:

#### Elementary classrooms -

- regular, grades K-5
- self-contained learning center (special education)
- learning support classrooms (special education pullout, LAP, Title I, etc.)

#### Secondary -

- regular, grades 6-8
- special education, grades 6-8
- learning support, grades 6-8
- regular, grades 9-12
- learning support, grades 9-12 (special education pullout, LAP, Title I, etc.)

Involuntarily transferring students to a school with excess capacity is done rarely as a last resort and with Board of Directors' authorization. Involuntarily transferring of students can result in difficulties in the community, with staffing, and with transportation.

Table 3.1
Riverview School District Standard of Service

| CLASS SIZE                         |              | Average |
|------------------------------------|--------------|---------|
| Elementary                         | Grade Level  |         |
| Regular                            | K            | 17      |
| Regular                            | 1            | 17      |
| Regular                            | 2            | 17      |
| Regular                            | 3            | 17      |
| Regular                            | 4            | 25      |
| Regular                            | 5            | 25      |
| Regular                            | K-5 Weighted | 19.7    |
| Regular (portables)                |              | 24      |
| Self-contained learning classrooms |              | 12      |
| Learning support classrooms        |              | 0       |
| Middle School                      |              |         |
| Regular                            | 6 - 8        | 27      |
| Regular (portables)                |              | 24      |
| Self-contained learning classrooms |              | 12      |
| Learning support classrooms        |              | 0       |
| High School                        |              |         |
| Regular                            | 9 - 12       | 27      |
| Regular (portables)                |              | 24      |
| Self-contained learning classrooms |              | 12      |
| Learning support classrooms        |              | 0       |
| Vocational education               |              | 24      |

Note: The District has an additional 18 portable classrooms in its inventory that are used for special program purposes or district wide support and are not available for regular classroom needs.

#### SECTION 4 -- CAPITAL FACILITIES INVENTORY

Under the Growth Management Act, public entities are required to inventory existing capital facilities. Capital facilities are defined as any structure, improvement, and piece of equipment or other major asset, including land, which has a useful life of at least ten years. The purpose of the facilities inventory is to establish a baseline for determining what facilities will be required to accommodate student enrollment in the future at established levels of service. This section provides an inventory of capital facilities of the Riverview School District including site-built schools, portable classrooms, developed school sites, undeveloped land and support facilities. School facility capacity figures are based on the inventory of current facilities and the district's adopted educational program standards as presented in the previous section.

#### **Schools**

The Riverview School District currently operates 3 elementary schools (grades K-5), one middle school (grades 6-8), and one high school (grades 9-12). The district also provides the Eagle Rock Multi-age Program, an elementary alternative program, sited adjacent to the Cedarcrest High School campus. In addition, the district supports the following alternative programs housed in the Riverview Learning Center facility: CLIP alternative high school; CLEAR alternative high school; CHOICE alternative high school; and PARADE, a parent partnership program. ECEAP, a pre-school program, is housed again in yet another separate facility.

Individual school capacity has been determined using the number of teaching stations within each building and the space requirements of the district's adopted educational program. This capacity calculation is used to establish the district's baseline capacity and determine future capacity needs when considering projected student enrollment.

Classroom capacities have been determined for each school according to their usage. For the purpose of this Plan, classroom uses are: regular education, self-contained special-education, and learning support. The school facility inventory is summarized on Table 4.1. The current inventory of facilities indicates a permanent capacity of 2,865 students, with an additional 617 student capacity available in interim facilities (Table 5.1).

The School Board of the Riverview School District is committed to serving students at small schools. Evidence suggests that this practice a significantly beneficial effect on student learning. Further, there are significant benefits to school culture and climate.

#### Inventory of Permanent School Facilities and Related Program Capacity

#### 2019-2020 School Year

| Facility                 | Address                                       | Grade Span | Permanent<br>Capacity* | 2019-20 FTE<br>Enrollment | Year Built |      | Building Area<br>(Sq. Ft.) | Site Size<br>(Acres) |

#### **SECTION 5 -- PROJECTED FACILITY NEEDS**

#### **Near-term Facility Needs**

This Capital Facilities Plan has been organized to maintain adequate capacity of the District's facilities through the construction and/or expansion of permanent facilities. Table 5.1 is a summary by school level of projected enrollments, current capacities, and projected additional capacities. As demonstrated in the table, the district has permanent capacity needs at all grade levels. Due to the conversion to full day kindergarten and reduced elementary class sizes required in K-3, combined with current enrollment growth from new development, the District will face a need to plan for additional permanent capacity at the K-5 level. To meet the capacity needs in the near-term, the District is in the preliminary planning stages of a new K-5 elementary school in the Duvall area where the most substantial district population growth is occurring. The district anticipates that the construction of this school will be complete within the next 3 years of this planning period. New school construction will be contingent upon the feasibility to run a have approved a bond measure. Additional capacity needs will be addressed in the short-term with portable classrooms. The district also anticipates a 6 classroom addition to Cedarcrest High School.

#### Relocatable (Portable) Classrooms

For the definition of relocatable and permanent facilities, see Section 2 of King County Code 21A.06.

As enrollment fluctuates, portables provide flexibility to accommodate immediate needs and interim housing. Because of this, all our school sites are planned to accommodate the potential of adding portables in order to address increasing capacity challenges. In addition, the use and need for portable will be balanced against program needs. Portables are not a solution for housing students on a permanent basis, and the District would like to continue to reduce the percentage of students that are housed in portable classrooms.

The cost of portables also varies widely based on the location, jurisdictional permitting requirements and intended use of the classrooms

#### **Long-term Facility Needs**

To meet these capacity needs in the long-term, the district has acquired 48 acres of property directly adjacent to Cedarcrest High School. The existing building on the property will be converted to a K-12 outdoor education facility with the potential for the property to be used to construct an additional school site such as a K-8 STEM school as district capacity and student learning needs arise. To meet the district growing capacity needs the district also anticipates that in 2038 we will have a need to rebuild Tolt Middle School at its current location. The new middle school will be built contingent upon the increase 1% growth in enrollment.

.

Listed here are estimated total project costs that have not been formally bid

New K-5 Elementary: New Construction Costs: \$34,945,000 Soft Costs \$18,521,000

Cedarcrest High School Addition: New Construction Addition:\$6,725,175 Soft Costs \$3,705,370

#### **Planned Improvements - To Existing Facilities**

As summarized in Table 6.2, the district plans technology upgrades which are funded by a capital projects levy approved by the voters in February of 2018.

Table 6.2

**Planned Projects to Existing Facilities** 

| Project              | Location               | Capacity<br>Added | Source of Funds    | Growth related project?<br>Yes or No |
|----------------------|------------------------|-------------------|--------------------|--------------------------------------|

<sup>\*</sup>Additional Permanent Capacity Related Projects

<sup>\*\*</sup> Please note that only construction costs are used in the calculation of school impact fees:

#### **SECTION 7 - CAPITAL FACILITIES FINANCING PLAN**

Funding of school facilities is typically secured from a number of sources including voter-approved bonds, voter approved levies, state matching funds, impact fees, and mitigation payments. Each of these funding sources is discussed below.

#### **General Obligation Bonds**

Bonds are typically used to fund construction of new schools and other capital improvement projects. A 60% voter approval is required to pass a bond issue. Bonds are sold as necessary to generate revenue. They are retired through collection of property taxes. Riverview was unable to pass the most recent bond measure ran in February of 2020, but the school board is preparing a new proposal to submit to voters if feasible in 2021.

#### **Capital Projects Levies**

Capital Projects Levies are typically used to fund small construction projects and other capital improvements or acquisitions. A simple majority of voter approval is required to pass a levy. Money comes to the district through the collection of property taxes. The district passed a four-year capital improvement levy in February of 2018 for the upgrade of technology assets including new computers, upgrades to the network infrastructure, and software. In addition, the levy supports other capital improvements including the acquisition of sites and portables. The district is planning to run another levy in February of 2022.

#### **State Financial Assistance**

State School Construction Assistance funds come from the Common School Construction Fund. The State deposits revenue from the sale of renewable resources from State school lands set aside by the Enabling Act of 1889 into the Common School Account. If these sources are insufficient to meet needs, the Legislature can appropriate General Obligation Bond funds or the Superintendent of Public Instruction can prioritize projects for funding. School districts may qualify for State School Construction Assistance funds for specific capital projects based on a prioritization system.

State matching funds can be applied to school construction projects only. Site acquisition and improvements are not eligible to receive matching funds from the state. Because availability of state matching funds has not kept pace with the rapid enrollment growth occurring in many of Washington's school districts, matching funds from the State may not be received by a school district until two to three years after a matched project has been completed. In such cases, the district must "front fund" a project. That is, the district must finance the complete project with local funds.

## **Impact Fees**

Impact fees have been adopted by a number of jurisdictions as a means of supplementing traditional funding sources for construction of public facilities needed to accommodate new development. Impact fees are generally collected on new residential construction by the permitting agency at the time of final plat approval or when building permits are issued.

### **Budget and Financing Plan**

The Financing Plan below demonstrates how the Riverview School District plans to finance improvements for the years of 2020-2040. The financing of additional portables are planned though secured funding (via the current approved levy measure). The district anticipates asking its voters to approve a bond measure to fund a new K-5 elementary, high school addition/remodel and security updates. Subject to Board approval, this proposal is expected to be on the ballot if feasible in 2021.
