A - TENANT SIGNAGE CRITERIA AT TENANT STOREFRONT LOCATION

Tenants may have signs within strict limitations based on the following factors: their individual location within the center, the size of their storefront, and the façade design of their location. Not all sign types are available to all Tenants. In addition to these limitations, Tenant signs must be designed in such a way as to harmonize with their façade and neighboring Tenant signage.

Each sign type has its own maximum size requirements. Refer to the description of each sign type on the following pages and to the Allowable Signs and Dimensions chart.

All Tenants are allowed window graphics, also within limits.

SIGN DETAILING

Sign Materials

All sign materials must be consistent with the design theme, enhancing the storefronts and retail image. Due to the variety of architectural façade treatments, each storefront sign must be carefully considered in relationship to its particular location. What may be appropriate in one location may not work in another.

All signage components must be custom. At the Landlord's request, any building material as deemed by the Landlord that has been altered in anyway after the sign installation, whether due to poor design, construction, material selection or exposure must be replaced or reconditioned at the tenant's expense.

Signage is expected to be fabricated from high quality durable materials that can withstand the elements. Dimensional letters and logo forms should have a painted, gilded or metal finish. Letters and logos may also be painted, screen printed or vinyl applied to a sign panel where permitted.

In cases when the building color and tenant signage color do not sufficiently contrast, the following options are available:

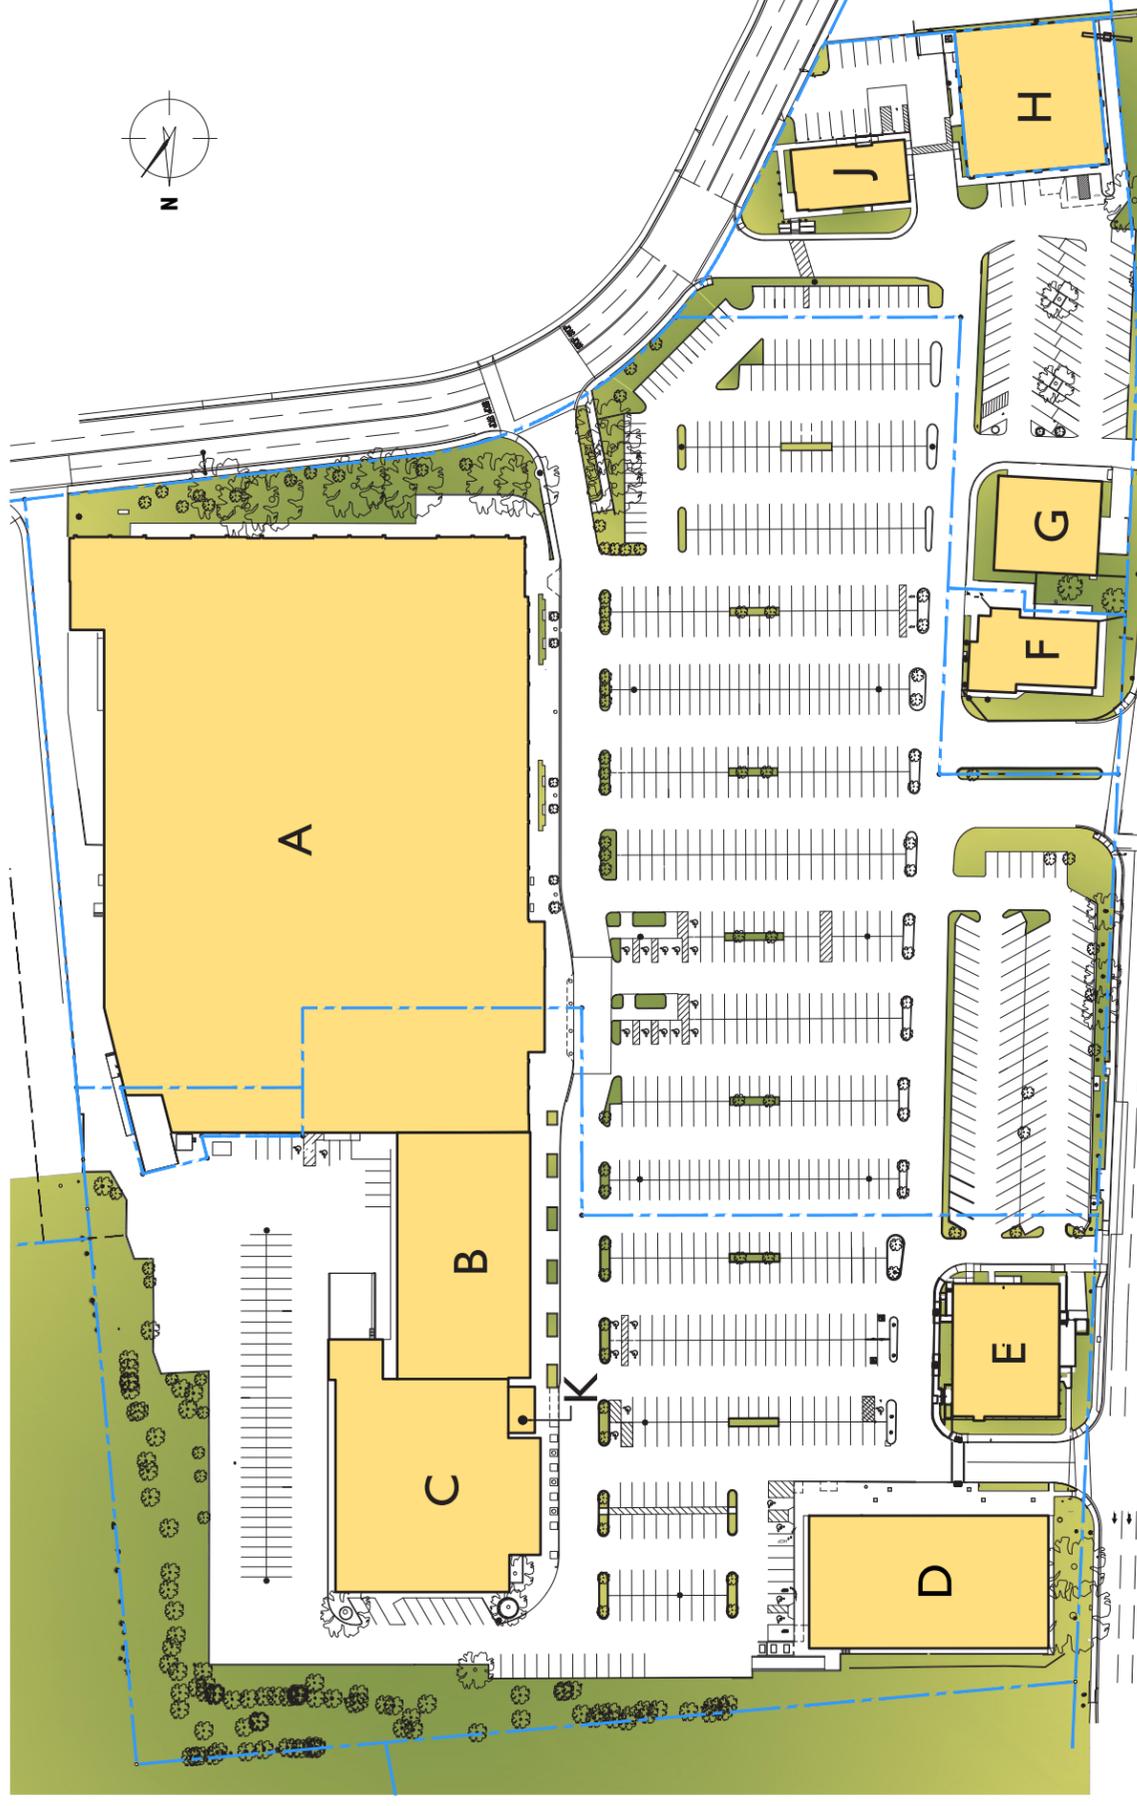

1. Change the sign to a contrasting color.
2. Change the returns of the sign to a contrasting color.

At the time a Tenant vacates a space, the tenant shall remove all signs, patch, paint and repair the surfaces to which the signs were attached, back to the original condition. This removal and repair is at the Tenant's expense.

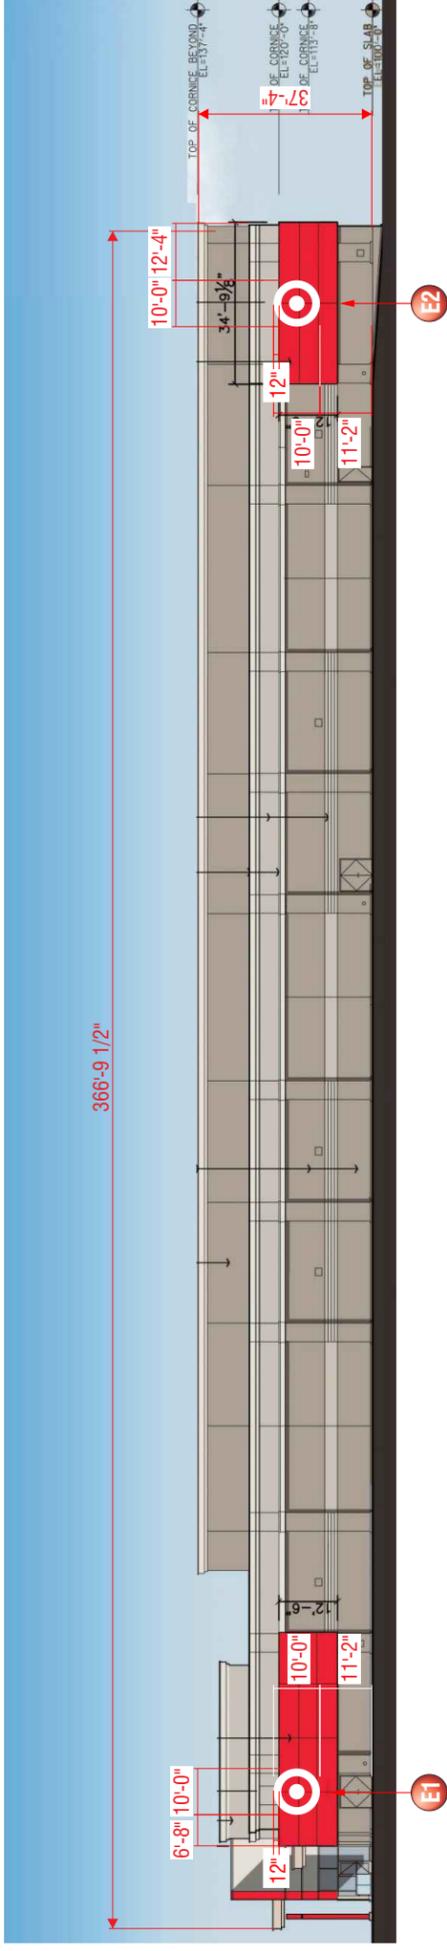

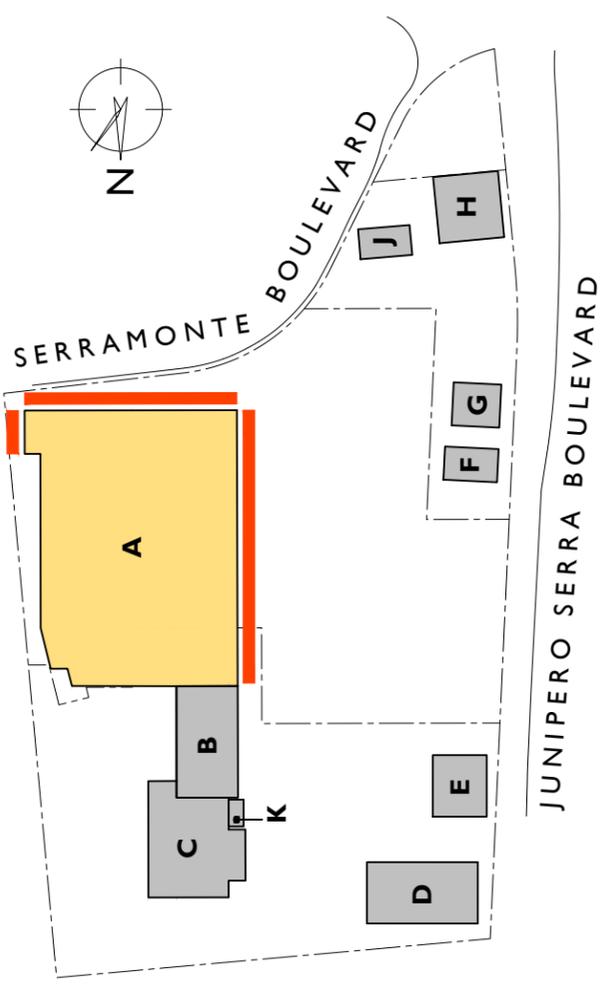

Sign Construction Requirements

1. All electrical devices must be concealed and/or located within the tenant's space.
2. Raceways cannot be exposed.
3. All conduits must be rigid metal and concealed.
4. Fasteners and attachment connections must be concealed from view.
5. Mounting pins and brackets must be as streamlined as possible and painted to match the adjacent building or sign, where applicable.
6. Suspended signs must have a ring or loop connection when possible to allow for sign movement.
7. In no case shall any manufacturer's label, stamp, or decal be visible from normal viewing angles. Only that portion of a permit sticker that is legally required to be visible shall be exposed as inconspicuously as allowed by code.
8. Specify how signs are attached to the storefront or building where allowed.
9. Tenant shall use Hot Foot pigeon proofing where needed. Spikes are not permitted.
