

# Danvers Protecting Our Water Supply

Saving water is everyone's responsibility. By replacing your older appliances and fixtures with new, water conserving models, you become part of the solution. Danvers DPW offers water rebate incentives. Our program gives you the opportunity to save valuable natural resources, update your home appliances and save money.

Danvers DPW thanks you for making every drop count.

### Showerhead

\$50 for 2.0 gpm or less

### Wireless Rain Sensor

\$100 for wireless rain sensor

replacing existing sensor  
or adding to existing  
irrigation system

## Water Conservation Tips

- Check for **toilet leaks** by adding food coloring to the tank. If the toilet is leaking, color will appear in the bowl within 15 minutes. (Make sure to flush as soon as the test is done, since food coloring can stain the tank.)
- Repair **dripping faucets** and showerheads. A drip rate of one drip per second can waste more than 3,000 gallons per year.
- A full bathtub can require up to 70 gallons of water, while taking a **5-minute shower** uses only 10 to 25 gallons.
- **Turning off the tap** while you brush your teeth can save 8 gallons per day.
- **Wash only full loads** of dishes and clothes or lower the water settings for smaller loads.
- Replace your old appliances with high efficiency, **ENERGY STAR®** labeled models, which use up to 50 percent less water and electricity.
- **Low-flow shower heads** and **faucet aerators** enable families to save thousands of gallons a year without sacrificing performance or comfort.

## Water Conservation Tips (cont.)

- Keep drinking water in the refrigerator instead of letting the faucet run until the water is cool.
- Wash fruits and vegetables in a basin. Use a vegetable brush.
- Do not use water to defrost frozen foods; thaw in the refrigerator overnight.
- Scrape, rather than rinse, dishes before loading into the dishwasher; wash only full loads.
- Utilize a rain barrel to collect roof runoff to continue watering plants during drought conditions.
- Sweep driveways, sidewalks and steps rather than hosing off.

WaterSense products are independently tested and can use 20% less water
