Re: Narcotics Safe Replacement

It has been brought to our attention that all five of the narcotics safes utilized by the Dept. of EMS have reached their service expectancy End of Life (EOL), and are no longer supported by the manufacturer. We have been experiencing several technical anomalies regarding the safes in recent days. Four of these safes were purchased in 2014, while one was purchased in 2019. There is a retro kit available to ensure that the 2019 model can be supported, however the life expectancy of the retrofitted safe is questionable and not guaranteed. I have received a proposal from the manufacturer, Medixsafe, the sole source provider, to replace the five safes with updated models and provide a 3yr software support subscription for all 5 safes. It should be noted that we have not had a service support subscription for these safes since 2021. The total amount is \$12,989.00 which includes shipping. There are no existing government contract prices for these items and there is no trade-in credit available. The safes are required as part of our Controlled Substances program and are therefore deemed essential to ensure compliance and continuing to provide Advanced Life Support care to the public. I am requesting that the Board of Trustees authorize this purchase with funds to be drawn from across existing EMS budget lines.

Re: EMS Mobile Computer/ WiFi Upgrade

The computer tablets currently in use by the Dept. of EMS are in need of immediate replacement. One of the five is broken and damaged beyond repair. The latest Microsoft crash affected the remaining four tablets. Lincoln IT was able to rectify the issue, however they operate on an older OS platform and therefore have an unexpected service life remaining. In addition, the existing mobile WiFi infrastructure in the EMS vehicles, particularly the three ambulances, is outdated and in need of immediate replacement. Our EMS providers have been reporting an increase in incidents where they are not able to send critical medical telemetry to Medical Control due to WiFi connectivity issues. The combination of the both the problematic tablets and mobile WiFi infrastructure pose serious challenges to the required transmission of critical data. We have obtained pricing from Island Tech Services, the vendor who similarly upgraded our Police Dept. fleet, for the upgrade of the tablets to Panasonic Toughbooks, which are better suited to the requirements of EMS personnel, and the upgrade of the WiFi infrastructure for the three ambulances. The total price for the project, including installation is \$24,810.00. NYS OGS Contracts PT68719 (Cradlepoint Infrastructure) and PM68162 (Toughbooks) are reflected in that pricing. I respectfully request that the Board of Trustees authorize this emergency expenditure.
