Re: Emergency Repairs ES Building

Marcos,

The structural engineer has observed the local conditions of the truss failure and has made recommendations for immediate stabilization of the failure.

Present at the meeting were two local contractors who discussed the recommendations with the engineer.

I have attached for the Trustees review and acceptance the emergency stabilization proposal by Ben Krupinski Builder.

I have given verbal ok to proceed as this is a time sensitive emergency stabilization of the truss system and will also provide safe ADA access to the EMS second floor offices.
