Wonderfully Wild Marin 2021 CALENDAR

San Anselmo Open Space Committee & Fairfax Open Space Committee

Welcome to the 'Wonderfully Wild Marin' calendar, created by **San Anselmo Open Space Committee (SAOSC)** and **Fairfax Open Space Committee (FOSC)** which often work together to preserve, protect, and educate the community about our natural lands. Proceeds will provide financial support for these important undertakings.

We are deeply indebted to the Marin photographers who have donated use of their artwork for this cause which has made our first calendar possible. **All photos are copyrighted by the artists**.

An Online Exhibit of these works and more from our talented photographers also features maps of open spaces, recreational activities, a naturalist page with bird calls, bat sonar, etc. for identifying local wildlife, a youth corner with games, an events page, and links and lists of helpful references and resources.

The Online Show can be seen at WonderfullyWildMarin.com

A Note from Us:

Marin's nature is exceptional. Not only is it home to diverse, unique, and healthy ecosystems, but for thousands of years, Marin was home to the Southern Coastal Miwok tribes, who valued and cared for these lands while living sustainably. In 1988, UNESCO also recognized the special quality of Marin by designating part of the Golden Gate Biosphere in order to promote study and stewardship.

This legacy is a culture that values nature, believes in stewardship, and seeks sustainability. We hope that you will enjoy this calendar and the online show. They are intended as a celebration of our wild lands as well as being an educational tool for caretaking and living among them.

On Behalf of FOSC and SAOSC, Tidings for the New Year ~

Susan Pascal Beran, Chair FOSC pascalberandesign@yahoo.com

"Frank Egger Redwood Preserve" Background Redwood Photos by Donald Kinney

Purchased in 2006, this magnificent 7 acre parklike site with over 100 first and second growth Redwoods is located between Meadow Way and Canyon Road bordering the Southside of San Anselmo Creek. It can also be accessed from Concrete Pipe Road off Bolinas. The purchase was made possible with Supervisor Hal Brown's help, funding from Marin County Open Space District, FOSC fundraisers, and donations from many local residents.

San Anselmo Open Space Committee (SAOSC)

The San Anselmo Town Council created the Open Space Committee in 1981. The SAOSC is a group of twelve volunteers and two student representatives who are appointed by the Town Council to four-year terms. The Committee's charge is to fulfill the Open Space Element of the Town's General Plan - to save from development over 400 acres of greenbelts and scenic ridgelines that the Town has designated as desirable open space. The committee also has responsibility for long term planning of open space, generating community support, and fundraising. Over the last 40 years the Committee has played a key role in preserving public open spaces, including Kite Hill, Bald Hill Ridge Preserve, Hawthorne Canyon, and Sky Ranch. The Committee spearheaded creation of a master plan for Sorich Park, and recently completed their vision for the Red Hill and Memorial Ridge Trail projects. Each spring, for the past 30 years, the committee has hosted an annual benefit for open space, a gala featuring diverse guest speakers, great food and beverages, and fabulous raffle prizes. The committee works closely with other public agencies, private non-profit conservation organizations to secure protection for our open spaces. For more information, please visit the website https:// sananselmoopenspace.org

Current San Anselmo Open Space Committee Members include:

Jonathan Braun, Co-Chair Stanley Radtke, Co-Chair Kathleen Sanders, Treasurer Peter Horn Danny Krebs, Secretary Paul Foxx Henry Pratt Brian Crawford Leonard Charles Karin Ludwig René Voss Nancy Grover

Fairfax Open Space Committee (FOSC)

FOSC's mission is to preserve the visual and environmental values of our community through the purchase of undeveloped land in and around Fairfax.

Our goal is to provide sanctuary for indigenous flora and fauna for future generations. FOSC is an advisory body to the Town Council and its role is to advocate for open space.

It is FOSC's responsibility to survey the lands within, and adjacent to, the Town of Fairfax in order to determine the availability of unique, threatened, or environmentally sensitive land parcels that may be appropriate to acquire to hold in perpetuity as dedicated open space for the public. FOSC is also responsible for the consideration of long term planning of open space in and near Fairfax, for the generation of community support for the implementation of that program and for the fund raising necessary to implement the plan.

FOSC may also serve as an advisory body in the consideration of long term planning for the Town and also review planning and development matters in order to formulate policy it may deem appropriate to advocate. For more information please visit our website at townoffairfax.org /open-space-committee/

Fairfax Open Space Committee Members: Michael Ardito, Co-Secretary Chris Borjian Chance Cutrano, Treasurer Brad Handel Ruth Horn, Co-Secretary Jack Judkins, Vice Chair Susan Pascal Beran, Chair Jonathan Sicroff Sophie Taubman, Youth Member (ex officio)

Honoring the Memory of Huey D. Johnson ~ January 6, 1933 - July 12, 2020

"He has understood that responsibility for conservation and environmental protection lies with every single member of the human community." - Kofi Annan, the U.N.'s secretary-general, 2001

APRIL 2021 Sun Mon Tue Wed Thu Fri Sat

April is a busy time for all kinds of wild babies. Remember to drive carefully, don't interfere unless absolutely necessary (a parent will often return) and, if needed, call Marin Wildcare (415) 456-7283 for direction.

JUNEZUZISunMonTueWedThuFriSat

A few years ago, the fox population was decimated by distemper and rodenticides but they have made a comeback. June is the when young kits first venture out.

Warm weather increases local reptile activity. Look out for rattlesnakes, gopher, and king snakes while hiking and at home. All eat rodents, but the good-tempered king snake will also eat rattlesnakes. Fence lizards (below) eat Lyme disease-carrying tick nymphs.

Marin Open Space Trust, SAOSC, FOSC, and others worked to acquire Sky Ranch, a picturesque 16.2-acre property that straddles Fairfax and San Anselmo. This grew the Bald Hill Preserve, now owned by Marin County Parks and Open Space, to 46 acres along with connecting to 100,000 acres of public lands and hundreds of miles of trails.

At 1592 feet, Loma Alta is one of the highest points in Marin, and from its peak one can see all around the Bay Area. Its ridgelines bridge the county's four major watersheds. Migrating raptors hunt voles and other small animals. Loma Alta is also home to western bluebirds, hares, coyotes, turkeys, deer, all manner of reptiles, frogs, foxes, and, frequently, mountain lions.
