Part One – Chapter 298 of the Code of the Township of Franklin entitled “Stormwater Quality” shall be amended as follows:

Chapter 298 – Stormwater Quality

Article XI – Tree Removal and Replacement

§298-56. Scope and Purpose.

An ordinance to establish requirements for tree removal and replacement in the Township of Franklin to reduce soil erosion and pollutant runoff, promote infiltration of rainwater into the soil, and protect the environment, public health, safety, and welfare.

§298-57. Definitions.

For the purpose of this ordinance, the following terms, phrases, words, and their derivations shall have the meanings stated herein unless their use in the text of this ordinance clearly demonstrates a different meaning. When consistent with the context, words used in the present tense include the future, words used in the plural number include the singular number, and words used in the singular number include the plural number. The use of the word "shall" means the requirement is always mandatory and not merely directory.

APPLICANT

Means any “person”, as defined below, who applies for approval to remove trees regulated under this ordinance.

CRITICAL ROOT RADIUS (CRR)

Means the zone around the base of a tree where the majority of the root system is found. This zone is calculated by multiplying the diameter at breast height (DBH) in inches of the tree by 1.5 (Result expressed in Feet). For example: a tree with a 6" DBH would have a CRR = 6"x1.5 = 9'.

DIAMETER AT BREAST HEIGHT (DBH)

Means the diameter of the trunk of a mature tree generally measured at a point four and a half feet above ground level from the uphill side of the tree. For species of trees where the main trunk divides below the 4 ½ foot height, the DBH shall be measured at the highest point before any division.

HAZARD TREE

Means a tree or limbs thereof that meet one or more of the criteria below. Trees that do not meet any of the criteria below and are proposed to be removed solely for development purposes are not hazard trees.

- A. Has an infectious disease or insect infestation;
- B. Is dead or dying;
- C. Obstructs the view of traffic signs or the free passage of pedestrians or vehicles, where pruning attempts have not been effective;
- D. Is causing obvious damage to structures (such as building foundations, sidewalks, etc.);
or
- E. Is determined to be a threat to public health, safety, and/or welfare by a certified arborist or Licensed Tree Expert (LTE).

PERSON

Means any individual, resident, corporation, utility, company, partnership, firm, or association.

PLANTING STRIP

Means the part of a street right-of-way between the public right-of-way and the portion of the street reserved for vehicular traffic or between the abutting property line and the curb or traveled portion of the street, exclusive of any sidewalk.

RESIDENT

Means an individual who resides on the residential property or contractor hired by the individual who resides on the residential property where a tree(s) regulated by this ordinance is removed or proposed to be removed.

STREET TREE

Means a tree planted in the sidewalk, planting strip, and/or in the public right-of-way adjacent to (or specified distance from) the portion of the street reserved for vehicular traffic. This also includes trees planted in planting strips within the roadway right-of-way, i.e., islands, medians, pedestrian refuges.

TREE

Means a woody perennial plant, typically having a single stem or trunk growing to a considerable height and bearing lateral branches at some distance from the ground.

TREE CALIPER

Means the diameter of the trunk of a young tree, measured six (6) inches from the soil line. For young trees whose caliper exceeds four (4) inches, the measurement is taken twelve (12) inches above the soil line.

TREE REMOVAL

Means to kill or to cause irreparable damage that leads to the decline and/or death of a tree. This includes, but is not limited to, excessive pruning, application of substances that are toxic to the tree, over-mulching or improper mulching, and improper grading and/or soil compaction within the critical root radius around the base of the tree that leads to the decline and/or death of a tree. Removal does not include responsible pruning and maintenance of a tree, or the application of treatments intended to manage invasive species.

§298-58. Regulated Activities.

A. Application Process:

1. Any person planning to remove a street tree, as defined as Tree removal, with DBH of 2.5” or more or any non-street tree with DBH of 6” or more on their property shall submit a Tree Removal Application to the Franklin Township Zoning Officer or other designated Municipal Official. ORDINANCE 2024-07

**Ordinance to Amend Chapter 298 of the Code of the Township of Franklin Entitled
“Stormwater Quality” to add Article XI – Tree Removal and Replacement.**

SUMMARY AND EXPLANATION

The Township of Franklin, County of Hunterdon, State of New Jersey has a Municipal Separate Storm Sewer System (MS4) Permit from the State of New Jersey. The Township has obtained a new five (5) year Municipal Stormwater Permit from the State of New Jersey in 2023 to cover the five-year period commencing on January 1, 2023, and expiring on December 31, 2027. The Township was classified as a Tier B municipality prior to the renewal of its five (5) year municipal stormwater permit in 2023. However, the New Jersey Department of Environmental Project recently reclassified the Township as Tier A municipality. Following such reclassification, the Township is now subject to the Community-Wide Ordinance requirements of the new Tier A Municipal Stormwater Permit, which prompted the adoption of the Ordinance 2023-08 prior to January 1, 2024. Such requirement is imposed upon the Township by the Department of Environmental Protection.

The State is now requiring that language be placed in the ordinance regarding the removal and replacement of trees in the municipality. This ordinance supplies that language by adding Article XI.
