Community Safe Syringe Disposal Program

The Danger of Syringes and Lancets

*If you need to give
yourself an injection,
proper disposal of
syringes and lancets
can be a problem.*

*The Community Safe
Syringe Disposal
Program ensures
those syringes and
lancets don't hurt your
family or the
environment.*

*You can assume
responsibility for safe
syringes and lancets
disposal.*

Getting Started

A one-time, non-refundable \$10 fee is required to participate in this program.

- You will receive an empty sterilized container with attached cap. While this container is made from a thick plastic material, we cannot guarantee that it is puncture proof.
- Place only used syringes (with needles), insulin pen needles and blood testing lancets in the container.
- After you have used a syringe, **DO NOT ATTEMPT TO BREAK OFF THE NEEDLE OR DESTROY THE SYRINGE IN ANY WAY.** Place the used syringe immediately in the container and keep the container out of reach of children and anyone in your home who may be confused or disoriented.
- When the container is $\frac{3}{4}$ filled, attach the cap and return the soiled container to the **Center for Nutrition and Diabetes Management**, Wescott Medical Arts Center, 9100 Wescott Drive, in the Wescott Medical Arts Center, Suite 102, between Hunterdon Medical Center and Sand Hill Road. **Return hours are between 8:30 am and 4 pm Monday through Friday.** We will take your filled container and give you a sterilized, empty container.
- Only standardized containers distributed by Hunterdon Medical Center will be accepted.

WE CANNOT ACCEPT CONTAINERS:

- 1 Without a cap
- 2 Overflowing with syringes
- 3 With blood droplets on the outside of the container
- 4 Other than ours

Thank you for helping us protect our community!
