Health New England Pharmacy Benefit: 3 Tier Formulary

Health New England is committed to providing our members with access to safe and effective medications. We cover most prescription products and a small number of non-prescription products and medical supplies. Covered prescription products are divided into three tiers with different member copays. Copays are applied toward the out-of-pocket maximum.

Copay Tiers

Health New England has three levels of copays (tiers) for medications. Medications are classified into generic, brand/formulary, and brand/non-formulary tiers.

Generic/Tier 1: Includes mostly generic products which are approved by the FDA. These products contain the same active ingredients as brand name products, are just as safe and effective, and usually cost less. *Note: In Massachusetts, pharmacists are required to fill generic products unless your doctor orders the brand name by including “no substitution” on the prescription.*

Brand Formulary/Tier 2: Includes mostly brand/formulary products. These products are marketed under a trademarked brand name, by one company, and do not have less expensive generic equivalents. Brand/Formulary products are selected based on a review of the relative safety, effectiveness and cost of the many FDA approved products on the market. Your copay for Brand/Formulary products is higher than generic products, but lower than Brand/Non-Formulary products.

Brand Non-Formulary/Tier 3: Includes mostly brand name products that are not a Brand/Formulary product. These products are still covered, but at the highest copay level. Health New England covers brand name products that have FDA approved generic equivalents only if medical necessity has been shown. Your doctor may request prior authorization for a brand name product by filling out a product request form and faxing it to Health New England for review with documentation of medical necessity. Medical necessity includes, but is not limited to, inadequate response to or allergic reaction to the generic(s) and failure of alternatives in the product class.

Certain medications are covered with \$0 copay (please note that deductible may apply). For the most up-to-date list of medications available at \$0 copay, please call Member Services at (413) 787-4004 or (800) 310-2835.

New Medications/Products

Brand name medications that are new to the market and existing medications with new FDA approved indications are not added to the Health New England formulary immediately. There is a minimum 6-month period after medications are approved by the FDA called the Clinical Review Period (CRP). This applies to all new medications, including those dispensed at a retail pharmacy, from a specialty pharmacy, in a provider’s office, or at an infusion suite.

Health New England does not cover medications during the clinical review period. If your provider feels that it is medically necessary to prescribe this medication, he or she may request an exception. If Health New England approves coverage of the medication during the clinical review period, your copay will be 50% of the cost of the medication. At the end of the clinical review period, Health New England may decide not to cover the medication and add it to the exclusion list. If this happens, Health New England will not cover the medication after the clinical review period. If Health New England does decide to cover the medication, a copay tier will be assigned.

Compounded Medications

Health New England covers certain compounded medications. For questions regarding coverage, please call Member Services at 413-787-4004 or 800-310-2835.

Maintenance Medications

Health New England allows members to receive a 90-day supply of maintenance medications at participating retail pharmacies or via Optum home delivery. Certain benefit plans provide cost savings using the Optum Home Delivery mail order benefit.

Specialty Medications

Health New England has a list of medications that are limited to being filled at a specialty pharmacy. These medications must be filled at OptumRX Specialty Pharmacy or Baystate Specialty Pharmacy.

Prescription Medication Limitations

Prior Authorization Program

Prior authorization for select prescription medications is required. Health New England's pharmacy benefit manager (PBM) performs prior authorization review using Health New England approved criteria.

Step Therapy Program

Step therapy is an approach to medication management and is part of the Health New England prior authorization program. Health New England requires you to first try certain drugs to treat your medical condition (known as first line medications) before we will cover another drug for that condition. For example, if Drug A (first line medication) and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B.

If you have a paid claim for a first line medication within the past 180 days, the step therapy medication will be covered. If you have tried the first line medication outside of the 180-day window, your provider may submit medical records to Health New England for review. The use of samples of first line medications does not satisfy this requirement.

If your provider finds that it is medically necessary for you to use a step therapy medication *before* trying a first line medication, he or she can request a prior authorization from Health New England.

Health New England will inform you (or your employer if you are in a group plan) in writing about medications added to the step therapy program via an amendment to your EOC. Health New England Member Services can provide you with an updated list of step therapy medications. Please call Member Services or visit our online formulary at healthnewengland.org.

Health New England's Quantity Limit Program

All prescription medications in the United States are reviewed and approved by the Food and Drug Administration (FDA). The FDA recommends quantity limits for prescribed medications. When a prescription is filled, it is electronically screened for several quality issues including allergies, medication interactions and dosage limits.

Health New England sets quantity limits on most medications to follow the FDA daily dosing guide. If a prescription is written for over this limit, your provider will need to contact Health New England for a prior authorization.

Review Process for Quantity Limitations, Step Therapy, or Exceptions

Your physician may ask us to review a request by completing our Medication Request Form (MRF). This form can be found on healthnewengland.org or by calling Member Services at 413-787-4004 or 800-310-2835.

Changes to Health New England's Formulary

Health New England's formulary is available via the website: Healthnewengland.org. A copy may also be requested by contacting Member Services. Periodically, Health New England makes changes to the formulary and will send these changes to you (or to your employer if you are in a group plan) at least 60 days in advance. If a generic equivalent becomes available for any brand name medication on the formulary, the brand name medication will automatically not be covered unless medical necessity is established. Each year, Health New England sends a reminder to our providers about where they can find the Health New England formulary and will include formulary changes during the year in newsletters for members and providers.

Questions

If you have any questions about your prescription medications, please speak with your doctor. If you have questions about the formulary or your coverage, please call Member Services at 413-787-4004 or 800-310-2835 (TTY: 711), Monday through Friday, 8:00 a.m. to 6:00 p.m., or visit our website at healthnewengland.org.
