Statements from Council Members

Vice President Lee stated the mayor failed to act after the measure was voted down twice, which is why we are in the predicament we are now in and that's trying to figure out how we will get garbage collected in our city.

Council Member Grizzell did not provide a comment.

President Foote stated that the Mayor abandoned the negotiation process and there was no action taken, and he agreed with Vice President Lee that the Mayor did not take action following the rejection of the vendor presented to the Council.

Council Member Hartley agreed there has been inaction by the Mayor in the RFP process; he stated that the process keeps going without resolution; the Council votes eight (8) times, and nothing happens – there is no backup plan, and we are still where we started. Tax dollars have to have guidelines, and guidelines for RFPs are to ensure fairness and observe the process, but this has not been accomplished.

Council Member Banks stated that with regard to the long-term garbage contract and related RFP, the Mayor took no action – on the 1st occasion, a letter was submitted to the City Council by attorney Terry Williamson. When asked in Council chambers during a recent meeting about any “plan B, plan C, or plan D,” City Attorney Catoria Martin stated that there is no such plan. Also, Dr. Omari had stated Waste Management would never get a contract as long as they were here (meaning this administration).

Council Member Lindsay stated that since September 2021, the City has been in an unproductive cycle, with no progress on the City's need for a long-term garbage contract. The Parties had agreed on another RFP to enter into a six (6) month emergency contract, but during the period of emergency proclamation, the current RFP was issued, but the Mayor did not get the votes to enter an agreement with Richard's, even for a one-year contract; now the City is back where it was during September 2021, but with less time to prepare. The City may not have a vendor on the ground in time to begin providing service in the event Richard's service ceases in 2023. We have not observed any sense of urgency from the Administration, and I am really concerned about the passage of time once the Supreme Court's ruling comes down. Also, I have worries about the next move for long-term garbage, due to nothing having been said by the Mayor and his administration. 1) Following the City Council's rejection of the first bidder presented, the Mayor has not brought other vendor to the City Council for consideration and approval, and 2) the City Council needs to make sure we do everything we can for our citizens. It's imperative that we prepare our outside legal counsel with the necessary tools to fight for our citizens.

Council Member Stokes stated that he agreed that the Mayor had taken no action and that the Council must be prepared and have something in place. Citizens are already upset and the City Council must have a plan.

**SPECIAL MEETING OF THE CITY COUNCIL
TUESDAY, JANUARY 10, 2023 10:00 A.M.**

Council Member Hartley moved, seconded by **Council Member Banks** to authorize the City Council's outside legal counsel to seek a declaratory judgment that the City Council has the legal authority to move forward with the RFP process when the Mayor takes no further action, following the rejection of the first bidder. Furthermore, the Motion included directions to independent special counsel to request that the federal court retain jurisdiction of the matter until the long-term solid waste disposal and garbage collection RFP process is completed by the City of Jackson. The motion prevailed by the following vote:

Yeas – Banks, Foote, Grizzell, Hartley, Lee, Lindsay and Stokes.
Nays – None.
Absent – None.

Council Member Hartley moved, seconded by **Vice President Lee** to authorize President Foote to work with special independent counsel. The motion prevailed by the following vote:

Yeas – Banks, Foote, Grizzell, Hartley, Lee, Lindsay and Stokes.
Nays – None.
Absent – None.

There were no reports/announcements provided during the meeting.

There being no further business to come before the City Council, it was unanimously voted to adjourn until the Regular City Council Meeting at 10:00 a.m. on January 17, 2023. At 11:18 a.m., the Council stood adjourned.

7. Third Party Applications

Exhibit B: Annual Subscription Support Terms

1. Site Access

When requested by JusticeTrax, the Customer is obliged to provide access to its premises, staff, and authorities, provided JusticeTrax staff meet the security requirements noted in Section 4 of the Head Agreement.

2. Product Support

PURPOSE \ SCOPE

This document represents the Service Level Agreement (SLA) between JusticeTrax, Inc. and its Customers for the provisioning of software and IT services required to support and sustain JusticeTrax products and services.

The purpose of this SLA is to ensure that the proper elements and commitments are in place to provide consistent customer service support and delivery to the Customer(s) under their current SMA.

The objectives of this SLA are to:

- Provide clear reference to service ownership, accountability, roles and/or responsibilities.
- Present a clear, concise and measurable description of service provision to the customer.
- Match perceptions of expected service provision with actual service support & delivery.
- Clearly delineate the different services provided by JusticeTrax under a subscription-based contract compared to a maintenance agreement.

This SLA remains valid unless superseded by a customer contract or agreement mutually endorsed by both JusticeTrax and the customer.

Standard Maintenance Agreement

All Customers that have access to JusticeTrax continued support and maintenance are under the Standard Maintenance Agreement (SMA). Portions of this agreement, executed between JusticeTrax and all our Customers, are mentioned in this document and the template agreement is provided here for your reference. Each customer should refer to their specific Agreement, as it may have been modified to meet your specific contract requirements.

Your specific SMA may have been modified during the course of contract negotiations. Please refer to your executed agreement if you believe it differs from the standard agreement provided here.

Product Implementation Support

Certain contracted support and maintenance services are provided prior to the SMA taking effect. These services are typically provided during product implementation. Product implementation projects will be documented in Basecamp, including the status of all deliverables and services. Contract closing will also be documented in Basecamp. Where services differ under a subscription or maintenance plan, subscription services are denoted with "Subscription", while maintenance plan services are denoted with "Maintenance". If services are not labeled in this manner, then they are provided under both plans.

Server Configuration and Installation

Subscription: JusticeTrax will provide a hosted environment, including the installation of all purchased products, and performance based on Exhibit E of the originally executed contract. JusticeTrax will also aid in installing any client based JusticeTrax software on the Customer's computers as necessary.

Maintenance: JusticeTrax will provide server configuration and set-up assistance to all customers to provide for the proper installation of JusticeTrax products. After installation, server or hardware assistance will be provided per the SMA.

Administrative and End User Training

All Administrative, End User and Report Training will be provided as contracted. When contracted training time has been exhausted, a quote will be provided for any additional customer requested training and carried out upon agreement of the quote.

Configuration Services

All Configuration Service hours will be provided as contracted. Configuration Service hours can include design, configuration, and reporting services for any of the purchased applications. Use of hours, as well as documentation of remaining hours at any given time in the project, will be tracked in the Basecamp project.

Crystal Reports and SSRS Reports

Crystal Report Templates will be provided as contracted, either as a line item or through Configuration Services. Once a Crystal Report Template has been designed per customer specifications and provided to the customer, the report will be considered "delivered." It is expected that the customer will test the report to confirm functionality and verify that specifications are met. Once the report is tested and verified, the customer will accept the report and document such in the Basecamp project. If no response is received from the customer within two weeks of the report, it will be considered "accepted" by default.

Any requests for changes, modifications, or re-design of an "accepted" report due to a customer modification will be performed only upon the reallocation of resources from another line item on the contract, or upon the issuance of a PO for additional report development time.

Customer Standard Support for LIVE Product

After a Product is deemed Configured For Use in a Customer's environment, their support is transitioned to JusticeTrax Standard Support. All support that is provided at that point is per the SMA. The areas of support that are included in the SMA follow:

Business Hours of Support

Customer Care's regular business hours are 8 am to 5 pm, Arizona time. Please note that Arizona does not observe daylight savings time.

JusticeTrax is closed on the following U.S. holidays: New Year's Day, Fourth of July, Thanksgiving Day and Christmas Day (or nearest weekday, if the holiday falls on a weekend).

Maintenance: An application request or requirement for assistance by JusticeTrax Support outside of these published business hours will only be fulfilled once a request has been reviewed and if necessary, a quote for estimated assistance time is produced and agreed upon by JusticeTrax and the Customer.

Subscription: An environment service request outside of these published business hours will be handled and governed by Exhibit E of the original contract.

An application request or requirement for assistance by JusticeTrax Support outside of these published business hours for a subscription customer will only be fulfilled once a request has been reviewed and if necessary, a quote for estimated assistance time is produced and agreed upon by JusticeTrax and the Customer.

Zendesk

Requests for assistance or inquiries are made to the JusticeTrax Customer Service department through the Zendesk Help Center Portal or support email address, support@justicetrax.zendesk.com. Per the JusticeTrax SMA, for consistency and responsibility, only authorized system administrators or back-ups (as defined by individuals with Zendesk accounts) should be contacting JusticeTrax for support

assistance. Customers are asked to inform JusticeTrax if there are additional individuals that need to be provided Zendesk accounts and are authorized to submit such requests on behalf of your laboratory or agency.

Each issue logged by JusticeTrax Customer Care receives a unique identifier called a "Zendesk Issue Tracking Number", or "ZD Number." This number should be used in all correspondence to JusticeTrax Customer Care regarding an open issue. Emails are automatically sent to the Customer when JusticeTrax representatives add comments to Zendesk tickets. The Customer may respond directly to the email, which will then be automatically added as a comment to the same ticket. This process will carry through until the resolution of the ticket

Telephone Support

Requests for assistance or inquiries can also be made by telephone at 800-288-5467 opt. 4 during business hours. A message can be left for Customer Care staff outside of business hours or when all staff is busy.

Per the JusticeTrax SMA, for consistency and responsibility, only authorized system administrators or back-ups (as defined by individuals with Zendesk accounts) should be contacting JusticeTrax for support assistance. Customers are asked to inform JusticeTrax if there are additional individuals that need to be provided Zendesk accounts and are authorized to submit such requests on behalf of your laboratory or agency.

Crystal or SSRS Reporting

Crystal Reports and SSRS Reporting are an intricate part of most of the JusticeTrax products. We encourage Customers and Agencies to obtain training and gain knowledge in these products to be able to utilize as much of the reporting power that they can from their product databases.

Support for issues that involve Crystal Reports or SSRS will be provided with the following guidelines:

- Modifications of a report, originally delivered under contract with JusticeTrax, due to improper report functionality because of a recent change to product code or other JT product/software modifications.
- General functionality questions and explanations of how to achieve a particular goal using a Crystal Report template.
- Short consultations (less than a half hour of time) on Customer created reports may be provided but at a lower priority.

Server or Database

Maintenance: Customers are ultimately responsible for the maintenance and upkeep of their server hardware, databases and backups. JusticeTrax can and will provide guidance or support for certain aspects of server hardware, and to a greater degree, the JusticeTrax product databases for two Customer environments- one containing production data and one used for testing new versions and configurations, however they are named. Any requested JusticeTrax assistance will require the involvement of

Customer IT staff or equivalent. Final responsibility for all environmental changes is that of the Customer representative.

Subscription: JusticeTrax is responsible for the maintenance and upkeep of the Customer's server environment, databases and backups according to Exhibit E.

Service Outside the Scope of Standard Maintenance

The Standard Maintenance Agreement (SMA) includes assistance centered around the support of JusticeTrax products as well as the limited services stated above. For customers that are in good standing with their SMA, quotes can be supplied for any of the individual tasks listed below or other custom support as needed. Please note that some of these services may be performed and executed under contract during the implementation of a JusticeTrax product and would not be considered outside the scope of the SLA. Instead, they would be governed by the **Product Implementation Support** section of this document.

Crystal or SSRS Reporting

- The creation of a new report by JusticeTrax based on customer requirements.
- Updates or edits to the following types of reports*:
 - o Any report NOT originally delivered by JusticeTrax where the report was originally designed, created, and configured by the customer.
 - o Any report that was functional and is now not functioning correctly due to customer changes to application, database, or environment.
 - o Any report that requires the development of custom tools such as stored procedures, triggers, user defined formulas, Word macros or Visual Basic code modifications.

*NOTE- assistance may be provided for these types of reports under the previously mentioned short consultations.

Server or Database Support for Maintenance Customers

- The configuration and development of custom stored procedures or triggers to maintain a functional JusticeTrax product due to changes in the customer's environment.
- The monitoring or resolution of poor database backups, filled log files or assistance when exceeding Customer database data storage capabilities.
- Remote or onsite assistance in moving of application or database instances to a new server due to changes in customer IT environment(s) or requirements.

- Upgrade of server software or operating systems due to changes in customer IT environment(s) or requirements.
- The development of custom scripts, stored procedures or triggers.
- The movement of database instances to a new server

Notification of Need for Service Outside the SMA

After logging of an issue or request for assistance by Customer Care in our Zendesk Issue Tracking System, the issue will follow normal issue resolution processes until it is determined that one of the above conditions is required to resolve the issue.

When necessary, the customer will be notified that the issue's resolution will require services outside the scope of the SMA. An estimate of time and costs will be supplied as a quote for additional services. Quotes will include a per hourly charge and will include travel expenses, if necessary.

The Customer will need to provide a confirmation for the services and when necessary, a purchase order before the work will proceed.

If the customer does not approve the required work, the issue/ticket will be closed, and a note attached that the issue was not covered under standard maintenance.

Purchase of Bulk Support Hours

Customer Care recognizes there are times when Customers do not have adequate resources to perform services which are outside of JusticeTrax's supported service – defined in the **Service Outside the Scope of Standard Maintenance** section of this document – and that acquiring purchase orders on an as needed basis can become difficult. In order assist customers in meeting these challenges, we provide the opportunity for the purchase of Bulk Support Hours.

These service hours can be optioned in each year as an addition to maintenance or subscription fees and renewed annually as needed. We offer increments of 10, 20, 50 or 100 hours specifically to be drawn upon for services such as Crystal Report Configurations, Crystal Report Edits, SSRS Reporting, Server Moves, Configuration Assistance, New and Repeat training and other out of scope services.

A Zendesk ticket should be submitted for each request as outlined in **Notification of Need for Service Outside the SMA**. All out of scope tasks are subject to the approval of the Customer Care Manager and availability of resources. Also, prior to decrements being made to Bulk Support Hours, Customer Care will require approval from the organization's designee (LIMS Admin, Lab Director, etc.)

All Bulk Support Hours are required to be used within a year of purchase. After this time, they are considered expired, and a new purchase is required for future Bulk Support Hours.

Customer Support Issue Escalation Policy

Customer Support Response Time and Escalation Guidelines

The JusticeTrax Support Escalation Policy ensures our Customers' issues are handled by knowledgeable JusticeTrax staff within the most reasonable timeframe. Issues are escalated through a process that includes our Customer Care staff, Developers and Management Team. This escalation policy governs both Subscription and Maintenance customers.

Submission Process

Issues are submitted or reported to JusticeTrax using the Zendesk Issue Tracking System, email or direct phone calls to a Customer Care representative.

Issues received via JusticeTrax email or phone are logged into Zendesk and responded to via Zendesk or phone communication.

JusticeTrax Customer Care uses the following issue **STATUS** to categorize reported issues:

Open - The issue is open and being worked by JusticeTrax Staff.

On Hold - The issue is submitted for resolution to JusticeTrax Development or database administrator. The ticket is still active pending the completion by Development or DBA.

Pending - JusticeTrax is waiting on a response for additional information from the Customer/Requestor or a resolution has been provided and waiting for their approval.

Solved - Upon customer approval or agreement, the issue has been marked solved and will be closed. A resolution notice and message are sent to the customer when tickets have been set to solved.

JusticeTrax Customer Care uses the following issue **PRIORITIES** to categorize the current criticality of an issue:

1. Urgent - Customer's JusticeTrax product/system is down or normal workflow is being prevented. A workaround cannot be offered or is unsuitable.

2. High - Normal workflow is being affected, but a workaround is available. The issue is planned to be fixed in the current product in the next release.

3. Normal - Unwanted or unexpected behavior is being observed in the product but does not affect normal customer wide workflows. Issue will need attention or review at the next available Development cycle or version number of the product.

4. Low - An enhancement request for other non-immediate need or general question that only required an answer/response.

Issue Response Times and Escalation

JusticeTrax strives to move all issues to a "solved" status as quickly as possible.

Customers may request an escalation by contacting JusticeTrax.

All issues/tickets will be evaluated by a Customer Care Representative and given an initial Priority, as defined above, as soon as feasible.

All issues/tickets will move through different levels of response when necessary. Levels are defined below along with their escalation timeline. All time references are normal business hours except for Urgent tickets. Urgent tickets that are received outside of normal business hours will be addressed as soon as possible once resources can be addressed. They will not be held until business hours for review.

Level 1: The new issue is received by JusticeTrax and appropriate Staff attempts to resolve the issue to the satisfaction of the customer. In Zendesk, this would be an issue OPEN and assigned to a JusticeTrax Representative. A Level 1 issue will be escalated to Level 2 based on its priority.

Escalation to Level 2

Urgent - within 1 hour

High - within 4 hours

Normal - within 24 hours

Low - 48 hours

Level 2: The issue is escalated to another JusticeTrax staff member with issue specific knowledge for research and/or resolution. In Zendesk, this would be an issue OPEN and assigned to the new staff member. A Level 2 issue will be escalated to Level 3 based on its priority.

Escalation to Level 3

Urgent - within 2 hours

High - within 8 hours

Normal - within 24 hours

Low - Only after further review by Product Manager

Level 3: The issue is escalated to the Development team or a DBA for resolution. The initial JusticeTrax staff member will continue to communicate with the customer throughout the issue resolution process. In Zendesk, this would be an On Hold issue. A Level 3 issue will be escalated to Level 4 based on its priority.

Escalation to Level 4

Urgent - within 6 hours

High - within 16 hours

Normal - only after further review by JusticeTrax Management Team

Low - only after further review by JusticeTrax Management Team

Level 4: The issue has been escalated to the JusticeTrax Management Team for review. The possible outcomes of a Level 4 review include but are not limited to: the issue of a software patch, the confirmation of matter being placed on current development cycle or an agreed negotiated course for issue resolution between the Customer and Senior JusticeTrax Management. In Zendesk, this would be an On Hold issue.

Issue and Ticket Resolution

The goal of the Issue Escalation Policy is to move each issue to a status of "solved" as quickly as possible. This means that we have offered a resolution and are awaiting confirmation that the issue is resolved. Issues are considered resolved and closed only when the customer is in agreement with the resolution or when no further follow up from the customer is received.

As the initial receiver of all tickets and issues, our customer representatives will be responsible for updating customers on the status of their issue. In some instances, staff cannot obtain confirmation of a resolution. While we will make every effort to ensure you have received a workable solution, there are instances where we will mark an issue as solved without your direct confirmation.

If a representative has made effort to receive written confirmation from a contact that an issue is resolved but to no avail, then the issue's status will be marked as "Solved". Tickets that remain "Solved" after 30 days will automatically be marked "Closed" in the Zendesk application. The issue will be reopened upon request from the contact prior to the 30-day wait period, or a new ticket will be created if the original ticket has already reached the "Closed" status.

Satisfaction Surveys

Customer Satisfaction is used by JusticeTrax to gauge the level of support we are providing as well as an understanding how our assistance is received by our customers.

With the resolution of each issue, an automated inquiry will be sent to the requestor confirming that the issue has been set to "Resolved". It will also include a quick and easy survey related to that specific issue. Customer feedback is important in allowing us to continually improve our processes. Please take a minute with each survey to let us know how we did by replying to the e-mail.

In addition to issue/ticket resolution surveys, JusticeTrax distributes Company Satisfaction Surveys each year to our customer agencies. The result of this more inclusive survey is used by JusticeTrax to re-deploy resources or obtain training in those areas necessary.

3. 7x24 Emergency Telephone Support

JusticeTrax will provide 7x24 Telephone Support that extends Support for problems identified as Critical Priority Error and High Priority Error to include all hours not already provided for within Regular Telephone Support. 7x24 Telephone Support allows the Customer's internal support staff that are technically capable and who first troubleshoot the problem, to authorize JusticeTrax to provide 7x24 Telephone Support. An additional agreement and costs will apply to this enhanced level of application support.

4. Third Party Applications

- 4.1 **Responsibilities for Planned Updates.** Customer shall provide JusticeTrax with prompt notice, and in no case fewer than forty-five (45) days' advance notice, of any update by the Third-Party Provider of a Third-Party Application. JusticeTrax shall undertake commercially reasonable efforts to patch or update the Product in order to integrate it with the updated Integrated Third-Party Application.
- 4.2 **Responsibilities for Planned Upgrades.** Customer shall provide JusticeTrax with prompt notice, and in no case fewer than ninety (90) days' advance notice, of any planned upgrade by the Third-Party Provider of a Third-Party Application. JusticeTrax shall evaluate the time and resources required to patch or update the Product in order to integrate it with the upgraded Third-Party Application. The Parties shall engage in good faith negotiations to agree on the terms (including, without limitation, schedule and price) on which JusticeTrax would develop a patch, update, or upgrade to integrate the Product with the Third-Party Application.

4.2 During the Production Period, the annual subscription fee for the Software as a Service shall be calculated as the number of users per application multiplied by their respective UCY as defined in Section 3.

5. Egress and Connectivity

5.1 The customer will provide access in a manner consistent with their security requirements.

6. Database / Disk Storage

6.1 Disk Storage (for multimedia attachments and logs) shall be made available for a total maximum of 1 terabyte.

Exhibit D: Onboarding Terms and Conditions

1. Documents

1.1 The Onboarding Terms and Conditions shall also include the following sections, where applicable:

- i. Documents
- ii. Statement of Work
- iii. Project Implementation Schedule
- iv. Interface Control / Tailored Work Document (ICTWD) - Not applicable
- v. Data Migration - Not Applicable
- vi. Enhancements Control Document (ECD) – Not applicable
- vii. Acceptance Testing
- viii. Training Course Outlines
- ix. Changes to Onboarding Projects

2. Statement of Work

JusticeTrax shall assign a competent project manager to this project during the Implementation Period to deliver the Contracted Services and Subscribed applications. The project manager shall be Jenna Oakes-Smith, with service delivery provided by Implementation Specialist Chris Patti, unless the parties mutually agree to change this individual, which consent shall not be unreasonably withheld. The project manager shall prepare work plans and schedules, keep all active parties aware, in writing, of progress, changes, issues, etc. and convene meetings when necessary and convenient for the parties to resolve issues and confirm achievements. Only JusticeTrax staff who are fully trained and qualified and who have met the JusticeTrax security standards shall be assigned to this project.

The Customer shall designate a project authority from their staff who shall have the experience, knowledge, and authority to make decisions with the JusticeTrax project manager and carry out those responsibilities attributed to the Customer and reflected in the Project Implementation Schedule (Exhibit D.2).

JusticeTrax will provide guidance and assistance in specifying the hardware and third-party software to be purchased by the Customer.

3. Project Implementation Schedule

JusticeTrax recognizes six (6) milestones in a project:

- Project Start: Once a kick off meeting has been held with the customer, the project is considered “in flight” and started.
- Administrative Configuration Complete: Administrative configuration covers the data points that are used to enter case and result data; this data is either included in the application by default or is added to the application for the customer either through script or the user interface. A complete administrative configuration means that the application contains all of the design and data needed for the customer to enter case work. This may include, but is not limited to, user

designed data entry screens, configured modules, populated picklists and formatted report templates.

- **Configured for Use:** This milestone means that initial acceptance testing by appropriate personnel (as defined in more detail in Section D.7) has been completed. The customer has deemed the application configured and useable for their analytical and casework needs. The customer can Go Live and put the application into use at any time.
- **End User Acceptance*:** End User acceptance training and testing ensures that all end users have been appropriately trained, either by internal customer trainers or by JusticeTrax Staff, and have been given the opportunity to test the application and become comfortable with its use. Issues that are identified in this process can be addressed either by the implementation team or under maintenance support.
- **Live*:** The customer is using their software in a production environment (however named) and the data that is being entered into the system will be used for official analytical/ evidentiary needs.
- **Project Close:** The onboarding of the customer is complete. All contract items have been delivered or reallocated as appropriate. All future work and support will be handled under subscription support and/ or future contracts.

*While project plans are created to include the End User Acceptance and Go Live milestones, these are not considered to be required under implementation projects. If delays in the project are generated due to limitations on customer resource availability, these milestones may be skipped as the JusticeTrax Implementation Specialist is reassigned. Once an application is configured for use and can be used by the customer, future support can, and would in the cases of a delayed project, be handled under the subscription agreement by the JusticeTrax helpdesk. If projects are delayed due to JusticeTrax resource availability, a new resource would be assigned, or a new project plan would be created to include these two milestones.

The project timeline for this work, including dates of the milestones, is a sample only. A project timeline will be updated after all documents are finalized and kick off meeting.

4. Interface Control / Tailored Work Document (ICTWD)

5. Enhancements Control Document (ECD)

6. Data Migration

7. Acceptance Testing

The customer will identify a team of users to take on the role of power users, subject matter experts, back up administrators (however named by the organization). These people should have technical, specific, and practical knowledge of at least one Discipline in the Crime Lab as well as evidence handling and processing. They will act as liaisons between the individual units and the overall implementation team. They should participate in admin or power user/ SME training during the implementation and help to make configuration choices for their representative unit.

These staff members will be responsible for the acceptance of the individual section workflows and configuration. They will perform validation testing of all configured screens, administrative data, reports and any integrations that are needed by the section. Once they have signed off on their workflow, the application will be configured for use for that discipline. Once all disciplines have been accepted, the application will be considered Configured for Use and that milestone will be achieved.

8. Training

Administrator/Configuration training is provided very early in the implementation process. Administrator training is provided to a group comprised of the designated LIMS administrators for the customer as well as subject matter experts from each section as appropriate. The training is designed to teach this core group of users how to configure LIMS-plus to ensure that workflows and modules match the analytical needs of the customer. This training will take place very early in the implementation. The contract line item of Administrator Testing will be to include general administrative topics as well as section specific information.

9. Changes to Onboarding Projects

From time-to-time Project Changes may arise. JusticeTrax staff will propose and post such Changes to the JusticeTrax electronic project management system where the Customer shall accept or reject the change. Changes will be deemed acceptable should the Customer not respond within 7 calendar days.

9.1 Amendments

The following types of changes shall require an Amendment Form to be completed, and if approved, signed by representatives of both Parties authorized to bind each Party in such matters:

- Adding new product or additional services to the Project.
- Changes in project scope that result in an increase to the fees.
- Updates to the Project Implementation Schedule (Exhibit D.2) that impact the "1.9 Configured and Available for Use" Payment Milestone.

The above types of changes are not meant to be an inclusive list.

In the event of inconsistencies amongst the Main Agreement or the Agreement's Exhibits and any Change Order Form the Change Order Form shall take precedence over the Exhibits contained in the Agreement. The Main Agreement shall remain unaffected.

Exhibit E: System Performance and Availability Standards

1 Overview

This Exhibit sets forth the performance and availability standards to which the JusticeTrax software applications are expected to perform, providing that the Customer meets JusticeTrax' recommended hardware and network specifications, including server, desktop workstation and mobile configurations, and that the Customer uses the Application Software according to its intended design.

Server hardware/software requirements, minimum workstation configurations, and network requirements are defined in Customer Supplied Hardware and Third-Party Software (Exhibit G). Specifications and requirements are subject to change to support future Product Upgrades.

The measured times exclude any factors that may be caused by factors outside of JusticeTrax' control, such as, but not limited to, the network.

2 Transaction Response Times

JusticeTrax Application Software performance is based on transaction response times, which are measured from operator action until visual response is observed or until the operation is completed.

Important Note: Expected response times are not for data-dependent transactions, such as, but not limited to, displaying data lists, displaying dashboards, querying external interfaces, attaching/downloading files, generating reports, printing, or performing queries or searches. For such types of data-dependent transactions, including large administrative tasks and large evidence transfers, the response time results may vary depending on the amount of data involved, the sizes of the files involved, the complexity of reports, or the types of search criteria entered.

The approach taken will be to measure the performance of transactions from an end user while the System is under normal and reasonable workload within the Production Use environment. Delays caused by the network will not be included in the response times.

When measuring response time, no backups, ad-hoc queries against the database, or reports will be processed. The response times will be measured from workstations that meet the recommended workstation requirements as defined in Exhibit G.

The expected transaction times for JusticeTrax Software Applications is three (3) seconds or less.

3 Availability Standards

During the Production Period of the SaaS Services, the Application Software shall be available in the production environment 98% of the time. The following specifications define both availability and the method by which it is calculated:

Availability is expressed as a percentage of the maximum expected availability over a given period. The Application Software shall be available seven days per week, 24 hours per day. The percentage availability for any period will be calculated as follows:

$(\text{Total Hours in Period} - \text{Hours System Unavailable}) \times 100 / \text{Total Hours in Period}$

"Unavailability" is where the JusticeTrax Software Applications are completely and generally unavailable for the Customer's use (but not the use of any one Authorized User, or subset/group of users; or access from any one workstation, or group of workstations), and does not include any unavailability attributable to:

- a. Scheduled downtime for maintenance;
- b. Scheduled downtime for System Upgrades or Updates;
- c. scheduled downtime for operating system patch updates;
- d. downtime for upgrades or updates to system software components and tools integrated as part of the Solution;
- e. downtime for upgrades or updates to cloud-based Third-Party Software Components and services integrated as part of the SaaS Services;
- f. downtime related to connectivity issues resulting from Customer or third-party-provided or managed Direct Connect or VPN access to hosted server or Customer internal network problems; Customer will be responsible for immediately notifying JusticeTrax of all third-party-managed VPN access and internal or external (e.g. internet service provider) network problems that arise;
- g. an incident resulting from data or infrastructure or network provided and/or performed by the Customer;
- h. acts or omissions of Customer or any Customer user, Authorized User, or any employee, agent or independent contractor of the Customer;
- i. lack of availability or untimely response from the Customer that require the Customer's participation for resolution;
- j. the Customer's negligence or breach of the Customer's material obligations under the Agreement;
- k. any other cause(s) beyond JusticeTrax' reasonable control, including but not limited to those caused by Third-Party Data, Third-Party Applications, Third-Party Provider, or Third-Party software, service outages by the platform provider, e.g., Microsoft Government Azure, as well as overall internet congestion, denial of service attack, or a force majeure.

4 Data Backup and Disaster Recovery

During the Production Period of the SaaS Services, JusticeTrax shall provide backup of Customer data using the tools inherent to the platform, e.g., Microsoft Government Azure. Platform tools shall also be used to establish and maintain disaster recovery processes.

Labs that span multiple time zones might consider deploying a web server in each zone to accurately reflect the time of each zone.</p> <p>Implementation and support of clustering is not provided by JusticeTrax.</p>

Backups

JusticeTrax does not assume any responsibility for backups.

A backup solution will need to be implemented by local support staff.

Barcode Printers

Original Solicitation: [FY 2020 National Sexual Assault Kit Initiative \(SAKI\)](#)

Description of original award (Fiscal Year 2020, \$1,179,593)

The National Sexual Assault Kit Initiative (SAKI) supports the Department's criminal justice priorities of reducing violent crime and supporting law enforcement officers and prosecutors by: (1) providing jurisdictions with resources to address sexual assault kits (SAKs) in their custody that have not been submitted to a forensic laboratory for testing with Combined DNA Index System (CODIS)-eligible DNA methodologies, and (2) improving investigation and prosecution in connection with evidence and cases resulting from the testing process; and (3) providing sites with resources to collect DNA samples from qualifying individuals who should have a sample in CODIS (based on the type and time of the offense in relation to applicable state law), but from whom a sample has never been collected or submitted to a laboratory for

testing. In addition, SAKI will provide investigators with assistance in how to more effectively question subjects, which could provide stronger investigative leads and build stronger prosecutorial cases, which in turn could help solve more crimes.

The FY 2020 National SAKI Program will provide funds to recipients to implement or enhance the comprehensive BJA model to address the issues that underline the problem of unsubmitted SAKs or to expand their existing SAKI project to include the collection of lawfully owed DNA samples from convicted offenders. In FY 2020, National SAKI Program funding is available under four Purpose Areas:

Recipients under Purpose Area 1: Comprehensive Approach to Unsubmitted Sexual Assault Kits, will implement a comprehensive approach to unsubmitted SAKs that includes all three elements of the BJA model: Inventory all unsubmitted SAKs; Create a multidisciplinary working group; Designate a site coordinator. The goal of SAKI is the creation of a coordinated community response that ensures just resolution of these cases, whenever possible, through a victim-centered approach, and to build jurisdictions' capacities to prevent the development of conditions that lead to high numbers of unsubmitted SAKs. This holistic program provides jurisdictions with resources to address their unsubmitted SAKs, including support to inventory, test, and track SAKs; create and report performance metrics; access necessary training to increase effectiveness in addressing the complex issues associated with these cases and engage in multidisciplinary policy development, implementation, and coordination; and improve practices related to investigation, prosecution, and victim engagement and support in connection with evidence and cases resulting from testing. Grant recipients must also enter all criteria cases into ViCAP (before the end of the grant period) to increase the chances of identifying and apprehending violent serial offenders who pose a serious threat to public safety.

**DECLARATION INVOKING THE EMERGENCY
PROCUREMENT PROCEDURE**

I. REQUEST

There is an ongoing sanitary sewer overflow located in the intersection of Forest Avenue and Watkins Drive. This SSO appears to be caused by a sanitary sewer line collapse. This SSO is located close to Hico Park. The SSO poses a hazard to human health and the environment. Until such time as a new Water and Sewer Term Bid is let and awarded, emergency repairs such as this that were formerly repaired under the Term Bid will need to be repaired under the emergency procurement process as funding becomes available.

This cost of this will be done using funds received from the Infrastructure Modernization Tax.

Accordingly, I request that you declare that this situation constitutes an "emergency" as that term is defined in Section 31-7-1 of the Mississippi Code Annotated of 1972, as amended, and authorize a contract to make repairs to the sewer line near the intersection of Forest Avenue and Watkins Drive, pursuant to Section 31-7-13 (k) of the Mississippi Code Annotated of 1972, as amended.

As background information to assist in your determination that an emergency exists, I have attached a memorandum from Mary D. Carter, Deputy Director, Water-Sewer Operations. I have also obtained the review and approval of the Office of the City Attorney, the Chief Financial Officer, and the Chief Administrative Officer as evidenced by the signatures below.

III. DECLARATION OF EMERGENCY

I hereby determine that a sewer collapse causing an ongoing sanitary sewer overflow constitutes an emergency as that term is defined under Section 31-7-1 of the Mississippi Code Annotated of 1972, as amended, so that the delay incident to giving opportunity for competitive bidding would be detrimental to the interest of the City of Jackson, Mississippi and its citizens, and that a contract to make repairs to the sanitary sewer line near the intersection of Forest Avenue and Watkins Drive, is authorized pursuant to Section 31-7-13 (k) of the Mississippi Code Annotated of 1972, as amended.

According, this request is approved, effective June 15, 2022.

DEPARTMENT OF PUBLIC WORKS
ENGINEERING DIVISION

MEMORANDUM

To: Mayor Chokwe Antar Lumumba
From: Robert Lee, P.E., City Engineer
CC: Louis Wright, Chief Administrative Officer
Date: January 18, 2023
Subject: Agenda Item for City Council Meeting

Attached you will find an item for the agenda ratifying a contract with Hemphill for emergency sanitary sewer repair work at Forest Ave and Watkins Dr. There are two sewer failures beneath the intersection of Watkins Dr and Forest Ave resulting in sewer overflowing out of a manhole into the street and roadside ditch. Because this condition endangers the health and safety of residents, the City invoked the emergency procurement process pursuant to Section 31-7-13 (k) of state law and reached out to three companies for quotes. The sealed quote of Hemphill in the amount not to exceed \$344,995.00 was the lowest of the three quotes. There was a reduction in the cost of the project of \$5,585.00 once the project was complete, which resulted in a final cost of \$339,410.00. This order also authorizes final payment on the project.

It is the recommendation of Public Works that this agenda item be approved. If you have any questions or comments, please do not hesitate to call me at (601) 960-2091.

In addition to the periodic visits described herein, the ENGINEER will also provide resident project representatives as specified in Section 4.0 of this exhibit. ENGINEER will not be responsible for the techniques and sequences of construction or the safety precautions incident thereto, unless such techniques and sequences are required by law or specified in the bid documents, and failure to perform the construction work in accordance with the Contract Documents. Such approvals of payment will constitute a representation to the OWNER, based on such observations and review, that the work has progressed to the point indicated and that, to

the best of ENGINEER's knowledge, information and belief, the quality of the work is in accordance with the Contract Documents, and any qualifications stated in ENGINEER's review of the Contractor's application for payment.

Background:

On January 18, 2018, the City Council authorized the Mayor to retain Susan Richardson, Esq. and the law firm of Kilpatrick Townsend & Stockton LLP to provide representation to the City of Jackson in negotiating a modification to its Clean Water Act Consent Decree.

The City is in need of Ms. Richardson's continuing assistance in negotiating the Consent Decree modification. Significant progress has been made on negotiations and the Drinking Water Interim Stipulated Order has also presented the City with opportunities to negotiate a unique solution to the City's ongoing issues with SSOs and compliance with the Clean Water Act. The City's Long-Term Financial Plan is under review by the EPA and MDEQ along with the injunctive relief language. The City Attorney has also presented a framework similar in nature to the Drinking Water Interim Stipulated Order that will allow for the City to address sanitary sewer overflows and sewer failures in the collection system. The services that Ms. Richardson continues to provide include telephone conference meetings with the EPA and MDEQ twice each month, preparing the minutes of those meetings, submitting weekly status updates to the EPA and MDEQ, and revisions to injunctive relief language for the modification.

Please let me know if you need any additional information or have any questions.
