# HELP THE HOMELESS.

The City of Jackson is offering organizations throughout the region an unprecedented effort to mitigate and end homelessness. This project will play a vital role in our community reaching “Functional Zero.” “Functional zero is a milestone, which must be sustained, that indicates a community has measurably solved homelessness for a population. In order to reach this goal – we need your help in identifying gaps. Once those gaps are identified we will strategically request assistance from local and regional resources.
