

**LEAD & COPPER RULE MONITORING AND REPORTING VIOLATION
MANDATORY LANGUAGE - TIER III
IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**

CITY OF JOHNSON CITY (PWS 0160001) has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During (52) 3YR2020 and (53) 2021, we did not monitor or test for LCR (lead and copper) and, therefore, cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for these contaminants, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples were [or will be] taken.

Contaminant	Required Sampling Frequency	No. of Samples Taken	When Samples Should Have Been Taken	When Samples Were or Will Be Taken
<i>LCR Sample Tap 3YR2020</i>	<i>10 / Triennially</i>	<i>10 / Rejected Due to Out of Compliance Period</i>	<i>June 1, 2020 – Sept. 30, 2020</i>	<i>Sept. 16, 2021</i>
<i>LCR Water Quality Parameter 2021</i>	<i>2 / 6 months</i>	<i>0</i>	<i>Oct. 1, 2021 – Nov. 30, 2021</i>	<i>Nov. 30, 2021</i>

What is being done?: The City’s Utility Department will utilize Quiddity Engineering (dba Jones & Carter) to guide the Department and ensure monitoring / reporting compliance.

We are working to correct the problem. For more information, please contact:
