

2023 Bare Steel/Cast Iron Replacement Work

KETTERING, OHIO

Scope of work

CenterPoint Energy's multi-year pipeline replacement program is an investment in infrastructure to continue providing reliable natural gas service to our Ohio customers. In 2023 CenterPoint Energy will retire approximately **67 miles** of bare steel/cast iron (BSCI) pipeline in Ohio.

At the completion of the multi-year project CenterPoint Energy plans to replace more than **838 miles** of BSCI pipelines and retire about 150,000 service lines throughout its service territory in Ohio.

Gas mains under streets and sidewalks will be replaced first, followed by service lines running directly to homes and businesses. Upon completion of the work and dependent on weather, affected sidewalks, yards and streets will be restored.

For the safety of our crews and everyone in our community, please use caution when driving through our construction zones.

**Total investment at project completion in the City of Kettering:
Nearly \$52 million**

\$2.6 million

will go toward gas pipeline upgrades in 2023

\$32 million

dedicated to pipeline upgrades since 2008

3.4 miles

of main to be retired in 2023

36.5 miles

of main retired since 2008

244 service lines

to be retired in 2023
