

# Town of Loomis Construction & Demolition Recycling Diversion Plan (Pre-Construction)

Project Address: \_\_\_\_\_

Project Description: \_\_\_\_\_

Town of Loomis Permit Number(s): \_\_\_\_\_

Owner Name & Phone Number: \_\_\_\_\_

### Recycling of Construction and Demolition (C & D) materials is required for the following types of projects:

- All New Construction (residential and non-residential); and
- Residential additions/alterations that increase the building's conditioned area, volume or size; and
- Non-residential building additions greater than 1,000 square feet and/or Non-residential alterations valued at \$200,000 or more.

### How to comply:

1. Decide how construction and demolition materials will be managed: 1) Hauled by Recology Auburn Placer (Recology), the Town's franchise waste hauler, or 2) self-haul.
2. Complete and submit this Construction & Demolition Recycling Diversion Plan form prior to building permit issuance.
3. During demolition and construction, haul debris as specified on this form and collect the required documentation listed in the table below.
4. Upon completion of construction and before final inspection, complete and submit the Construction & Demolition/Waste Management Summary Report form (Post Construction) along with all required documentation.

### Please Choose One:

#### Option 1: Recology

1. Order a bin or roll-off containers from Recology. To reach 65% diversion you will need to separate some materials on-site into multiple bins (e.g., separate bins for concrete, wood, etc.).
2. **Collect all invoices and receipts** from Recology.
3. Submit copies of all invoices and receipts with C & D / Waste Management Summary Report form.

#### Option 2: Self-Haul

1. You must recycle at least 65% of all construction and demolition waste generated.
2. **Collect all weight tags and receipts** from disposal/recycling facilities (see attached list).
3. Submit copies of all weight tags and receipts with the C & D / Waste Management Summary Report form.

**Materials to be discarded:**

- In the table below, estimate the total tons of each material type to be discarded from the project, including all demolition and construction material. Refer to the *Volume to Weight Conversion Estimator* if needed.
- Specify the percentage of each material type that will be salvaged or reused, hauled to a facility for recycling, and hauled to a landfill for disposal. The percentages for each material type must total 100%.
- At least 65% of the materials must be salvaged, reused, or recycled.
- For each material type, list the hauler that will be hauling the materials away from the project site. If you will be self-hauling, list the facility where you will haul the material.

Material Type	Total Tons to be Discarded	% Salvaged or Reused	% Recycled	% Landfill Disposal	Hauler or Facility* Enter hauler name or if self-hauling, enter name of destination facility. <small>*(see attached list of regional facilities)</small>
Asphalt					
Brick, masonry, tile					
Building materials: doors, windows, cabinets, fixtures, etc.					
Cardboard					
Carpet					
Carpet padding					
Ceiling tile					
Concrete, stucco					
Drywall					
Metal scrap (all types)					
Mixed C & D debris					
Soil, dirt, sand					
Wood					
Yard waste					
Garbage					
Other:					

**Please read and initial next to each of the following and sign below:**

\_\_\_\_\_ The information in the table above is correct and complete to the best of my knowledge.

\_\_\_\_\_ I agree to notify all persons involved in the project, including waste haulers, of the recycling requirements for construction and demolition waste.

\_\_\_\_\_ I understand that I am responsible for obtaining copies of all invoices and receipts from all haulers that haul debris from this project. I understand that I am responsible for obtaining copies of all weight tags and receipts from all facilities that receive debris from this project.

\_\_\_\_\_ I understand that once the project is complete, the C & D/Waste Management Summary Report form with weight tags and receipts from receiving facilities must be submitted to the Building Department prior to the final inspection.
