Subject: Phase I Environmental Site Assessment
Mima Capital LLC
Sierra College Boulevard & Bankhead Road
Loomis, California 95650
Partner Project No. 18-209228.1
Client Reference No. 18-000034-01-1

Dear Mr. La Violette:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in general conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (310) 765-7243.

Sincerely,

Jenny Redlin
Relationship Manager

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by First Bank for the property located at Sierra College Boulevard & Bankhead Road in the City of Loomis, Placer County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide First Bank with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the south side of Sierra College Boulevard, the east side of Delmar Avenue and the west side of Bankhead Road within a mixed commercial and residential area of Placer County. Please refer to the table below for further description of the subject property:

Subject Property Data

Address:	Sierra College Boulevard & Bankhead Road, Loomis, California
Historical Addresses:	3994 Bankhead Road, 3995 Delmar Avenue and 3820 Sierra College Boulevard
Property Use:	Vacant
Land Acreage (Ac):	80.18 Ac
Number of Buildings:	None
Assessor's Parcel Number (APN):	030-100-013, 030-100-022, 030-100-024, 030-110-010, 030-110-011, 030-110-013
Current Tenants:	Mr. Ray Miller for limited cattle grazing
Site Assessment Performed By:	Scott Van de Mark of Partner
Site Assessment Conducted On:	February 26, 2018

The subject property is currently vacant/agricultural land that is primarily used as pasture for beef cattle leased by a neighboring property owner, Mr. Ray Miller. Onsite operations consist of cattle grazing at Parcel Nos. 011-100-013, 010-110-010, 030-110-011 and 030-110-013, row crop agriculture and seasonal fruit sales at a fruit stand at Parcel No. 010-100-022. A chicken coop, two storage sheds and a recreational vehicle are located approximately 50 feet south of the seasonal fruit stand and an active domestic water well and water storage tank are located approximately 100 feet southeast of the fruit stand. There is an inactive domestic water well located at Parcel No. 030-100-013 near Sierra College Boulevard and an inactive domestic water well is located near Delmar Avenue at Parcel No. 030-110-011. A small pond is located near Sierra College Boulevard at the northwest extent of Parcel No. 030-100-013. Miscellaneous debris and remnants of former residences and agricultural uses are present in select areas, as discussed in Section 6.0.

According to available historical sources, the subject property was formerly undeveloped as early as 1891; developed for agricultural residential use between circa 1938 and circa 2004; and, developed with a seasonal fruit stand in circa 2004. The residences in the northern and eastern portions were demolished and removed from the property between 2002 and 2004. The former dwellings in the southwestern portion of the property were removed in the 1970s. Tenants on the subject property have included multiple residential tenants (circa 1938-circa 2004); and Ray Miller (circa 2000-Present).

The immediately surrounding properties consist of vacant land to the north across Sierra College Boulevard; five commercial buildings to the south, at the north side of Alvis Court, a beef cattle farm to the south at 3996 Bankhead Road and a single family residence to the south at 3984 Bankhead Road; a single family residence to the east at 3918 Bankhead Road and three single family residences across Bankhead Road; and single family residences to the west across Antelope Creek and across Delmar Avenue.

According to subsurface investigation at a nearby property at 3985 Taylor Road (Case No. T0606100075) and topographic map interpretation, the depth and direction of groundwater in the vicinity of the subject property is inferred to be approximately 3 to 7 feet below ground surface (bgs) and flow toward the west-northwest.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The subject property parcel was historically used for agricultural purposes from circa 1938 to the present. Since the 1970s agricultural operations have consisted of limited cattle grazing (pasture) and limited cultivation of row crops on a small fenced plot of land at Parcel No. 030-100-024. No evidence of pesticide or herbicide mixing areas or bulk storage areas was observed during the site reconnaissance, or during Partner's review of historical aerial photographs. Partner understands the subject property is planned for commercial retail development. Based on the current agricultural use of the subject property, lack of on-site occupants and the intended commercial development, the likely presence of these chemicals is not considered a significant environmental concern. However, should the property be redeveloped for use where sensitive receptors may be present (residential, school, skilled nursing facility, daycare, etc.), additional assessment related to the current and former application of pesticides, herbicides, and/or fertilizers is likely warranted.
- Review of a previous Phase I Environmental Site Assessment report (AEI, 2004) indicated that approximately 13 junked vehicles were previously observed along the east boundary of the north parcel (APN: 030-100-013). AEI indicated that automotive fluids were not visible in any of the engines in the vehicles and no staining of soil underneath or in the vicinity of the vehicles was observed. Based on AEI's observations, the junked vehicles were not considered a significant environmental concern. AEI's interview with a local resident indicated that the former residents of 3944 Bankhead Road conducted minor automotive maintenance at the subject property. No evidence of automotive maintenance at 3944 Bankhead was observed during AEI or Partner's site visit and these former activities were not expected to have a significant impact on the subsurface of the subject property.
- According to Placer County Environmental Health Department (PCEHD) records, a preliminary soil profile was conducted for parcel Nos. 030-100-013, 030-110-010 and 030-110-011 in 1998 to determine if the site was suitable for on-site sewage disposal (septic system) for a major subdivision. The investigation determined that the site was not suitable because of a lack of soil depth and shallow groundwater. A water bacteria test was conducted in Antelope Creek in the vicinity of multiple trailers occupying the subject property at 3995 Delmar Avenue (APN No. 030-010-011) in 1999. A letter from the PCEHD to the property owner, dated July 23, 1999, stated "At least five trailers currently being occupied with no apparent sewage disposal systems." The letter also stated that "large accumulations of mixed solid waste, tires and junk cars in several areas of the property." The letter requested that the residents of the property cease discharging untreated sewage/wastewater to or beneath the ground surface and to remove all solid waste to a permitted landfill. A site inspection of the subject property indicated that there are currently no occupants of the subject property and that the solid waste and junk cars described in the 1999 letter have all been removed from the subject property. During Partner's site assessment, approximately one dozen one-gallon paint cans were observed on the former shed foundation

located near Sierra College Boulevard at the north end of the subject property. The paint cans were observed to be in approximately six feet south of a well casing located in the former shed concrete foundation. No evidence of staining or release was observed in the vicinity of the paint cans. Based on the small quantities observed and absence of staining or evidence of a release, the paint cans do not represent a significant environmental concern at this time.

- A domestic well was identified at a former storage shed concrete foundation located near Sierra College Boulevard at Parcel No. 030-100-013 at the subject property. The well is currently uncovered. According to Mr. Ray Miller and the review of a previous Phase I Environmental Site Investigation report conducted in 2004, an additional domestic well is located within a collapsed storage shed/pump house located near Delmar Avenue at Parcel No. 030-110-011 in the southwest area of the subject property. Due to the collapsed condition of the shed, Partner was unable to confirm the presence of the former well. Water sampling was not conducted to verify water quality as part of this assessment. The presence of domestic wells on the subject property not expected to represent a significant environmental concern at this time.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of Sierra College Boulevard & Bankhead Road in the City of Loomis, Placer County, California (the "subject property"). Any exceptions to, or deletions from, this

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property; however, environmental issues were identified. Based on the conclusions of this assessment, Partner recommends the following:

- If the subject property is to be redeveloped for use where sensitive receptors may be present (residential, school, skilled nursing facility, daycare, etc.), a limited subsurface investigation should be conducted in order to determine the presence or absence of soil contamination due to the historical use of the subject property.
- If no longer in use, the two former domestic wells identified at the subject property should be decommissioned and abandoned in accordance with Placer County Environmental Health Department standards.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at Sierra College Boulevard & Bankhead Road in the City of Loomis, Placer County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential

exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

First Bank engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of First Bank. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted the Terms and Conditions for which this report was completed. A copy of Partner's standard Terms and Conditions can be found at <http://www.partneresi.com/terms-and-conditions.php>.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner was not able to document the historical use of the subject property prior to 1938. The following sources were reviewed during the course of this assessment and found to be limited: aerial photographs were not available prior to 1938; city directories were not available prior to 1970; topographic maps prior to 1891 were not reasonably ascertainable from local agencies; and other historical sources such as fire insurance maps did not provide coverage of the subject property. This data failure is not considered critical and does not change the conclusions of this report, as the 1938 aerial photograph revealed the subject property to be farmland. In addition, the adjacent and surrounding areas are also shown mostly as farmland.

- Partner was unable to determine the property use at 5-year intervals, which constitutes a data gap. Information concerning historical use of the subject property was unavailable from 1894 to 1937, 1939 to 1951, and 1953 to 1965. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources.
- Partner submitted Freedom of Information Act (FOIA) requests to the Placer County Building Department, the Placer County Air Pollution Control District, the Loomis Building Department and the Loomis Fire Protection District for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property. As of this writing, these agencies have not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.
- Partner was not provided access to a recreational vehicle, a storage shed and a seasonal fruit stand located at Parcel No. 030-100-024 at the north end of the subject property near Sierra College Boulevard. Based on the presumed use of the shed, fruit stand and recreational vehicle, this limitation is not expected to alter the findings of this report.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at Sierra College Boulevard & Bankhead Road in Loomis, California is located on the south side of Sierra College Boulevard, the east side of Delmar Avenue and the west side of Bankhead Road. According to the Placer County Assessor and online research, the subject property is legally described as APNs and associated street addresses; 030-100-013 at 3820 Sierra College Boulevard; 030-110-010 with no street address; 030-110-011 at 3995 Delmar Avenue; 030-110-013 at 3944 Bankhead Road; 030-100-022 with no street address and 030-100-024 with no street address and ownership in APNs; 030-110-013 and 030-100-013 is currently vested in John J Guerra Jr. Trust since 2017; 030-110-010 and 030-110-011 is currently vested in Cyril & Lena Barbaccia Trustees since 2004; 030-100-022 is currently vested in Eugene Borman Trust Et Al since 2012; and 030-100-024 is vested in Edwin A Kapilla since 1998.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently vacant/agricultural land that is primarily used as pasture for beef cattle leased by a neighboring property owner, Mr. Ray Miller. Onsite operations consist of cattle grazing at Parcel Nos. 011-100-013, 010-110-010, 030-110-011 and 030-110-013, row crop agriculture and seasonal fruit sales at a fruit stand at Parcel No. 010-100-022. A chicken coop, two storage sheds and a recreational vehicle are located approximately 50 feet south of the seasonal fruit stand and an active domestic water well and water storage tank are located approximately 100 feet southeast of the fruit stand. There is an inactive domestic water well located at Parcel No. 030-100-013 near Sierra College Boulevard and an inactive domestic water well is located near Delmar Avenue at Parcel No. 030-110-011. A small pond is located near Sierra College Boulevard at the northwest extent of Parcel No. 030-100-013. Miscellaneous debris and remnants of former residences and agricultural uses are present in select areas, as discussed in Section 6.0.

The subject property is designated for residential development by the City of Loomis.

The subject property was not identified in the regulatory database report of Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and residential area of Placer County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: North Sierra Boulevard beyond which is vacant land

South: A parcel of undeveloped land and Fastenal and Safari Morning Cafenation (4011 Alvis Court). Placer Door & Trim and Industrial Tests Inc. (4021 Alvis Court), commercial building (4031 Alvis Court), Titan American Manufacturing (4041 Alvis Court), Bimbino Bakeries USA, Lorgren &

Immediately Surrounding Properties

Associates, Schott Solar Inc. (4051 Alvis Court), City of Rocklin storage yard (4071 Alvis Court), a single family residence (3992 Bankhead Road) and a cattle farm and single family residence (3996 Bankhead Road)

East: Single family residences at 3918 and 3984 Bankhead Road and beyond Bankhead Road is single family residences (3907, 3941 and 3969 Bankhead Road)

West: Antelope Creek beyond with is single family residences at 3803 to 3909 Delmar Avenue and beyond Delmar Avenue is single family residences (3998 and 3944 Delmar Avenue)

The adjacent property to the south at 3996 Bankhead Road was identified as a Hazardous Waste Manifest (HAZNET), and Placer County Master List of Facilities (CA Placer County MS) site and the adjacent properties to the south at 4031, 4041 and 4051 Alvis Court are identified as CA Placer County MS sites in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Rocklin, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 320 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the west-northwest. The subject property is depicted on the 2015 map as undeveloped with some wooded areas and Antelope Creek is depicted along the west boundary of the subject property.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater in the vicinity of the subject property is inferred to flow toward the west-northwest. The nearest surface water in the vicinity of the subject property is the Antelope Creek which is located along the west boundary of the subject property. A small pond is located near Sierra College Boulevard at the northwest extent of Parcel No. 030-100-013.

According to available information, a public water system operated by the Placer County Water Agency PCWA serves the subject property vicinity. According to the PCWA website, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Loomis are surface water from the Yuba and Bear River Watersheds. There is an inactive domestic well located at Parcel No. 030-100-013 near Sierra College Boulevard and an inactive domestic well is located near Delmar Avenue at Parcel No. 030-110-011. An active agricultural well is located at Parcel 030-100-024 near the north boundary of the subject property.

According to a previous subsurface investigation conducted on a nearby property (3985 Taylor Road and Case #T0606100075), the depth of groundwater in the vicinity of the subject property is inferred to be approximately 3 to 7 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is situated within the Great Valley physiographic province of the State of California. The geology of the vicinity of the subject property is characterized by extensive granitic bedrock overlain by younger volcanic and sedimentary units and Quaternary alluvial terrace deposits.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as primarily the Andregg coarse sandy loam which consists of a well-drained coarse sandy loam to a depth of between 29 and 33 inches bgs and is underlain by weathered bedrock. Slopes range from the 2 to 9 percent. The soils in the vicinity of Antelope Creek at the west side of the subject property is mapped as Xerofluvents, frequently flooded. The Xerofluvents consists of a poorly-drained stratified loamy sand to fine sandy loam to a silt loam to a depth of 37 inches bgs. Slopes range from 0 to 2 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Numbers 06061C0414F (west half of subject property) and 06061C0418F (east half of subject property, dated June 8, 1998, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains except for the areas adjacent to Antelope Creek at the west side of the subject property which appear to be located within the 500-year flood plain.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	Source	Description/Use
1891-1893	Topographic Maps	Undeveloped/Native land
1938-2004	Aerial Photographs, Topographic Maps, City Directories, Previous Report	Agricultural and Residential
1970-Present	Aerial Photographs, Building Records, City Directories, Interviews, Onsite Observations, Sanborn Maps	Vacant and Agricultural (Ray Miller 2000-Present)

Tenants on the subject property include multiple residential tenants (circa 1938-circa 2004); and Ray Miller farmer (2000-Present).

The subject property parcel was historically used for agricultural purposes from circa 1938 to the present. Since the 1970s agricultural operations have consisted of limited cattle grazing (pasture) and limited cultivation of row crops on a small fenced plot of land at Parcel No. 030-100-024. No evidence of pesticide or herbicide mixing areas or bulk storage areas was observed during the site reconnaissance, or during Partner's review of historical aerial photographs. Partner understands the subject property is planned for commercial retail development. Based on the current agricultural use of the subject property, lack of on-site occupants and the intended commercial development, the likely presence of these chemicals is not considered a significant environmental concern. However, should the property be redeveloped for use where sensitive receptors may be present (residential, school, skilled nursing facility, daycare, etc.), additional assessment related to the current and former application of pesticides, herbicides, and/or fertilizers is likely warranted.

No other potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on February 26, 2018. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date:	1938	Scale:	1"=500'
Subject Property:	Agricultural land with a wooded area at the west boundary of the subject property along Antelope Creek. A small structure appears to be located near the north boundary of the subject property in Parcel No. 030-100-013. A small structure appears to be located within a landscaped area near Delmar Avenue in the southwest corner of the subject property in Parcel No. 030-110-011. An orchard or vineyard appears to occupy the south half of Parcel No. 030-110-011. A gravel appears to connect the structure to Delmar Avenue. A small structure appears to be located near Bankhead Road at the east side of the subject property in Parcel		

Date: 1938		Scale: 1"=500'
North:	No. 030-110-013 with a gravel road between the structure and Bankhead Road.	
South:	Agricultural land	
East:	Appears to be a wooded area across Bankhead Road with two small structures located south of the wooded area. Parcel of land at 3918 Bankhead Road near northeast corner of Parcel No. 030-110-013 appears to be agricultural land,	
West:	Appears to be a wooded area followed by agricultural land (orchard or vineyard) across Antelope Creek and appears to be developed with three small structures across Delmar Avenue	

Date: 1952		Scale: 1"=500'
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	Appears to be developed as an orchard northeast of subject property across Bankhead Road with a wooded area of orchard and two small structures south of wooded area	
West:	No significant changes visible except a rectangular structure appears to be located west of southwest corner of subject property across Delmar Avenue.	

Date: 1966		Scale: 1"=500'
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible except parcel at 3918 Bankhead Road appears to be developed with current residential building	
West:	Appears to be developed with four small structures across Antelope Creek at east side of Delmar Avenue and developed with a rectangular structure west of southwest corner of subject across Delmar Avenue	

Date: 1975		Scale: 1"=500'
Subject Property:	No significant changes visible except a larger structure appears to have been constructed southeast of the small structure at the north boundary of the subject property in Parcel No. 030-100-013. An additional structure is visible at the southwest portion of the property. A gravel road appears to connect the larger structure to North Sierra Boulevard.	
North:	Undeveloped across Sierra College Boulevard	
South:	No significant changes visible	
East:	No significant changes visible	
West:	No significant changes visible	

Date: 1984		Scale: 1"=500'
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	

Date:	1984	Scale:	1"=500'
East:	No significant changes visible		
West:	No significant changes visible		
Date:	1993	Scale:	1"=500'
Subject Property:	No significant changes visible		
North:	No significant changes visible		
South:	The land south of Parcel No. 030-110-011 appears to have been cleared, graded and prepared for development. No significant changes to parcel south of Parcel No. 030-110-013		
East:	No significant changes visible		
West:	No significant changes visible		
Date:	1999	Scale:	1"=500'
Subject Property:	No significant changes visible		
North:	No significant changes visible		
South:	Developed with two current commercial buildings at 4031 and 4041 Alvis Court and current residential building and farm south of Parcel No. 030-110-013		
East:	No significant changes visible		
West:	No significant changes visible		
Date:	2005, 2010, 2014	Scale:	1"=500'
Subject Property:	Appears to be agricultural land and it appears all former structures appear to have been demolished at the subject property before 2005. The concrete foundation at north end of subject property near Sierra College Boulevard is visible. The current seasonal fruit stand is visible near Sierra College Boulevard in Parcel No. 030-100-022.		
North:	No significant changes visible		
South:	Appears to be developed with current commercial buildings and City of Rocklin storage yard at north side of Alvis Court and with current cattle farm and current residential buildings along Bankhead Road		
East:	Appears to be developed with current residential buildings across Bankhead Road and at 3918 Bankhead Road		

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from Environmental Data Resources (EDR) on February 26, 2018. Sanborn map coverage was not available for the subject property.

3.3 City Directories

Partner reviewed historical city directories obtained from Environmental Data Resources (EDR) on February 26, 2018 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for Sierra College Boulevard & Bankhead Road, 3995 Delmar Avenue, 3820 Sierra College Boulevard and 3944 Bankhead Road (Subject Property)

Year(s)	Occupant Listed
1974	Residence (3944 Bankhead Road)
1980	Residence (3944 Bankhead Road)
1985	Residence (3944 Bankhead Road)
1985	XXXX (3820 Sierra College Boulevard)
1985	Residence (3995 Delmar Avenue)
1995	Residence (3944 Bankhead Road)
2000	Residence (3944 Bankhead Road)
2005	Residence (3820 Sierra College Boulevard)
2010	Residence (3820 Sierra College Boulevard)
2010	Residence (3944 Bankhead Road)
2014	Residence (3944 Bankhead Road)

* XXXX= A phone number is present but is not registered to a tenant or is disconnected.

Based on the city directory review, no environmentally sensitive listings were identified for the subject property addresses.

City Directory Search for Adjacent Properties

Year(s)	Occupant Listed
1974	Residences (3803, 3815, 3845, 3867, 3909 and 3988 Delmar Avenue)
1974	Residences (3907, 3941, 3969 and 3992 Bankhead Road)
1980	Residences (3803, 3845, 3867 and 3909 Delmar Avenue)
1980	Residences (3907, 3918, 3941, 3969 and 3996 Bankhead Road)
1985	Residences (3803, 3845, 3867 and 3909 Delmar Avenue)
1985	Residences (3907, 3918, 3941, 3969 and 3996 Bankhead Road)

2010	Raw Lawn & Gardens (3984 Bankhead Road)

City Directory Search for Adjacent Properties

Year(s)	Occupant Listed
2010	Raymond L Miller Equipment Rental (3996 Bankhead Road)
2014	Residences (3803, 3815, 3827, 3845, 3867 3909, 3988 and 3994 Delmar Avenue)
2014	Residences (3907, 3941, 3969, 3984, 3992 and 3996 Bankhead Road)
2014	Raw Lawn & Gardens (3984 Bankhead Road)
2014	Raymond L Miller Equipment Rental (3996 Bankhead Road)

Based on the city directory review, no environmentally sensitive listings were identified for the adjacent property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from Environmental Data Resources (EDR) on February 26, 2018. The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date: 1891,
1892,
1893

Subject Property: Undeveloped grassland
North: Undeveloped grassland
South: Undeveloped grassland followed by railroad
East: Undeveloped grassland followed by railroad
West: Undeveloped grassland across Antelope Creek

Date: 1944,
1947

Subject Property: Undeveloped grassland except for a small structure near Delmar Avenue in southwest area of subject property and a small structure near Bankhead Road at east side of subject property
North: No significant changes depicted
South: Developed with a small structure along Bankhead Road
East: Developed with three small structures across Bankhead Road
West: Undeveloped across Antelope Creek and developed with two small structures across Delmar Avenue

Date: 1954

Subject Property: Appears to be developed with an orchard and a small structure in southwest corner of subject property along Delmar Avenue and developed with row crops and a small structure along Bankhead Road at east side of subject property. Remainder of subject property appears to be undeveloped land
North: No significant changes depicted
South: Appears to be undeveloped land south of west half of subject property and

Date: 1954

East: developed with row crops south of east half of subject property and with two small structures along Bankhead Road
West: Developed with four small structures across Bankhead Road
Developed with three small structures across Antelope Creek and with one small structure across Delmar Avenue

Date: 1967,
1981

Subject Property: Developed with an unimproved roadway and small structure near Delmar Avenue at southwest corner of subject property and with a small structure along Sierra College Boulevard in northwest area of subject property and with a small structure along Bankhead Road at east side of subject property
North: Undeveloped across Sierra College Boulevard
South: Developed with three small structures along Bankhead Road
East: Developed with four small structures across Bankhead Road
West: Developed with nine small structures across Antelope Creek and four small structures across Delmar Avenue

Date: 2012

Subject Property: No site-specific features depicted
North: No site-specific features depicted across Sierra College Boulevard
South: No site-specific features depicted
East: No site-specific features depicted across Bankhead Road
West: No site-specific features depicted across Antelope Creek and Delmar Avenue

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data

Name of Agency:	California Environmental Protection Agency (CalEPA)
Point of Contact:	NA
Agency Address:	1001 I Street, Sacramento, California
Agency Phone Number:	(916) 323-2514
Date of Contact:	February 25, 2017
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the CalEPA.

A copy of pertinent documents is included in Appendix B of this report.

4.1.2 Health Department

Regulatory Agency Data

Name of Agency:	Placer County Environmental Health Department (PCEHD)
Point of Contact:	Jeannette Peacock
Agency Address:	3091 County Center Drive, Auburn, California
Agency Phone Number:	(530) 745-2300
Date of Contact:	February 26, 2018
Method of Communication:	Email and Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the PCEHD. The PCEHD maintains historical records regarding wells and septic systems for the subject property which are discussed below. According to PCEHD records, a preliminary soil profile was conducted for parcel nos. 030-100-013, 030-110-010 and 030-110-011 in 1998 to determine if the site was suitable for on-site sewage disposal (septic system) for a major subdivision. The investigation determined that the site was not suitable because of a lack of soil depth and shallow groundwater. The investigation included a narrative report stating that there were three structures on the subject property in 1998 and a site drawing indicated that the structures appeared to be single family residences that were associated with historic information indicating three residences at 3944 Bankhead Road, 3995 Delmar Avenue and 3820 Sierra College Boulevard. According to PCEHD records, a water bacteria test was conducted in Antelope Creek in the vicinity of multiple trailers occupying the subject property at 3995 Delmar Avenue (APN No. 030-010-011) in 1999. A letter from the PCEHD to the property owner, dated July 23, 1999, stated "At least five trailers currently

Regulatory Agency Data

being occupied with no apparent sewage disposal systems." The letter also stated that "large accumulations of mixed solid waste, tires and junk cars in several areas of the property." The letter requested that the residents of the property cease discharging untreated sewage/wastewater to or beneath the ground surface and to remove all solid waste to a permitted landfill. A site inspection of the subject property indicated that there are currently no occupants of the subject property and that the solid waste and junk cars described in the 1999 letter have all been removed from the subject property. According to PCEHD records a Well Certificate was issued for a 725-foot deep domestic well at the north end of the property at Parcel No. 030-100-024, that was installed on April 5, 2001. The well is currently in use and is located approximately 225 west of Bankhead Road and 30 feet north of the south property line of Parcel No. 030-100-024.

A copy of pertinent documents is included in Appendix B of this report.

4.1.3 Fire Department

Regulatory Agency Data

Name of Agency:	Loomis Fire Protection District (LFPD)
Point of Contact:	NA
Agency Address:	5840 Horseshoe Bar Road, Loomis, California
Agency Phone Number:	(916) 652-6858
Date of Contact:	February 26, 2018
Method of Communication:	Telephone
Summary of Communication:	As of the date of this report, Partner has not received a response from the LFPD for inclusion in this report.

A copy of pertinent documents is not included in Appendix B of this report.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data

Name of Agency:	Placer County Air Pollution Control District (PCAPCD)
Point of Contact:	N/A
Agency Address:	110 Maple Street, Auburn California
Agency Phone Number:	(530) 7454-2330
Date of Contact:	February 25, 2018
Method of Communication:	Online
Summary of Communication:	As of the date of this report, Partner has not received a response from the PCAPCD for inclusion in this report.

A copy of pertinent documents is included in Appendix B of this report.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data

Name of Agency:	California State Water Resource Control Board (WRCB) GeoTracker
Point of Contact:	NA
Agency Address:	1001 I Street, Sacramento, California
Agency Phone Number:	(916) 341-5250
Date of Contact:	February 25, 2018
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the WRCB GeoTracker online database.

A copy of pertinent documents is included in Appendix B of this report.

4.1.6 Department of Toxic Substances Control

Regulatory Agency Data

Name of Agency:	California Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS) & EnviroStor
Point of Contact:	N/A
Agency Address:	880 Cal Center Drive, Sacramento, California
Agency Phone Number:	(916) 255-3545
Date of Contact:	February 25, 2018
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the DTSC HWTS and Envirostor online database.

A copy of pertinent documents is not included in Appendix B of this report.

4.1.7 Building Department

Regulatory Agency Data

Name of Agency:	Placer County Building Services Department (PCBSD) and Loomis Building Department (LBD)
Point of Contact:	Representative
Agency Address:	3091 County Center Drive, Auburn, California
Agency Phone Number:	(530) 745-3000
Date of Contact:	February 25, 2018
Method of Communication:	Email
Summary of Communication:	As of the date of this report, Partner has not received a response from the PCBSD and the LBD for inclusion in this report.

A copy of pertinent documents is included in Appendix B of this report.

4.1.8 Planning Department

Regulatory Agency Data

Name of Agency:	Loomis Planning Department (LPD)
Point of Contact:	NA
Agency Address:	3665 Taylor Road, Loomis, California
Agency Phone Number:	(916) 652-1840
Date of Contact:	February 25, 2018
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the three parcels located at the west side of the subject property, APN Nos. 030-100-013, 03-110-011 and 030-110-010 are zoned RA, Residential Agricultural development and the three parcels located at the west side of the subject property are zoned RE, Residential Estate development by the City of Loomis.

A copy of pertinent documents is included in Appendix B of this report.

4.1.9 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact:	N/A
Agency Address:	801 K Street, Sacramento, California
Agency Phone Number:	(916) 445-9686
Date of Contact:	February 25, 2018
Method of Communication:	Online
Summary of Communication:	According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

A copy of pertinent documents is included in Appendix B of this report.

4.1.10 Assessor's Office

Regulatory Agency Data

Name of Agency:	Placer Assessor's Office (PAO)
Point of Contact:	N/A
Agency Address:	2980 Richards Drive, Auburn, California
Agency Phone Number:	(530) 889-4300
Date of Contact:	February 25, 2018
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by is legally described as APNs and associated street addresses; 030-100-013 (17.0 acres) at 3820 Sierra College Boulevard; 030-110-010 (10.0 acres) with no street address; 030-110-011 (26.6 acres) at 3995 Delmar Avenue; 030-110-013 (18.9 acres) at 3944 Bankhead Road; 030-100-022 (6.0 acres) with no street address and 030-100-024 (1.1 acres) with no street address. Ownership in APNs; 030-110-013 and

Regulatory Agency Data

030-100-013 is currently vested in John J Guerra Jr. Trust since 2017; 030-110-010 and 030-110-011 is currently vested in Cyril & Lena Barbaccia Trustees since 2004; 030-100-022 is currently vested in Eugene Borman Trust Et Al since 2012; and 030-100-024 is vested in Edwin A Kapilla since 1998. There are currently no structures on the subject property except for a small chicken coop, two small storage sheds and a seasonal fruit stand which are all located at Parcel 030-100-022 near Sierra College Boulevard at the north end of the subject property.

A copy of pertinent documents is included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	N	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N/A	N/A
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	N	N

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	N	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N

EDR US Hist Cleaners	Varies	N	N	N

4.2.2 Subject Property Listings

The subject property is not identified in the regulatory database report.

4.2.3 Adjacent Property Listings

The adjacent property to the south at 3996 Bankhead Road was identified as a HAZNET, and CA Placer County MS site and the adjacent properties to the south at 4031, 4041 and 4051 Alvis Court are identified as CA Placer County MS sites in the regulatory database report, as discussed below:

- The property, identified as Miller Equipment at 3996 Bankhead Road, is located adjacent to the south of the subject property. According to details provided in the HAZNET database, the site generated 0.6 tons of unspecified oil-containing waste in 2004 and 1.9 tons of other organic solids in 2010. According to details provided in the Placer County MS database, the site was classified as a Conditionally Exempt Small Quantity Generator and the facility status is listed as Closed. No violations were identified for the site. Based on the current regulatory status, this site is not expected to represent a significant environmental concern.
- The property, identified as Monix Corporation at 4031 Alvis Court, is located adjacent to the south of the subject property. According to details provided in the Placer County MS database, the site was listed as a Hazmat Business Plan program site and the facility status is listed as Closed. The Placer County MS does not track violators and the presence of a facility on the Placer County MS database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the Placer County MS database is not, in itself, considered to represent an environmental concern.
- The property, identified as Titan America Manufacturing at 4041 Alvis Court, is located adjacent to the south of the subject property. According to details provided in the Placer County MS database, the site was listed as a Hazmat Business Plan and Small Quantity Generator program site and the facility status is listed as Active. The Placer County MS does not track violators and the presence of a facility on the Placer County MS database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the Placer County MS database is not, in itself, considered to represent an environmental concern.

- The property, identified as General Pool & Spa Supply at 4051 Alvis Court, is located adjacent to the south of the subject property. According to details provided in the Placer County MS database, the site was listed as a Hazmat Business Plan program site and the facility status is listed as Closed. The presence of the property on the Placer County MS database is not, in itself, considered to represent an environmental concern.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

4.2.5 Orphan Listings

Two orphan listings are identified in the regulatory database report and are not considered a significant environmental concern.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from First Bank (User of this report).

User Responsibilities				
Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
Environmental Pre-Survey Questionnaire		X		
Title Records, Environmental Liens, and AULs		X		
Specialized Knowledge		X		
Actual Knowledge		X		
Valuation Reduction for Environmental Issues		X		
Identification of Key Site Manager	Section 5.1.3	X		
Reason for Performing Phase I ESA	Section 1.1			
Prior Environmental Reports	Section 5.2.6		X	
Other				X

5.1 Interviews

5.1.1 Interview with Owner

The owners of the subject property were not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a lender, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Mr. Ray Miller, tenant at the subject property, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

The subject property is currently undeveloped agricultural land that is primarily used as pasture for beef cattle leased by a neighboring property owner, Mr. Ray Miller. Mr. Miller accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property. According to Miller, a domestic well is located within a collapsed former shed located in the southwest area of the property near Delmar Avenue in the southwest area of the subject property. Two empty steel water tanks are located on open ground in the south west area of the subject property. The empty steel water tanks are the property of Mr. Ray Miller, tenant of the subject property. Mr. Miller informed Partner that he placed the empty tanks there a few years ago.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Executive Summary of: *Phase I Environmental Site Assessment Assessor's Parcel Numbers 030-100-013, 030-110-010, 030-110-011 and 030-110-013, Loomis, California 95650, AEI Consultants (November 10, 2004)*

AEI Consultants (AEI) prepared this report on behalf of United Commercial Bank. The assessment was performed in general accordance with ASTM Standard. The assessment consisted of a site reconnaissance, interviews with knowledgeable personnel, review of historical information, and a review of federal, state and local regulatory databases. The assessment was performed on four of the six parcels of land that are included the subject property. Pertinent information contained in this report is summarized below:

- At the time of the 2004 assessment, the subject property was unoccupied.
- According to the AEI report, the subject property formerly occupied by three residential dwellings. The dwellings located at the north end of the property (3944 Bankhead Road) and the east side of the property (3820 Sierra College Boulevard) were demolished between 2002 and 2004 and the dwelling at the southwest corner of the property (3995 Delmar Avenue) was presumably demolished in the 1970s. A review of historical sources indicated that the property was used for agricultural purposes from at least the 1950s to the 1970s.
- The report did not identify any recognized environmental conditions or historical recognized environmental conditions.

The report identified the following environmental conditions were identified at the site:

- Approximately 13 junked vehicles were observed along the east boundary of the north parcel (APN: 030-100-013). Automotive fluids were not visible in any of the engines in the vehicles and no staining of soil underneath or in the vicinity of the vehicles was observed. Based on their observations, the junked vehicles were not considered a significant environmental concern.

- According to a local resident, the former residents of 3944 Bankhead Road conducted minor automotive maintenance at the site. No evidence of automotive maintenance at 3944 Bankhead was observed and these former activities was not expected to have a significant impact on the subsurface of the subject property.
- A former irrigation well was observed in the northern section of the property near Sierra College Boulevard. The well appeared to be 5 inches in diameter and extend approximately 15 feet bgs. The well was observed to be dry at the time of the inspection. Fifteen one-gallon containers were observed in the vicinity of the well. The report recommended that the well be properly decommissioned and that the paint containers be properly recycled or disposed of.
- A review of historical photographs indicated that the subject property was used for agricultural purposes from at least the 1950s until the 1970s and that there is a potential that pesticides herbicides and fertilizers were used onsite. Based on the length of time since agricultural operations occurred on the site, the report did not consider those former operations a significant environmental concern.

AEI identified no RECs and recommended no further investigation.

Copies of pertinent pages reviewed are included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was overcast. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Scott Van de Mark
Site Assessment Conducted On: February 26, 2018

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for Sierra College Boulevard & Bankhead Road (Subject Property)

Name	Title/Role	Contact Number	Site Walk* Yes/No
Ray Miller	Tenant	(916) 425-2111	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No significant environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

No solid waste is generated at the subject property. A small quantity of scattered domestic trash and debris was observed in the vicinity of the foundation of the former residence at 3820 Sierra College Boulevard. In addition, several discarded tires were observed at various locations across the property. A small pile of debris was also observed in the vicinity of the storage sheds at the south boundary of Parcel No. 030-100-024. The presence of the small quantity of debris and old tires at the subject property is not considered a significant environmental concern.

6.1.2 Sewage Discharge and Disposal

There are no connections to the sanitary sewer system at the subject property.

6.1.3 Surface Water Drainage

There are no storm drains located at the subject property and there are no paved areas at the subject property. Storm water naturally percolates through onsite soils and through overland flow to low lying areas and to Antelope Creek at the west boundary of the subject property.

A small pond is located within a wooded area near Sierra College Boulevard at the northwest area of Parcel No. 030-100-013.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

There are no structures at the subject property that are equipped with any heating or cooling systems.

6.1.5 Wells and Cisterns

A domestic well was observed within a concrete foundation of a former small shed at the north end of Parcel No. 030-100-013 near Sierra College Boulevard. Based on visual observation, the well was observed to contain water at an approximate depth of 10 to 15 bgs. The five-inch diameter PVC well casing was uncovered at the time of the site inspection. The top of the well casing was observed to be approximately six inches above the foundation surface.

According to Mr. Ray Miller, tenant at the subject property, a second domestic well is located within a collapsed former shed located in the southwest area of the property near Delmar Avenue in the southwest area of the subject property. It is presumed that the domestic well was used for the former residence at 3995 Delmar Avenue. Due to the collapsed condition of the shed, Partner was unable to confirm the presence of the former well.

A domestic well is located within Parcel No. 030-100-024 near the intersection of Sierra College Boulevard and Bankhead Road. A Well Certificate was issued for the 725-foot deep domestic well at the north end of the property at Parcel No. 030-100-024, that was installed on April 5, 2001. The well is currently in use and is located approximately 225 feet west of Bankhead Road and 30 feet north of the south property line of Parcel No. 030-100-024. A water storage tank is located adjacent to the well and the water is presumably used for irrigation and for domestic use at the seasonal fruit stand located along Sierra College Boulevard.

Water sampling was not conducted to verify water quality as part of this assessment. The presence of domestic wells on the subject property not expected to represent a significant environmental concern at this time.

6.1.6 Wastewater

Domestic wastewater is not currently generated at the subject property.

6.1.7 Septic Systems

There is a potential that there are former septic systems located at the three former residences located at 3944 Bankhead Road, 3995 Delmar Avenue and 3820 Sierra College Boulevard, however, no evidence of septic systems was observed during the site inspection and the Placer County Environmental Health Department has no records associated with any septic systems at the subject property.

6.1.8 Additional Site Observations

Two empty steel water tanks are located on open ground in the south west area of the subject property. The empty steel water tanks are the property of Mr. Ray Miller, tenant of the subject property. Mr. Miller informed Partner that he placed the empty tanks there a few years ago. The presence of the empty water tanks is not considered a significant environmental concern.

A small fenced plot of land near Sierra College Boulevard at the north side of the subject property is currently cultivated for row crops at Parcel No. 030-100-022. A seasonal fruit stand is also located at Parcel No. 030-100-022 near the north boundary of subject property along Sierra College Boulevard. A chicken coop, two storage sheds and a recreational vehicle are located approximately 50 feet south of the seasonal fruit stand. Partner was not provided access to the recreational vehicle and the interior of the fruit stand. These limitations are not expected to alter the findings of this report.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

Partner identified hazardous substances used, stored, and/or generated on the subject property as noted in the following table:

Hazardous Substances and/or Petroleum Products Noted Onsite				
Substance	Container Size	Location	Nature of Use	Disposal Method
Propane	20-pound cylinder	Storage room at rear of fruit stand	Fuel for barbecue	N/A
Paints	12 1-gallon cans	On foundation of former shed	Abandoned	N/A

Approximately one dozen one-gallon paint cans were observed on the former shed foundation located near Sierra College Boulevard at the north end of the subject property. The paint cans were observed to be in approximately six feet south of a well casing located in the former shed concrete foundation. No evidence of staining or release was observed in the vicinity of the paint cans. Based on the small quantities observed and absence of staining or evidence of a release, the paint cans do not represent a significant environmental concern at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers were observed during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

A small pond was observed at the northwest area of Parcel No. 030-100-013 near Sierra College Boulevard. The pond was observed to be free of debris and no staining or stressed vegetation was observed in the vicinity.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

There are two small wooden storage sheds, a small wooden chicken coop and a wooden seasonal fruit stand. Based on the nature of construction and use of these structures, it is not likely that any ACMs are present in any of these structures.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as

"Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property buildings (chicken coop, storage sheds and fruit stand), it is unlikely that LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

The subject property is not connected to the municipal water system. A domestic well is in use at Parcel No. 030-100-024 in the northeast area of the subject property. Analytical data for the domestic well at the subject property was not provided to Partner. Refer to Section 6.1.5 for further discussion of water wells. Water sampling was not conducted to verify water quality as part of this assessment. The presence of domestic wells on the subject property not expected to represent a significant environmental concern at this time.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building/buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment of the four small wooden structures at the subject property.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

6.4.1 PCBs

Two pole-mounted transformers were observed on the adjacent properties. No staining or leakage was observed in the vicinity of the transformers. Based on these observations, the presence of adjacent transformers is not expected to represent a significant environmental concern.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The subject property parcel was historically used for agricultural purposes from circa 1938 to the present. Since the 1970s agricultural operations have consisted of limited cattle grazing (pasture) and limited cultivation of row crops on a small fenced plot of land at Parcel No. 030-100-024. No evidence of pesticide or herbicide mixing areas or bulk storage areas was observed during the site reconnaissance, or during Partner's review of historical aerial photographs. Partner understands the subject property is planned for commercial retail development. Based on the current agricultural use of the subject property, lack of on-site occupants and the intended commercial development, the likely presence of these chemicals is not considered a significant environmental concern. However, should the property be redeveloped for use where sensitive receptors may be present (residential, school, skilled nursing facility, daycare, etc.), additional assessment related to the current and former application of pesticides, herbicides, and/or fertilizers is likely warranted.

- Review of a previous Phase I Environmental Site Assessment report (AEI, 2004) indicated that approximately 13 junked vehicles were previously observed along the east boundary of the north parcel (APN: 030-100-013). AEI indicated that automotive fluids were not visible in any of the engines in the vehicles and no staining of soil underneath or in the vicinity of the vehicles was observed. Based on AEI's observations, the junked vehicles were not considered a significant environmental concern. AEI's interview with a local resident indicated that the former residents of 3944 Bankhead Road conducted minor automotive maintenance at the subject property. No evidence of automotive maintenance at 3944 Bankhead was observed during AEI or Partner's site visit and these former activities were not expected to have a significant impact on the subsurface of the subject property.
- According to Placer County Environmental Health Department (PCEHD) records, a preliminary soil profile was conducted for parcel Nos. 030-100-013, 030-110-010 and 030-110-011 in 1998 to determine if the site was suitable for on-site sewage disposal (septic system) for a major subdivision. The investigation determined that the site was not suitable because of a lack of soil depth and shallow groundwater. A water bacteria test was conducted in Antelope Creek in the vicinity of multiple trailers occupying the subject property at 3995 Delmar Avenue (APN No. 030-010-011) in 1999. A letter from the PCEHD to the property owner, dated July 23, 1999, stated "At least five trailers currently being occupied with no apparent sewage disposal systems." The letter also stated that "large accumulations of mixed solid waste, tires and junk cars in several areas of the property." The letter requested that the residents of the property cease discharging untreated sewage/wastewater to or beneath the ground surface and to remove all solid waste to a permitted landfill. A site inspection of the subject property indicated that there are currently no occupants of the subject property and that the solid waste and junk cars described in the 1999 letter have all been removed from the subject property. During Partner's site assessment, approximately one dozen one-gallon paint cans were observed on the former shed foundation located near Sierra College Boulevard at the north end of the subject property. The paint cans were observed to be in approximately six feet south of a well casing located in the former shed concrete foundation. No evidence of staining or release was observed in the vicinity of the paint cans. Based on the small quantities observed and absence of staining or evidence of a release, the paint cans do not represent a significant environmental concern at this time.
- A domestic well was identified at a former storage shed concrete foundation located near Sierra College Boulevard at Parcel No. 030-100-013 at the subject property. The well is currently uncovered. According to Mr. Ray Miller and the review of a previous Phase I Environmental Site Investigation report conducted in 2004, an additional domestic well is located within a collapsed storage shed/pump house located near Delmar Avenue at Parcel No. 030-110-011 in the southwest area of the subject property. Due to the collapsed condition of the shed, Partner was unable to confirm the presence of the former well. Water sampling was not conducted to verify water quality as part of this assessment. The presence of domestic wells on the subject property not expected to represent a significant environmental concern at this time.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of Sierra College Boulevard & Bankhead Road in the City of Loomis, Placer County, California (the "subject property"). Any exceptions to, or deletions from, this

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property; however, environmental issues were identified. Based on the conclusions of this assessment, Partner recommends the following:

- If the subject property is to be redeveloped for use where sensitive receptors may be present (residential, school, skilled nursing facility, daycare, etc.), a limited subsurface investigation should be conducted in order to determine the presence or absence of soil contamination due to the historical use of the subject property.
- If no longer in use, the two former domestic wells identified at the subject property should be decommissioned and abandoned in accordance with Placer County Environmental Health Department standards.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at Sierra College Boulevard & Bankhead Road in the City of Loomis, Placer County, California in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Torrance, CA 90501-0000
Contact: Kelsey Edson

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 98B5-4B3D-9917

PO # NA

Project 18-209228.1

UNMAPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 98B5-4B3D-9917

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America
- ☒ EDR Private Collection

Limited Permission To Make Copies

Partner Engineering and Science, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Water Quality Consumer Confidence Report

For samples collected during 2016 in the Auburn/Bowman Water System

Placer County Water Agency is pleased to report this year - as we have each and every year since 1991 - that the drinking water supplied to you meets or exceeds state and federal public health standards for drinking water quality and safety. California water retailers, including PCWA, are required by law to inform customers about the quality of their drinking water. The results of PCWA's testing and monitoring programs of 2016 are reported in this newsletter. If you have any questions about this report, please contact the PCWA Customer Services Center at (530) 823-4850 or (800) 464-0030.

Ensuring The Safety of Your Drinking Water

In order to ensure that tap water is safe to drink, the U.S. Environmental Protection Agency (USEPA) and the State Water Resources Control Board (State Board) prescribe regulations which limit the amount of certain contaminants in water provided by public water systems. State Board regulations also establish limits for contaminants in bottled water that must provide the same protection for public health.

About Your Drinking Water

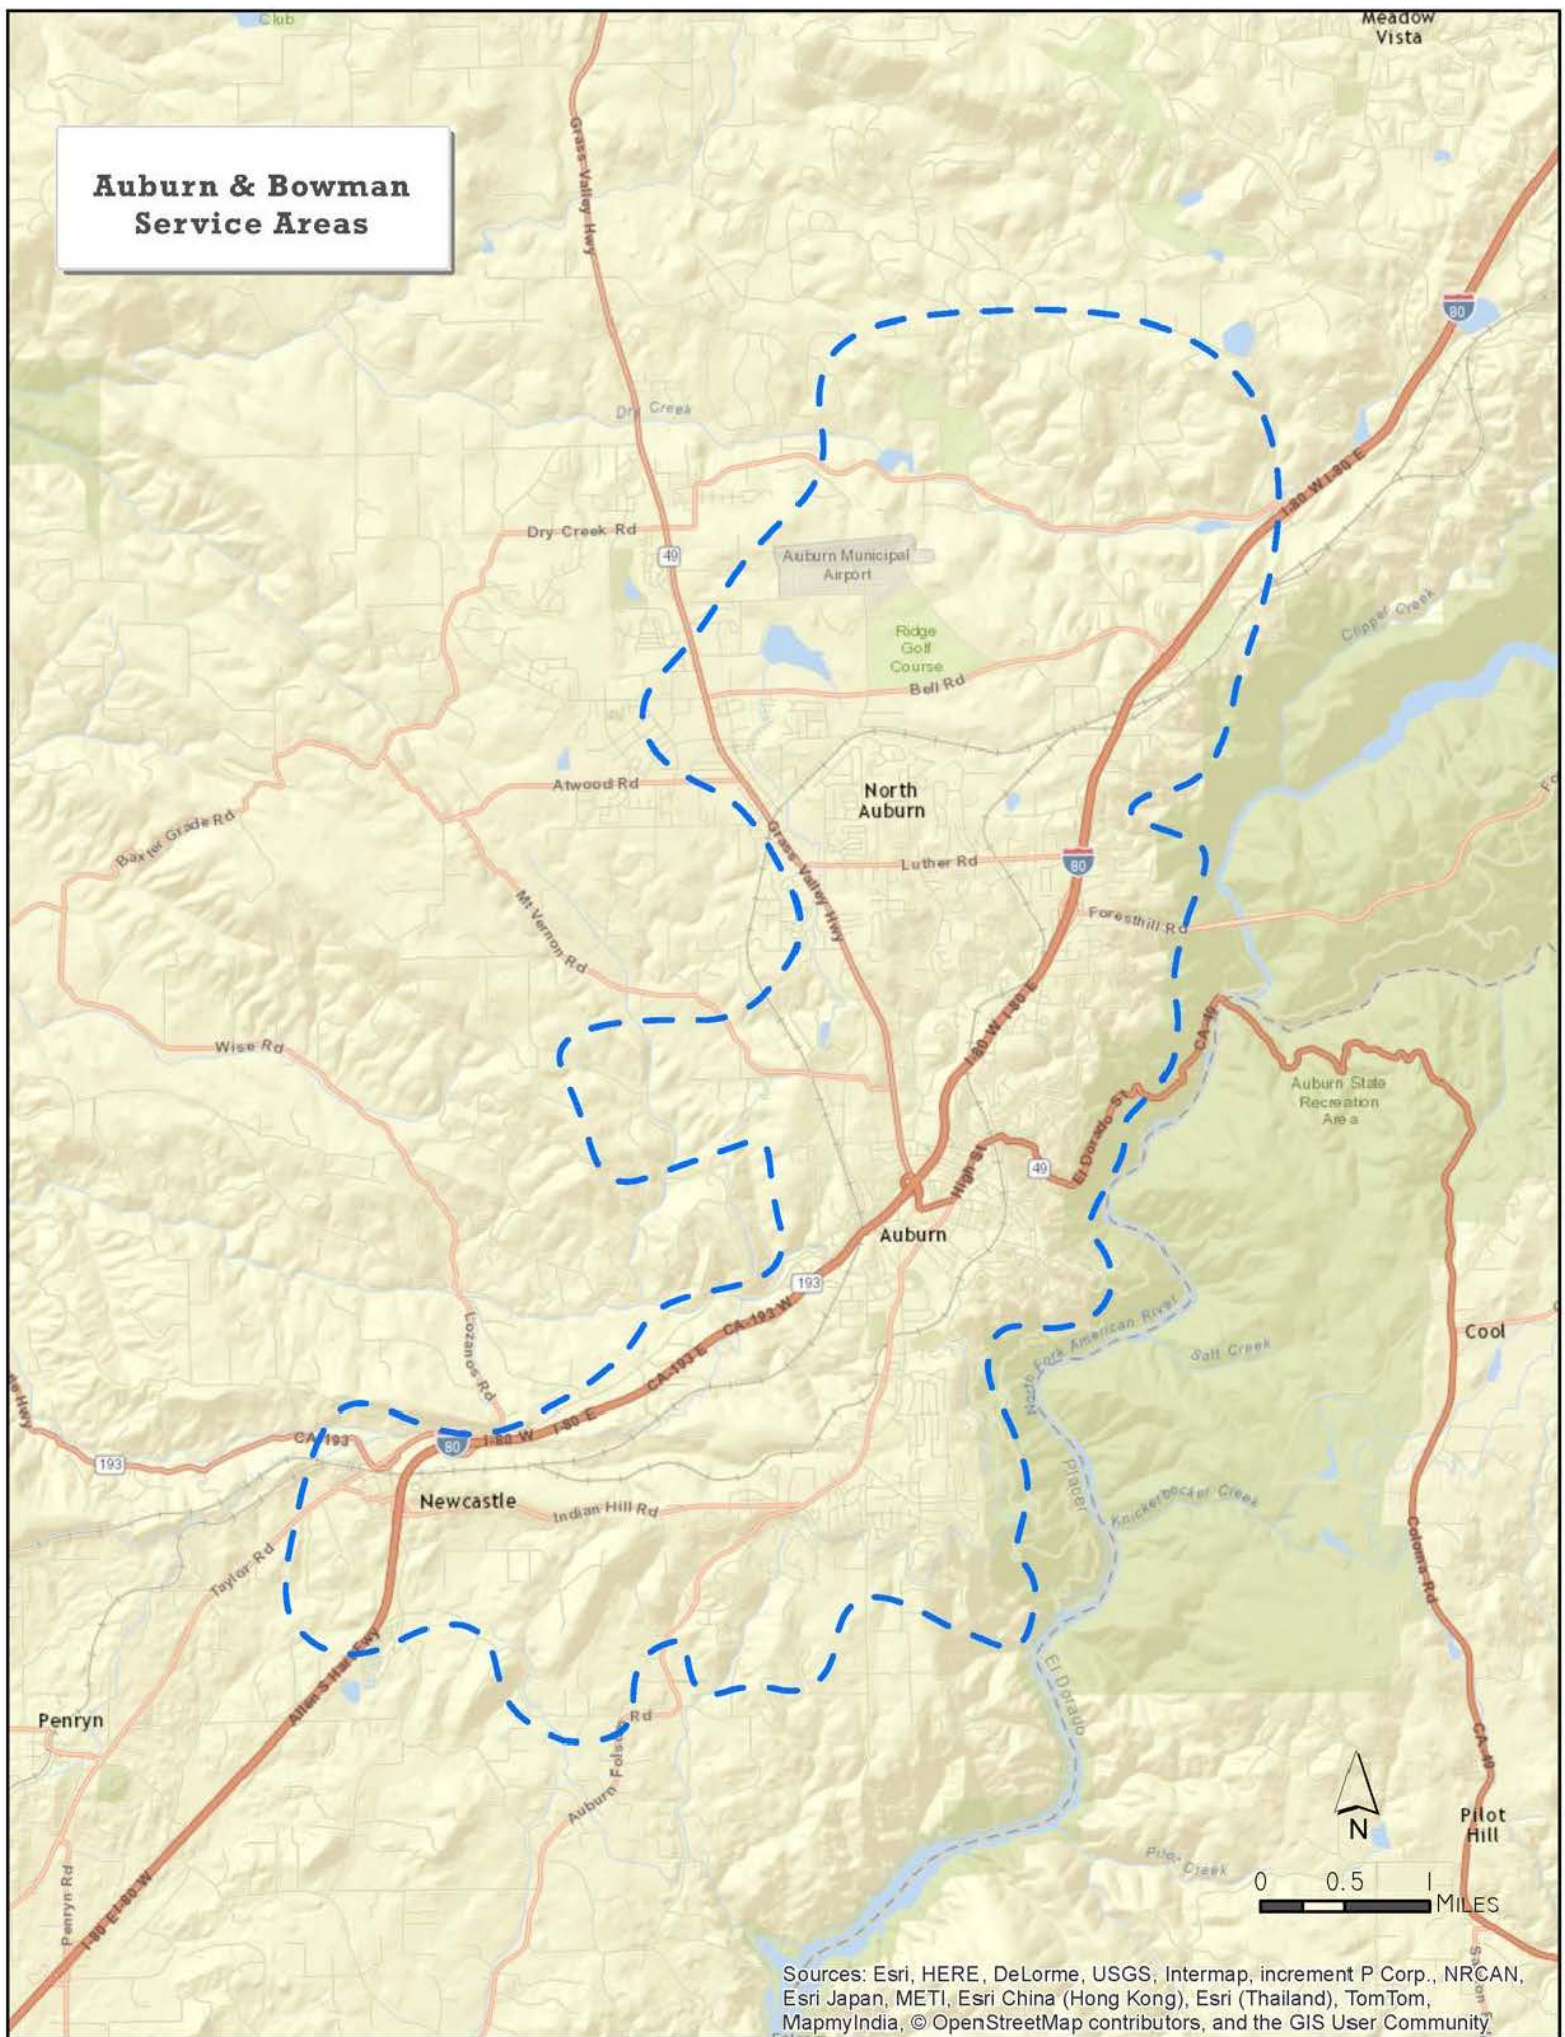

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the U.S. Environmental Protection Agency's **Safe Drinking Water Hotline: 1-800-426-4791**

The Source of Your Water Supply

Your water originates in the Sierra snowpack. Surface water from the Yuba and Bear River watersheds and Lake Spaulding flows into the PG&E and PCWA delivery systems. The water is treated at the water treatment plants listed in this report. PCWA has completed and updated a Sanitary Survey and Source Water Assessment of the Yuba-Bear River watershed (2017). It was found the watershed was vulnerable to contaminants from highways, roadways and railroads near rivers and canals, septic tanks, utility pipelines crossing canals, upstream recreation, historic and active mining operations, utility operations, and timber harvest. Contaminants associated with these activities that could pose a threat to source water include but are not limited to sediment, bacteria, viruses, parasites, pesticides, herbicides and trace metals. Historically, contaminant levels have been very low in the source water and watershed. Full details of the Source Water Assessment may be seen at the Placer County Water Agency Business Center, 144 Ferguson Road, in Auburn.

Auburn/Bowman Water Quality Results

Primary Drinking Water Standards

Turbidity Performance Standards (that must be met through the water treatment process)

Turbidity is a measurement of clarity or the level of suspended matter in the water. In reporting turbidity, the highest single measurement and the lowest monthly percentage of samples meeting the turbidity limits are specified.

Turbidity of the filtered water must:

1. Be less than or equal to 0.3 NTU in 95% of measurements in a month.
2. Not exceed 1 NTU at any time.

Lowest monthly percentage of samples that met Turbidity Performance Standard No. 1	100%
Highest single turbidity measurement during the year	0.16
Number of violations of any surface water treatment requirements	0

CONSTITUENT	No. of Samples Collected	Highest Level Detected	90th Percentile Level Detected	No. of Sites Exceeding AL	AL	PHG	Typical Source of Contaminant
Lead (ug/L) - see note on next page	30	26.4	0	1	15	0.2	Internal corrosion of household plumbing systems
Copper (mg/L)	30	0.0975	0	0	1.3	0.3	Internal corrosion of household plumbing systems

CONSTITUENT	UNITS	MCL or [MRDL]	PHG, (MCLG) or [MRDLG]	PCWA Range and Average or (HRAA)	Typical Source of Contaminant
Total Trihalomethane	ug/L	80	None	36-100 (76.25) ¹	Byproduct of drinking water disinfection
Total Haloacetic Acids	ug/L	60	None	0-59 (47.5)	Byproduct of drinking water disinfection
Chlorine	mg/L	[4]	[4]	0-1.52 (0.57)	Drinking water disinfectant added for treatment
Total Organic Carbon	mg/L	TT=RAA<2	None	1.1-1.5 (1.3)	Various natural and manmade sources

¹ Compliance is based on highest running annual average. Nevertheless, PCWA is committed to providing the best water possible, and is installing tank mixers to help eliminate Trihalomethanes from our system. They have proven to work very well for us in other areas of our distribution systems.

Secondary Drinking Water Standards

Total Dissolved Solids	mg/L	1,000	None	14-30	22	Runoff / leaching from natural deposits
Specific Conductance	uS/cm	1,600	None	49-68	58.5	Substances that form ions when in water
Chloride	mg/L	500	None	4.36-5.65	5.01	Runoff / leaching from natural deposits
Sulfate	mg/L	500	None	1.38-1.49	1.44	Runoff / leaching from natural deposits

Monitoring of Unregulated Substances

Sodium	mg/L	None	None	4.1-4.26	4.18	Runoff / leaching from natural deposits
Hardness	mg/L	None	None	10.6-13.5	12.05	Runoff / leaching from natural deposits

DEFINITIONS: Understanding Your Water Quality Report

MCL: Maximum Contaminant Level. The highest level of a contaminant that is allowed in drinking water. Primary MCL's are set as close to the PHG's (or MCLG's) as is economically and technologically feasible. Secondary MCL's are set to protect the odor, taste and appearance of drinking water.

MCLG: Maximum Contaminant Level Goal. The level of a contaminant in drinking water below which there is no known or expected risk to health. Set by the U.S. Environmental Protection Agency.

MRDL: Maximum Residual Disinfectant Level. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

MRDLG: Maximum Residual Disinfectant Level Goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Primary Drinking Water Standard. MCL's and MRDL's for contaminants that affect health along with their monitoring and reporting requirements, and water treatment requirements.

PHG: Public Health Goal. The level of a contaminant in drinking water below which there is no known or expected risk to health. PHG's are set by the California Environmental Protection Agency.

AL: Action Level. The concentration of a contaminant, which if exceeded, triggers treatment or other requirements which a water system must follow.

NTU: Nephelometric Turbidity Units. A measure of the clarity of water. Turbidity is monitored because it is a good indicator of water quality. High turbidity can hinder the effectiveness of disinfectants.

TT: Treatment Technique. A required process intended to reduce the level of a contaminant in drinking water.

pCi/L: picocuries per liter. A measure of radiation.

mg/L: milligrams per liter or parts per million (ppm)

ug/L: micrograms per liter or parts per billion (ppb)

uS/cm: MicroSiemens per centimeter

RAA: Running Annual Average

HRAA: Highest Running Annual Average

<: Less Than

ND: ND or Non-Detected: An analysis result below detectable levels.

NA: Non-Applicable

Environmental Influences on Drinking Water

The sources of drinking water (both tap and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

- **Microbial contaminants**, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- **Inorganic contaminants**, such as salt and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.
- **Pesticides and herbicides**, that may come from a variety of sources such as agriculture, urban storm water runoff and residential uses.
- **Organic chemical contaminants**, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, agricultural application and septic systems.
- **Radioactive contaminants**, that can be naturally-occurring or be the result of oil and gas production and mining activities.

Statement on Lead

Infants and young children are typically more vulnerable to lead in drinking water than the general population. It is possible that lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. If you are concerned about elevated lead levels in your home's water, you may wish to have your water tested and/or flush your tap for 30 seconds to 2 minutes before using tap water. Additional information is available from the USEPA Safe Drinking Water Hotline (1-800-426-4791) or at <http://www.epa.gov/lead>.

PCWA has conducted further monitoring at the home with the high result. All further monitoring in that home has resulted in no detection, though your home could be vulnerable to a lead detection if it was built prior to 1986. The advice above to flush your faucet has proven to work in other cases.

Note to At-Risk Water Users

Some people may be more vulnerable to contaminants in drinking water than the general population. Immune-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. USEPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline at (800) 426-4791.

What You Should Know About *Cryptosporidium*

Cryptosporidium is a microbial pathogen found in most surface waters throughout the U.S.. Although filtration removes *Cryptosporidium*, the most commonly used filtration methods cannot guarantee 100 percent removal. We conducted a two-year study on *Cryptosporidium* during 2006 and 2007, and our monitoring indicated the presence of these organisms in our source water in ranges from non-detect to 0.7 organisms per liter. We are in the middle of another 2 years of monitoring, and so far the results are non-detect to 0.2 organisms per liter. Again, these results are from the untreated, raw water. The design of the EPA study conducted here did not call for treated water samples. Current test methods do not allow us to determine if the organisms are dead or if they are capable of causing disease. Ingestion of *Cryptosporidium* may cause an abdominal infection. Symptoms of infection include nausea, diarrhea, and abdominal cramps. Most healthy individuals can overcome the disease within a few weeks; however, immune-compromised people are at greater risk of developing life-threatening illness. We encourage immune-compromised individuals to consult their health care provider regarding appropriate precautions to take to avoid infection. *Cryptosporidium* must be ingested to cause disease, and it may be spread through means other than drinking water.

2016 Testing Results

Measurements reported here were collected in 2016 (unless otherwise noted). In accordance with federal regulations, data is from the most recent tests. We are allowed to monitor for some contaminants less than once per year because concentrations of these contaminants do not change frequently.

Este informe contiene información muy importante sobre su agua potable. Tradúzcalo o hable con alguien que lo entienda bien.

Frequently Asked Questions About Water Quality

It is important for you to know that we take our customers' concerns very seriously. We feel that you wouldn't be calling if there weren't cause for concern, so we investigate every claim fully and in a timely manner before closing a case. Below are some answers to the most common questions or concerns. FOR INFORMATION about this report or to report any concerns with the quality of water in your home or a perceived risk to the quality of our water source, PCWA customers are invited to contact the PCWA Customer Service Center at (530) 823-4850 or (800) 464-0030.

Do we have hard water?

No, at less than 20 mg/L (milligrams per liter) PCWA water is on the low end of soft water. General guidelines for classification of waters are: 0 to 60 mg/L as calcium carbonate is classified as soft; 61 to 120 mg/L as moderately hard; 121 to 180 mg/L as hard; and more than 180 mg/L as very hard.

Is there Fluoride in my water?

PCWA does not fluoridate its water. There is a very small portion of the City of Rocklin, which receives water from the City of Roseville during high demand in warm months only. In addition, our Bianchi system receives Roseville water at all times. Roseville is required to fluoridate its water. To find maps of these areas, you can go to: <http://www.pcwa.net/water-resources/water-quality.html>

My water smells like Chlorine!

Chlorine is required in the distribution system to keep bacteria from making it to your tap. We regulate our Chlorine dosage very strictly so that we have just enough without having too much. The maximum residual level for Chlorine is 4 mg/L (milligrams per liter), and a common level for our systems is between 0.5 and 1.5 mg/L. Some people are more sensitive to the smell of Chlorine in water. It is common for people to think that the level of the Chlorine must be too high under these circumstances; however, we've found that the most common reason for smelling Chlorine at your tap is when the Chlorine is dissipating or the level is dropping. The reason for this is that the water sits in your plumbing before you use it. Most likely, if you flush your taps out, the smell will disappear.

Why is my tap water milky or cloudy?

This is caused by tiny air bubbles in the water. It is completely harmless. Cold water from snowmelt has the potential to hold lots of air. As the water warms a bit on its way to your tap, it has more potential to release

that air. When you turn on your tap, the rapid reduction in pressure causes the air to come out of solution, and creates the milky look you see. If this is the case, it will clear before your eyes as in the picture.

How do I know my water is safe?

Distribution operators and treatment plant operators certified by the State Water Resources Control Board collect hundreds of bacteriological samples each year throughout the water distribution systems as well as performing thousands of individual tests in the treatment facilities and in the distribution system, of which only the detected constituents are found in your annual Consumer Confidence Report. Field tests for things like temperature, turbidity, pH and chlorine residual help to let us know that our water is maintaining its quality throughout the distribution system.

Frequently Asked Questions About Water Quality

Continued...

My water is dirty!

It is actually very common for people to experience discolored or “dirty” water at their tap. In most cases, we can trace this condition to a particular aspect of the household plumbing. It is very common for a water heater to corrode or rust and cause discolored water in the hot water. You can test this by turning your tap to the full hot position and observe whether the water is discolored. If the water is discolored in your hot water, but not cold, you can be reasonably certain the issue lies in your water heater. If the problem occurs in the cold water as well, and doesn't clear up after running for a few minutes, we may need to flush the main line. If you get discolored water out of your cold water tap and it clears up after running for several minutes, the main line is likely clean and you may have a plumbing fixture or an old galvanized line causing the problem.

Why are there pink or dark stains in my toilet or around my drains?

Airborne organisms are usually the cause. You will see grey, black, or sometimes pink filmy stains on surfaces that are regularly moist, including toilet bowls, shower heads, shower drains, sink drains, dishwashers, shower and bath floors and walls. These organisms are not in the drinking water, but they find moist areas of your house to thrive. The only way to control these organisms is to disinfect the surfaces regularly, and ventilate the area well.

How is my water treated?

Your water is treated by conventional methods, utilizing coagulation, flocculation, sedimentation, filtration, and finally disinfection. The facility or facilities serving your area are operated by State Water Resources Control Board certified operators. It may also be comforting for you to know that our facilities have built-in fail-safes which will immediately shut the treatment process down and not allow any water to the system if something within the facility is not operating correctly. The operators receive alarms for immediate intervention so they can correct the problem and begin treating water again.

My water tastes like chemicals!

Another common call we get is that the water has a strong chemical taste all of a sudden. Most times, this can be traced to either the Chlorine topic covered earlier, or to a hose bib being left on. This is most common during warm times of year when the hot sun beats down on a pressurized hose and creates backpressure. When you open a tap inside the house, you can be sure that high pressure hose water feeds right into your house, and it doesn't taste good. The best way to avoid this is to always shut your hose off at the

hose bib shut-off valve, and depressurize your hose. For this reason, it is not a good idea to have your hose bib set up as it is in the picture.

Air Pollution Public Record & Information Requests

Placer County Air Pollution Control District <no-reply@wufoo.com>

Sun 2/25/2018 7:06 PM

To: scottvdm@hotmail.com <scottvdm@hotmail.com>;

Thank you for submitting a Public Records Request with Placer County Air Pollution Control District. We will contact you within 10 days of your request. If you would like printed copies of any records, there is a charge of \$0.50 for the first page and \$0.25 for each additional page.

To request other records not related to Air Pollution Control, please contact the appropriate agency.

If you have any questions please call (530) 745-2330 or e-mail to pcapcd-records@placer.ca.gov.

Air Pollution Public Record & Information Requests

Name *	Scott Van de Mark
Company	Partner Engineering & Science
Phone Number *	(412) 848-2547
Email	scottvdm@hotmail.com
Mailing Address *	 140 Locksley Avenue Apt. 3 San Francisco, CA 94122 United States
Preferred Method of Contact *	Email
Providing Information to You *	Emailed copies of document electronic media copies
Type of Request *	Review or copying of existing records that I will specify
Copying Fees *	Please obtain my authorization for copying charges
Do You Wish to Pre-Authorize Duplication Fees up to a Not to Exceed Amount? *	No
Company Name	Partner Engineering & Science
Site Address/APN	 030-100-024-000 Apt. 3 Loomis, CA 95650 United States
Records Requested	<ul style="list-style-type: none">• Permit To Operate• Enforcement Actions• Emissions Reduction• Compliance/Surveillance Reports (date range needed)

- Air Toxics

Description of Requested Records *

Please let me know if you have any Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs on file for the property at APN 030-100-024-000 with the APCD.

Thanks very much,

Scott

Wetlands Mapper

The Wetlands mapper is designed to deliver easy-to-use, map like views of America's Wetland resources. It integrates digital map data along with other resource information to produce current information on the status, extent, characteristics and functions of wetlands, riparian, and deepwater habitats. The Wetland Mapper fulfills the U.S. Fish and Wildlife Service's strategic plan for the development, revision and dissemination of wetlands data and information to resource managers and the public. This information is intended to promote the understanding and conservation of wetland resources through discovery and education as well as to aid in resource management, research and decision making.

The wetlands displayed on the Wetlands Mapper show wetland type and extent using a biological definition of wetlands. There is no attempt to define the limits of proprietary jurisdiction of any Federal, State, or local government, or to establish the geographical scope of the regulatory programs of government agencies.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
PG&E: DEL MAR SUBSTA	3930 SIERRA COLLEGE	ESE 1/8 - 1/4 (0.179 mi.)	6	12

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
FOREST PRODUCTS MANU	ANTHONY COURT	S 1/4 - 1/2 (0.480 mi.)	18	24
Database: RESPONSE, Date of Government Version: 10/30/2017				
Status: Certified				
Facility Id: 31240008				

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/30/2017 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

Environmental Interest/Information System
STATE MASTER

Registry ID: 110002834130

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History:

Forest Products Company is a wood product coating facility which operated at the Site since 1977. In 1980, the company built two unlined evaporation ponds to handle thier waste stream. When the ponds were dry, the bottom of the ponds were scraped, and the scrapings placed into 55-gallon drums. In 1983, Forest Product conducted a cleanup of the ponds for mercury and lead and in 1986 the Department of Health Services (DHS) concurred the cleanup was adequate. In 1990, Simas Enterprises purchased the property. In 1987, DHS conducted a drive-by of the Site and observed soil contamination from recent discharges to a drainage ditch and recommended a full site inspection. Department of Toxic Substances Control (DTSC) oversaw the investigation and remediation of the Site. On 15 October 1993, DTSC notified Simas that the residual soil and groundwater contamination do not pose a risk to human health or the environment. More information can be found at the DTSC Envirostor website (http://www.envirostor.dtsc.ca.gov/public/profile_report.asp?global_id=31240008)

Site Description: investigation and cleanup, another source of funds will need to be identified. A wood coating facility operated by Forest Products, Inc. was located at this site. Paint wastes were stored in drums and disposed of in an onsite pond. This site was identified as H. Investment Company in the last Expenditure Plan.

Hazardous Waste Desc: The material in question was composed of paint film from dry evaporation ponds, paint solids in drums, and paint solids from around paving at the site. Mercury was identified as the primary hazardous component of the wastes.

Threat To Public Health & Env: The primary concern is the possibility of ground water contamination, as the soils in the area are known to have a medium to high permeability. Ground water flow generally is south towards Sacker Ravine, which is located approximately 500 to 600 feet south of the ponds.

Site Activity Status: Approximately 65 cubic yards of soil was removed and disposed of in an approved landfill in November, 1983. Additional soil was removed from the pond areas in November, 1985. In January, 1986, H. Investment contacted DHS to evaluate the cleanup measures taken.

Completed Date: 09/18/1981
Comments: FACILITY IDENTIFIED CHAMBER OF COMMERCE DIRECTORY QUESTIONNAIRE SENT.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 03/26/1993
Comments: Preliminary Endangerment Assessment required low priority. The manufacturing of fiberboard at the facility has led to elevated level of tannins and lignins in the area ground water up to 4.2 milligrams per liter (mg/L) and in the area surface water up to .9 mg/L. These contaminants are considered non-hazardous. The RWQCB has inspected the ponds on-site. Placer County is involved in the ground water and surface water monitoring. The Air Resources Board and local air pollution control district are monitoring formaldehyde releases into the air from the facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 05/21/2018
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 02/06/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 01/05/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346
Date Made Active in Reports: 01/12/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 04/30/2018
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

MIMA CAPITAL LLC
SIERRA COLLEGE BOULEVARD & BANKHEAD ROAD
LOOMIS, CA 95650

TARGET PROPERTY COORDINATES

Latitude (North):	38.81546 - 38° 48' 55.66"
Longitude (West):	121.216046 - 121° 12' 57.77"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	654885.6
UTM Y (Meters):	4297602.5
Elevation:	324 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5629068 ROCKLIN, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

0602390418D	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ROCKLIN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: ANDREGG

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 5.6
2	14 inches	29 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6.5 Min: 5.6
3	29 inches	33 inches	weathered bedrock	Not reported	Not reported	Max: 0.42 Min: 0	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Xerofluvents

Soil Surface Texture: stratified loamy sand to fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 111 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	stratified loamy sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 141 Min: 1.4	Max: 8.4 Min: 7.9
2	14 inches	37 inches	stratified loamy sand to fine sandy loam to silt loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 141 Min: 1.4	Max: 8.4 Min: 7.9
3	37 inches	55 inches	stratified loam to silty clay loam to clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 14 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: Water

Soil Surface Texture: stratified loamy sand to fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX D: QUALIFICATIONS

Education

Master of Environmental Studies - Yale School of Forestry & Environmental Studies
B.A. in Economics & Environmental Studies - University of Vermont

Highlights

18 years in the environmental field
11 years managing innovative conservation and environmental credit market related projects for a state-wide environmental nonprofit corporation
5 years conducting Phase I ESAs and Environmental Transaction Screen Assessments of commercial properties including: industrial facilities, gas stations and truck terminals
4 years conducting Phase II Environmental Site Assessments and Remediation projects at industrial and commercial properties

Experience Summary

Mr. Van de Mark has been involved in the environmental due diligence industry from as early as 1987. His experience in the environmental industry includes being an environmental professional in both the for-profit and nonprofit environmental fields. Mr. Van de Mark worked for four years as a staff scientist for a full service environmental consulting company in Falls Church, VA and Pittsburgh, PA. As a staff scientist his responsibilities included: conducting over 15 environmental compliance audits, 10 environmental risk assessments and participated in multiple Phase II environmental site investigations, including extensive surface and groundwater quality monitoring and sampling experience.

He then served as the Director of Special Projects for the Pennsylvania Environment Council, for approximately eleven years, which was a statewide environmental nonprofit corporation in Pennsylvania. Mr. Van de Mark was responsible for the development and management of water quality trading policy and demonstration projects, climate policy and greenhouse inventory projects on behalf of private foundations and state and federal agencies.

For the past five years he has been assisting national due diligence firms in conducting Phase I Environmental Site Assessments and Environmental Transaction Screens.

Project Experience

2008 Allegheny County Greenhouse Gas Inventory and Climate Action Plan, Pittsburgh, PA.

Prepared the 2008 baseline Greenhouse Gas Inventory and Climate Action Plan for Allegheny County in Pennsylvania. The Plan includes a set of recommendations to reduce the County's carbon footprint 15% by 2015.

2009 Greenhouse Gas Inventory and Climate Action Plan for the Community College of Allegheny County, Pittsburgh, PA.

Prepared the 2009 baseline Greenhouse Gas Inventory and Climate Action Plan for the Community College of Allegheny County (CCAC). The Plan includes recommendations for reducing CCAC's 2009 carbon footprint 15% by 2016.

Conestoga River Nutrient Trading Project, Pittsburgh, PA.

Coordinated the Conestoga River Nutrient Trading Project which culminated with the first water quality trade in PA in 2004 and from 2000 through 2004, Mr. Van de Mark developed water quality trading policy recommendations for PA Department of Environmental Protection.

On-line Nutrient Trading Marketplace for Chesapeake Bay Watershed in Pennsylvania, Pittsburgh Pennsylvania.

Coordinated and developed on-line water quality trading marketplace in 2007 (<http://pa.nutrientnet.org>) for Chesapeake Bay Watershed in Pennsylvania in partnership with World Resources Institute and the PA Department of Environmental Protection.

No-till Cultivation and Nutrient Trading Project, Chesapeake Bay Watershed, Pennsylvania.

Managed the water quality trading component of a no-till cultivation program on behalf of the Capital Resource Conservation and Development Area Council of PA in 2009-2010, including outreach and education program and the calculation and certification of nitrogen and phosphorous reduction credits for over 30 farms in Bedford and Bradford Counties.

Abandoned Mine-land Restoration and Nutrient Trading Project, Schuylkill County, Pennsylvania.

Managed innovative field-scale research and 70-acre demonstration projects completed in 2011, using excess poultry manure and waste paper mill sludge as soil amendments on degraded surface mine lands for the production of warm season grasses as biomass energy crops. Project efforts included business model for reclaiming degraded surface mine sites outside Chesapeake Bay Watershed using poultry manure exported from the Bay Watershed financed through PA Nutrient Trading Program.

Phase I Environmental Site Assessments of Truck Terminals, Sacramento, California and Sparks, Nevada.

Completed Phase I ESAs of truck terminals with hazardous waste, hazardous materials, aboveground and underground storage tank related issues.

Registrations

EPA/AHERA Accredited Asbestos Building Inspector
State of Colorado Certified Asbestos Building Inspector

Training

40-Hr Hazardous Waste Operations HAZWOPER
EPA/AHERA Accredited Asbestos Building Inspector
SafeLand, Environmental Health & Safety Training for Onshore Energy & Production
Basic First Aid (CPR Inclusive)

Highlights

7 years of experience in real estate due diligence and environmental consulting including:

- Phase I/II Environmental Site Assessments
- Property Condition Assessments (PCAs)
- Asbestos-Containing Material (ACM) Survey and Abatement Oversight
- Indoor Air Quality (IAQ) Inspection and Mitigation

Experienced in development and submittal of Voluntary Cleanup Plans (VCP), Materials Management Plans, Transaction Screen Reports, Spill Prevention Control and Countermeasure (SPCC) plans, Colorado Oil and Gas Conservation Commission (COGCC) remediation oversight, stormwater management plans and air emissions inventories

Experience Summary

Mr. Livermore serves as a Project Manager for Partner Engineering and Science, Inc. (Partner) with seven years of comprehensive strategic consulting experience focused on industrial and commercial real estate transactional due diligence, regulatory compliance and subsurface characterization. Mr. Livermore's job responsibilities include project oversight, staff supervision and training, report review and client management. He is responsible for ensuring consistency and quality of due diligence services, providing senior review expertise to ensure conformance with most recent American Society of Testing and Materials (ASTM) standards and U.S Environmental Protection Agency's (EPA's) All Appropriate Inquiry (AAI), and the satisfaction of client requirements for Phase I Environmental Site Assessments (ESA), Transaction Screen Assessments (TSA) and other environmental services.

Mr. Livermore began his career as an Environmental Scientist, conducting Phase I ESA, TSAs, PCAs and Phase II Subsurface Investigations throughout the Western United States. His due diligence resume includes experience in soil and groundwater contamination investigations, radon measurement and mitigation, and the identification of underground storage tanks (USTs), asbestos, lead-based paint, and PCB contamination. Mr. Livermore has also performed remediation oversight and worked closely with regulators to develop voluntary cleanup plans, contingency plans and contamination management plans for developers. Mr. Livermore previously was retained by a national due diligence firm to perform technical report reviews, project management and support technical relationship management. Mr. Livermore joined Partner in 2015 and has operated as a Project Manager for both environmental and building science services. Over the past

seven years, Mr. Livermore has successfully performed, reviewed or managed due diligence projects on over 1,000 properties throughout the country.

Project Experience

Phase I/II Due Diligence

Phase I/II Environmental Site Assessments (ESAs), Local Commercial Real Estate Developers, Colorado. Directly assisted the environmental consulting services associated with a large-scale mixed-use redevelopment project at a downtown Denver infill property with extensive petroleum and volatile organic compound soil and groundwater impacts. Environmental due diligence services included preparation and coordination of a Phase I Environmental Site Assessment, Phase II Limited Subsurface Investigation and ground penetrating radar investigation. Mr. Livermore prepared and oversaw the execution of a Voluntary Cleanup Plan (VCUP) Application and Materials Management Plan (MMP) outlining site specific remediation objectives based on investigation findings in accordance with the Colorado Department of Public Health & Environment to facilitate site redevelopment and petition for no further action. Long-term project work included direct oversight of construction earthwork activities focused on management of soil impacts, coordination of environmental subcontractors, effective client/owner communication and preparation of a completion closeout report.

Phase I/II Environmental Site Assessments (ESAs), ACM Pre-Demolition Surveys, Fortune 500 Multifamily Real Estate Developer, Colorado and Arizona. Mr. Livermore managed the execution of environmental due diligence projects including Phase I Environmental Site Assessments, Phase II Limited Subsurface Investigations, asbestos pre-demolition surveys and/or development of Materials Management Plans for 10+ projects located in the Greater Denver, Colorado and Phoenix, Arizona areas for a Fortune 500 multifamily developer. Project sites ranged from vacant land with historical retail gasoline station uses to developed retail strip centers with dry-cleaner uses and commercial/industrial facilities purchased for residential redevelopment.

Phase I ESA, Gypsum Surface Mine, Western Colorado. Mr. Livermore managed the execution of a Phase I ESA on an expansive surfacing mining site spanning over 700 acres in western Colorado as part of due diligence services for a potential buyer. In addition to reviewing applicable mining inspection records dating back to the early 1900s, which identified historic environmental concerns, Mr. Livermore successfully contracted third party associates to identify safety and health violations that resulted in fines potentially inherited by the buyer of the property. By anticipating client's needs, Mr. Livermore was able to communicate the results to the client several days before the agreed upon project deadline.

Asbestos and Indoor Air Quality (IAQ)

Indoor Air Quality Investigation and Emergency Response, Fortune 100 Financial Services Company, Colorado. Mr. Livermore provided emergency response oversight and guidance to contractors at a facility with significant building material damage from a moisture intrusion event. Performed an asbestos survey and moisture mapped interior of 12,000 square foot building to determine materials to remove. Following material removal, performed bio-aerosol sampling for viable and non-viable microbial spore counts within the facility before re-occupancy.

Indoor Air Quality Investigations, Commercial and Multifamily REITs, Colorado. Mr. Livermore provided IAQ services to include visual damage assessment, moisture mapping, asbestos surveys and project oversight

for multiple commercial and multifamily properties on behalf of REIT clients. Multiple assessments were completed in response to Occupational Safety and Health Association (OSHA) violations or complaints brought against site facilities. Assessment activities included collection of moisture meter readings, bio-aerosol samples, surface mold samples and bulk asbestos samples.

Property Condition Assessment (PCA)

Property Condition Assessment, National Hospitality REIT, Hawaii. Retained by a national hospitality REIT to provide expedited due diligence services for a high-rise hotel in Honolulu, Hawaii, constructed in the early 1970s. As the client was provided reliance on recently completed ESA and PCA reports, consultant was engaged to conduct third party reviews of the reports and to conduct a site inspection to independently evaluate environmental and engineering concerns and cost implications associated with proposed large-scale hotel renovations. Mr. Livermore mobilized from US mainland to the site three days following authorization to proceed, provided preliminary findings within 48 hours of the two-day site inspection, and issued written reports three days later. The scope included collection of asbestos and lead paint samples and evaluation of water intrusion issues.

Property Condition Assessments, National Hospitality REIT, California and Washington State. Retained by a national hospitality REIT to provide ESA and PCA services for portfolio of high-rise hotel properties located in California and Washington. Mr. Livermore conducted PCAs for multiple hotel properties in collaboration with client's specialist teams and project management staff. Provided immediate need and deferred term costs along with observed visual deficiencies associated with the current layout and condition of each property within client's expedited turnaround time.

Property Condition Assessments, National Retail REIT, Colorado, California, New Mexico and Montana. Mr. Livermore conducted PCAs on large (10+ acre) retail shopping center properties for a national REIT throughout Colorado with various properties located in California, New Mexico and Montana. Provided specialized scope PCAs including HVAC inventories for client specializing in under-performing, grocery-anchored properties throughout the United States. Projects often included coordination and subcontracting outside specialists to provide follow-up investigation for structural and geotechnical issues.

Highlights

Over 16 years in the environmental and engineering consulting industry

Founder member of Partner Engineering and Science, Inc.

Executive Board Member of Partner Engineering and Science, Inc.

Experience Summary

Ms. Redlin has more than 16 years of experience in the environmental and engineering consulting industry. Her background in environmental science, in addition to her knowledge of current commercial real estate due diligence standards, allows her to offer the most efficient and cost-effective means of regulatory compliance. Ms. Redlin has extensive experience managing all aspects of due diligence, specializing in environmental due diligence, for nationwide and local clients such as:

- Residential Developers
- Commercial Developers
- Mortgage Brokers
- Real Estate Brokers
- Individual Property Owners and Buyers
- Financial Institutions including:
- Portfolio Lenders
- SBA Lenders
- HUD Lenders
- Fannie Mae Lenders
- Freddie Mac Lenders
- Private Equity Funds
- Insurance Lenders

Ms. Redlin has gained valuable knowledge and know-how from having been personally involved in the details of thousands of real estate transactions for various client types, and therefore understands the specific needs and scopes of work required for all parties involved in a transaction.

Ms. Redlin has served as an environmental scientist, project manager, or executive senior author on over 15,000 real estate transactions. Ms. Redlin's due diligence resume includes experience at all levels, advising lenders and real estate investors through the following product types:

- Phase I Environmental Site Assessments

- Phase II Subsurface Investigations
- Phase III Site Characterizations
- Remedial Cost Estimates
- Remediation Design and Implementation
- Environmental Transaction Screens
- Property Condition Assessments
- Probable Maximum Loss Assessments
- Property Condition Evaluations

Real estate investors, redevelopment agencies, financial institutions, insurance lenders, and real estate equity funds have come to rely on her advice and judgment to help them with their real estate business decisions. Ms. Redlin is a dedicated professional who takes pride and pleasure in meeting her client's needs and spearheading and assembling the team with the expertise to handle any issue that may come up during the transaction.

Project Experience

Ms. Redlin has extensive experience in testing soil, soil gas, and groundwater in the context of a real estate transaction, as well as under the supervision of state and federal regulators. Among her specialties is guiding landowners and prospective purchasers through the process of selling or acquiring an environmentally challenged site.

Ms. Redlin has participated in the characterization of groundwater and soil contamination; quarterly groundwater monitoring; implementation of various systems such as soil vapor extraction systems, dual phase extraction systems, ozone sparging, air sparging, pump and treat; and soil excavation projects such as tank removals at several clean-up sites in Los Angeles and Orange County.

Ms. Redlin also has extensive experience in environmental compliance monitoring and biological consulting. She has extensive experience working as an independent contractor for and in conjunction with state and local agencies such as Santa Barbara County Parks, California Department of Fish and Game, California Public Utilities Commission, Los Angeles Water and Sanitation and others. This included monitoring construction activities near sensitive biological receptors; containing, quantifying and reporting any hazardous material spills that occurred; working with construction crews to ensure compliance with environmental permit regulations as well as reporting to interested parties on the progress and compliance of the project.

Distinctions

Real Estate Forum- Woman of Influence 2012

Ms. Redlin was named by the Los Angeles Business Journal for Women Making a Difference in 2010.

Ms. Redlin has been designated a 2009 California Mortgage Bankers Association (CMBA) Future Leader.

Ms. Redlin was named Real Estate Southern California Woman of Influence in 2008 for her role in the area's commercial real estate transactions.

Jenny Redlin, REPA

Ms. Redlin was one of only two consultants asked to sit on the Risk Managers Association (RMA) Credit Committee roundtable which discussed the effects of the new Federal All Appropriate Inquiries (AAI) standard on Phase I Environmental Site Assessments.

Ms. Redlin received an Industry Profile of Distinction in Brownfield Renewal.
