Permit-Related Information

Time limitation of application. An application for a permit for any proposed work shall be deemed to have been abandoned if work hasn't commenced within 180 days, calculated after the date of filing, unless such application has been pursued in good faith or a permit has been issued. The Building Official may extend the time for action for a period not exceeding 90 days upon written request by the applicant showing that circumstances beyond the control of the applicant have prevented action from being taken

Any application not issued prior to the effective date of any new law, statute, provision, ordinance, or any revision or update to the same, that directly or indirectly applies to code regulation and enforcement, will be deemed void, and a new application shall be made, and new fees shall be calculated and collected at the rates currently in effect at the time of the new application.

Permit Expiration. Every permit issued by the Building Official under the provisions of the Technical Codes shall expire by limitation and become null and void if the building or work authorized by such permit is not commenced within 365 days of permit issuance, and/or completed within the prescribed time frame, as determined in Table 105. Permits where no inspection activity has occurred for a period of 180 days, and the permit has been determined to be abandoned, may be expired administratively if no attempt is made by the permittee to retain the permits open status.

Before work can be recommenced, the expired permit shall be renewed. The minimum fee for renewal will be calculated as one hour of inspection time, plus one hour of administrative work time, multiplied by the current labor rate for the appropriate positions. The maximum renewal fee will not exceed the full permit fee cost, provided no changes have been made or will be made in the original plans and specifications for such work; and provided further that such suspension or abandonment has not exceeded 180 days, as prescribed by California Health & Safety Code 18938.6.

Permits deemed to have been expired, suspended or abandoned shall be subject to all permit related fee increases, and new fees and code requirements currently in effect at the time of permit renewal as applicable, subject to the discretion of the Building Official.

All permits will become null and void ("closed") 180 days after the prescribed expiration date as described in Table 105.

The Building Official may extend the time for action by the permittee upon written request showing that circumstances beyond the control of the permittee have prevented action from being taken. Extensions may be granted in no more than 180 days increments.
