Use additional sheets if necessary.

The General Plan is the Town's Constitution and provides the vision and guidance for development. The Town adopted its General Plan in 2001 and it is appropriate to update the General Plan to reflect the Town's existing conditions, changes in Federal and State regulations, technology, the economy, and to assure the General Plan is internally consistent.

Step 1: Consistency Evaluation and Information Gathering

Town staff is analyzing the current General Plan, Ordinances, Standards, and Guidelines to identify inconsistencies, and necessary updates to reflect Federal and State requirements and current data. The Town requests agencies and the public to contribute to the process by identifying potential updates to the General Plan documents, Land Use Diagram, inconsistencies in the General Plan, and lessons learned in the past that will contribute to the General Plan's effectiveness, all of which will be utilized in the next steps of the General Plan process.

Tips on How to Comment Effectively

The most effective comments are accompanied by technical data or factual observations that support a recommendation.

- Please provide specific references to General Plan sections or the Land Use Diagram when making recommendations for changes or updates.
- Identify issues you think should be addressed.
- Identify data that should be updated.
- Provide citations of documents to be considered in the update.
