BY BENNETT ENGINEERING**

Recommendation:

Listen to the project update presentation and discuss dates for a second community workshop.

Issue Statement and Discussion

Back on June 18, 2014, a community workshop for the project was held at the Loomis Depot. The consulting staffs of Bennett Engineering and Foothills Associates were there to gather community comments. The most significant change was the removal of the landscaped center medians.

Bennett Engineering and Foothills Associates are here to give an update on the project and to answer any questions you might have.

Staff plans to have a second community workshop in May.
