1. Introduction and Key Findings

The Town of Loomis has drafted an update to its General Plan with a planning horizon of 2040. The Town has developed land use change assumptions for analytical purposes that describe assumed new development between present and 2040. The Town has requested an analysis of the fiscal impacts that the Plan (sometimes also referred to as Project) may have on the Town’s General Fund. This analysis estimates the revenues and expenditures over a 20-year period, which extends slightly beyond the 2040 planning horizon. The Town has engaged AECOM to prepare this analysis, which may be used for future fiscal planning and budgeting.

Summary of Findings

The updated General Plan is estimated to generate a fiscal surplus to the General Fund of the Town of Loomis of approximately \$61 million (\$40 million in net present value) over the 20-year period 2023-2042, as shown in Table 1. This is the variance between \$81 million (\$52 million net present value) in estimated fiscal revenues and \$20 million (\$12 million net present value) in fiscal expenditures for the period.

Table 1: Estimated Net Fiscal Impact of Assumed Development Under Loomis General Plan

Fiscal Impact to Town's General Fund over 20 Years¹

Category	Estimated 20-Year Fiscal Revenues	
	Nominal	NPV (\$2022) ²
Fiscal Revenue¹		
Property Tax	\$15,911,000	\$10,182,000
Property Tax in Lieu / VLF	\$6,551,000	\$4,199,000
Sales Tax	\$54,862,000	\$35,753,000
Licenses and Permits Fees	\$1,569,000	\$993,000
Franchise Fees	\$1,799,000	\$1,139,000
Total Revenues	\$80,692,000	\$52,266,000
Fiscal Expenditures¹	(\$19,952,000)	(\$12,442,000)
Net Fiscal Impact	\$60,740,000	\$39,824,000

Source: AECOM

(1) Includes Town Operational Budget funds: Town General Fund, Fire District Funds, and Town Library Fund.

(2) Net Present Value assumed discount rate of 3.12%

The estimated fiscal impact is net of the estimated current property tax paid on potential development sites. The analysis assumes the fiscal impact of new development assumed to occur under the updated General Plan will be fully additive—i.e., that none of the proposed uses will displace any existing residential or retail uses or their tenants in the Town of Loomis.

The discount rate used to calculate net present value is 3.12 percent, which is the historical 10-year average (2011-2020) Consumer Price Index growth rate for the general San Francisco Bay Area region.¹ The fiscal cashflows used in the estimate assume a base year of 2022, with assumed new development and associated population distributed evenly between 2023 and the planning horizon of 2040.

¹ Consumer Price Index for the San Francisco Bay Area region is used as a proxy for regional market dynamics as reliable data specific to Sacramento Region inflation is not readily available. The Sacramento regional economy is closely tied to the San Francisco Bay Area, and pricing of labor and goods in the Bay Area often impacts pricing in wider northern California region, including Sacramento and other Central Valley markets.

2. Background

Project Description and Site Context

The Town of Loomis has drafted a 2020–2040 General Plan Update (also referred to as “the 2040 General Plan”), which will include the following nine Elements: Land Use; Circulation; Public Facilities and Services; Conservation of Resources; Public Health, Safety, and Noise; Parks, Recreation and Open Space; Environmental Justice; Economic Development and Finance; and Housing.

The 2040 General Plan would essentially maintain the historic development pattern, with higher-intensity uses intended to be concentrated in the following areas: (1) adjacent to the Downtown Core, (2) along Taylor Road, and (3) adjacent to I-80, and development in surrounding areas progressively less intense as the distance from the Downtown Core increases. The draft General Plan Land Use Diagram, which illustrates allowable land use and development density and intensity throughout the Town’s Planning Area, is shown below in Figure 1.

Table 2 is a set of assumptions used for analysis for this General Plan update. These assumptions do not represent Town policy but are merely derived to support analysis and reporting for different aspects of this General Plan update. These assumptions are instead intended to be reasonably ambitious representations of the Town’s updated policy framework and the ability of the Town to attract additional employment and housing develop consistent with the updated General Plan. For this analysis, the land use program—residential units and non-residential square footage, as well as the associated residential and employee populations—of the assumed new development is distributed roughly evenly for the duration of the planning period (2023 through 2040). Additional details are in the Appendix to this Memo.

Grand Total	1,010	2,270	1,312,240	1,510

Notes: SF = square feet

Methodology

This section summarizes the methodology used in calculating the fiscal impact of the draft General Plan update on the Town of Loomis General Fund. Some budget line items are assessed using a per-service population approach, while others are not estimated, as discussed below.

- Per-Capita Service Population.** The per-capita service population approach is widely used for planning-level fiscal analysis. The approach assumes that fiscal revenues and costs generated are proportionate to the “service population.” Service population includes not only residents, but also employees and visitors, all of whom use Town services. Depending on the budget item, growth in service population may necessitate additional resources, which incur fiscal costs (e.g., hiring of new employees; securing additional equipment for public safety), or generate new fiscal revenues (e.g., sales tax from new spending). The derivation of the Town service population is shown in Table 3 and derivation of the General Plan update added service population is shown in Table 4.
- Not Estimated.** Some budget items are not estimated because certain Town revenues and expenditures are assumed to be not impacted or minimally impacted, such as Transient Occupancy Tax, intergovernmental revenue (except for Property Tax in Lieu of Vehicle License Fees, which has been included in this analysis as a separate line item) and transfers of revenue from other funds. The draft General Plan update does provide for lodging, however, and if this use is developed during the planning horizon, there would be additional revenue available to the Town beyond that estimated in this Memo.

Table 3: Town of Loomis 2019 Service Population Estimate

Population Category	Labor Force & Commute Patterns		Resident-to-Employee Equivalencies	Service Population
	Number	Distribution	Weighting ¹	
Town Resident Characteristics²				
Not in Labor Force/Unemployed ³	3,741	55%	100%	3,741

(1) Distribution of Town residents employed in Loomis according to the US Census LEHD On the Map, 2019.

(2) Workday weighting based on percent of annual number of 'waking' hours (5,840 = 16 hours * 365 days) relative to time at job (2,000 = 40 hours * 50 weeks)

The analysis employs data from several sources, including:

- Town of Loomis Final Budget FY 2021/2022
- Town of Loomis Final Budget FY 2018/2019
- The Bureau of Labor Statistics
- US Census Bureau (2019, ACS 1-year estimates)
- US Census *LEHD On The Map*
- CoStar
- RedFin
- Zillow

3. General Plan Update Fiscal Revenue

The analysis of fiscal revenue generated under the updated General Plan is based on the Town's Preliminary Budget for Fiscal Year 2018-19, which allows for a pre-pandemic budget analysis. This year was also used because data used to determine service population is also available for the year 2019. The analysis considers the General Fund. The methodology used to estimate fiscal revenue varies by revenue category, as shown below in Table 5. Revenue items analyzed comprise 95 percent of the total General Fund, and items not analyzed comprise 5 percent. Further discussion of the estimation methodology for each revenue item is continued in the sections below.

Table 5: Loomis General Fund Revenue Summary and Estimating Factors

Revenue Category ¹	FY 2018-2019	
	Actual	Estimating Methodology
Property Tax ²	\$1,222,574	11.00% of 1% property tax on assessed value
Property Tax In-Lieu of VLF ³	\$700,728	relative share of total assessed value
Sales Tax ⁴	\$1,942,967	1.00% of taxable sales
Real Property Transfer tax	\$44,771	not analyzed
Transient Occupancy Tax	\$15,085	not analyzed
Franchise Fees	\$269,325	\$37.70 per new service population
Licenses and Permits	\$234,855	\$32.88 per new service population
Revenue from Other Agencies ³	\$11,882	not analyzed
Investment Earnings	\$101,529	not analyzed
Other Sources of Funds	\$51,343	not analyzed
Total City Operational Budget	\$4,595,059	
Budget Items Analyzed	\$4,370,449	
% of Total Budget	95%	
Budget Items Not Analyzed	\$224,610	
% of Total Budget	5%	

Source: Town of Loomis Final Budget FY 2018-2019; AECOM

(1) Includes the revenue categories that comprise the Town General Fund.

(2) Property Tax includes Secured, Unsecured, and Supplemental property categories listed in the Town of Loomis adopted budget

(3) Property Tax In-Lieu of VLF separated out of the Revenue from Other Agencies category.

(4) Sales Tax includes sales and Use Tax and 1/4 Cent Transaction Tax categories listed in the Town of Loomis adopted budget.

Property Tax Revenue

Property taxes are based on the assessed value of land and on-site improvements. To approximate future assessed taxable value for this analysis, AECOM estimated property value for each land use using assumptions based on market research, such as recent sales transactions in the local market. As shown on Table 6, property value per land use is estimated for the year 2022. Property values are escalated by a 2.0 percent annual growth rate over the 20-year period.

Error! Reference source not found. shows the 20-year estimated assessed value associated with the General Plan new development assumptions and according to the planning horizon (see Appendix). Table 8 shows the property tax generated per year, calculated at 1 percent of estimated assessed value with 11 percent allocated to the Town's General Fund. The 20-year tax revenue estimate assumes that property value will escalate by 2 percent annually, the maximum increase in property tax assessment allowed under California Proposition 13.² The estimate is shown on Table 8 and totals \$17 million in nominal terms with a Net Present Value of \$10 million to the General Fund.

² If ownership of the property or any portion of the property changes during this time period, the property would be reassessed based on the transaction value, which would likely result in greater assessed value than under the assumed 2 percent maximum increase. In this event, revenues generated for property tax and property tax in-lieu of motor vehicle license fee (ILVLF) would likely be greater than the revenues estimated in **Error! Reference source not found.** and Table respectively.

(1) Loomis Final Budget for 2021-2022 states that property values are likely to continue to increase in the 2.0%-3.0% range. This analysis assumes the conservative annual increase of 2.0%

(2) Single family residential estimate based on sales prices of single family homes over the last two years.

(3) Multifamily residential values based on transaction sales prices of multifamily developments around Loomis at densities between 12-25 DUAC.

(4) Based on sales transactions in and around Loomis for similar land uses over the last two years.

(3) Net Present Value assumed discount rate of 3.12%

Property Tax in-lieu of Motor Vehicle License Fee Revenue

Revenue from Property Tax In-Lieu of Vehicle License Fees (ILVLF) is estimated by applying the proportional increase of Project assessed value relative to total Town assessed value to budgeted ILVLF revenue in the Town's Budget for Fiscal Year 2021-22. The total assessed value of all land uses in 2040 is brought to 2022\$ using a discount rate of 3.12 percent. Table 9 shows the derivation of the base year estimate of approximately \$830,000. Table shows the 20-year value of \$6.5 million in nominal terms, equivalent to a Net Present Value of approximately \$4.2 million in Property In-Lieu of VLF revenues.

Sales Tax Revenue

Sales tax revenue is based on estimates of taxable sales generated by new residents and employees resulting from the projected land use program.

The forecast of new sales from residents is based on estimates of household income, spending on taxable items, as shown in Table 7. AECOM estimated household incomes based on market-rate rents and home values for the Loomis area. Project households are estimated to earn between approximately \$82,000 and \$125,000, which translates into approximately \$25,000 to \$37,000 in annual taxable spending per household. Table 12 shows the estimated taxable expenditures from new households, and an AECOM assumed that 25 percent of total taxable expenditures will be captured by retailers located in the Loomis. Town of Loomis General Fund receives 1 percent of taxable sales, which results in an estimate of approximately \$1.4 million in sales tax revenues from new households over 20 years.

Table 7: Taxable Sales from New Residents per Household

Unit Type by Land Use Category	2022				
	Monthly Housing Costs /Unit ¹	Estimated Annual Housing Costs	Estimated Household Income ²	Taxable Spending as % of Income ³	Annual Taxable Expenditures /Household
Low-Density Residential (single family residential)	\$3,591	\$43,093	\$123,122	30%	\$36,937
Higher-Density Residential (multifamily)	\$2,400	\$28,800	\$82,286	30%	\$24,686
Mixed Use Office Residential (multifamily)	\$2,400	\$28,800	\$82,286	30%	\$24,686
Mixed Use Retail Residential (multifamily)	\$2,400	\$28,800	\$82,286	30%	\$24,686

(1) Approximate rent based on comparable market-rate multifamily developments in and around Loomis from CoStar. Single family residential based on mortgage payment and property taxes for a \$900,000 home with 10% down payment and 30 yr 4% fixed rate.

(2) Calculated by assuming housing costs represent % of household income

(3) Based on average expenditures of all consumer units according to the 2019 BLS Consumer Expenditures report .

The forecast of new taxable sales from the new retail area in

Table 8. At an assumed \$350 in sales per square foot for regular retail area and \$700 sales per square foot for regional retail (assumed to be a Costco), the retail uses are estimated to generate \$5.5 billion in taxable sales over 20 years. Table 14 shows the potential taxable sales generated by new employees in Loomis who live outside of Town Limits—estimated 90% of workers live outside of Loomis. It is further assumed Loomis could capture 10 percent of spending from the 1,210 new in-commuting employees assumed under the General Plan update, or \$26.5 million in taxable sales over 20 years. Together, the new retail and new employees will generate \$5.6 billion in taxable sales over 20 years.

The 20-year estimate of sales tax revenue, combining contributions from new residents, new retail area, and new employees, is shown on Table 10 and totals \$56 million in nominal terms and a Net Present Value of \$37 million. This assumes that 1% of taxable sales will go to the Town of Loomis General Fund, according to allocation of sales tax funds per Placer County website.

Source: Costco; AECOM

(1) Costco Annual Report 2021 reported an average \$217 million in sales per warehouse, equating to about \$1,400 in sales per square foot. Most grocery and food items are non-taxable in California. Costco reported approximately 53-56% of sales came from Dry Foods and Sundries and Fresh Foods categories over the last 3 years. About 3 percent of these sales come from alcohol, which are taxable. This analysis assumes 50% of Costco sales are non-taxable, resulting in \$700 per square foot in taxable sales. This estimate is increased annually at a 3.12% inflation rate.

(2) AECOM estimate; increased annually at a 3.12% inflation rate.

Licenses and Permits Fees

License and permit fees include business licenses, building permits, animal licenses, and parking permits. AECOM estimated revenue from these sources using a per-service population basis. As shown on Table 11, the base year revenue estimate comes to approximately \$32.88 per capita. For the 20-year estimate of licenses and permits fees revenue in both nominal and net present value terms, see Table 15.

Franchise Fees

Franchise Fees are paid by utility providers in the Town of Loomis for the right to operate within the Town limits and use of the Town's infrastructure to deliver services to customers. AECOM estimated Project-based revenue from these sources using a per-capita service population basis. Table 13 shows that the project will generate approximately \$37.70 in franchise fees per capita in the base year. For the 20-year estimate of franchise fee revenue in both nominal and net present value terms, see Table 15.

Total Estimated Fiscal Revenues

The total estimated fiscal revenues generated under the General Plan update are summarized in Table 15. Per Capita revenue estimates for 2019 for Business License and Permits and Franchise Fee revenues were escalated brought to 2022\$ using a 3.29-percent inflation rate that is based on the CPI compound annual growth rate between 2019 and 2022. For revenues beyond 2022, the revenue estimates were escalated by a rate of 3.12 percent to reflect 10-year average inflation rates based on historical BLS data. Over the 20-year planning period, the gross revenues generated from assumed land use changes will have an estimated net present value of approximately \$52.3 million.

4. General Plan Update Fiscal Expenditures

The analysis of fiscal expenditures generated under the General Plan update is based on the Town's Actual Expenditures reported for Fiscal Year 2018-2019 and uses a per-service population approach, which is widely used for planning-level fiscal analysis. The approach assumes that fiscal costs generated are proportionate to the "service population." (As noted earlier, the derivation of the Town service population is shown in Table 3 and General Plan update service population in Table 4.)

The assumptions used to forecast expenses for each expenditure category are summarized in Table 16. The expenditures analyzed include those associated with the funds that comprise the Town of Loomis General Fund. For this analysis the Non-departmental expenditure category is the only category not analyzed and represents less than 1 percent of the total General Fund Revenues.

For most expenditure items, the analysis assumes a portion of the budgeted cost is fixed and not variable with respect to service demand. These costs may include capital equipment with additional capacity and salaries of core personnel. Other expenditure items are assumed to be variable with respect to service demand. These may include salaries where new FTEs are typically added to address service demand. The fixed- and variable-cost assumptions for each expenditure item, shown in Table 16, are based on AECOM experience with similar projects.

Historically, Town of Loomis General Fund expenditures generally fluctuated between \$3,000,000 and \$5,000,000 between 2008 and 2022 as shown in Figure 2. Although some years experienced YOY decreases in annual expenditures, the average YOY growth rate for this period was 5.48%. This analysis assumes a 5.5% growth rate in expenditures.

Figure 2: Historical Expenditures for Loomis General Fund

Source: Town of Loomis; AECOM

As shown in Table 16, estimated base year fiscal expenditures are shown on a per-service population basis for 2022. The estimated base year fiscal costs are projected over the 20-year period according to the absorption population absorption schedule (see Appendix), starting in 2023, using a 5.5% percent growth rate to reflect historical growth rate of expenditures. As shown in Table 22 the estimated fiscal cost of serving development under the General Plan update over 20 years totals \$20 million in nominal terms (approximately \$12.4 million in net present value).

(1) Cost estimate for 2019 brought current to 2022\$ using an expenditure growth rate of 5.5% which reflects the average annual increase for Loomis Genreal Fund expenditures between 2008 and 2022.

(2) Net Present Value assumed discount rate of 3.12%

5. Net Fiscal Impact

As shown in Table 18, fiscal revenues from 20 years \$80.7 million (\$52.3 million NPV) less fiscal expenditures of \$19.95 million (\$12.44 million NPV) yields a fiscal surplus of \$60.7 million (\$39.8 million NPV) to Town of Loomis Operating Budget.

Table 18: Total 20-Year Net Fiscal Impact

#	Year	Gross Revenues	Less City Expenditures	Net Fiscal Impact

(1) Elementary School omitted because it is not a taxable land use.

GENERAL AND LIMITING CONDITIONS

AECOM devoted effort consistent with (i) the level of diligence ordinarily exercised by competent professionals practicing in the area under the same or similar circumstances, and (ii) the time and budget available for its work to ensure that the data contained in this report is accurate as of the date of its preparation. This study is based on estimates, assumptions, and other information developed by AECOM from its independent research effort, general knowledge of the industry, and information provided by and consultations with the Client and the Client's representatives. No responsibility is assumed for inaccuracies in reporting by the Client, the Client's agents and representatives, or any third-party data source used in preparing or presenting this study. AECOM assumes no duty to update the information contained herein unless it is separately retained to do so pursuant to a written agreement signed by AECOM and the Client.

AECOM's findings represent its professional judgment. Neither AECOM nor its parent corporation, nor their respective affiliates, makes any warranty, expressed or implied, with respect to any information or methods disclosed in this document. Any recipient of this document other than the Client, by their acceptance or use of this document, releases AECOM, its parent corporation, and their affiliates from any liability for direct, indirect, consequential, or special loss or damage, whether arising in contract, warranty (express or implied), tort, or otherwise, and irrespective of fault, negligence, and strict liability.

This report may not be used in conjunction with any public or private offering of securities, debt, equity, or other similar purpose where it may be relied upon to any degree by any person other than the Client. This study may not be used for purposes other than those for which it was prepared or for which prior written consent has been obtained from AECOM.

Possession of this study does not carry with it the right of publication or the right to use the name of "AECOM" in any manner without the prior written consent of AECOM. No party may abstract, excerpt, or summarize this report without the prior written consent of AECOM. AECOM has served solely in the capacity of consultant and has not rendered any expert opinions in connection with the subject matter hereof. Any changes made to the study, or any use of the study not specifically identified in the agreement between the Client and AECOM or otherwise expressly approved in writing by AECOM, shall be at the sole risk of the party making such changes or adopting such use.

This document was prepared solely for the use by the Client. No party may rely on this report except the Client or a party so authorized by AECOM in writing (including, without limitation, in the form of a reliance letter). Any party who is entitled to rely on this document may do so only on the document in its entirety and not on any excerpt or summary. Entitlement to rely upon this document is conditioned upon the entitled party accepting full responsibility and not holding AECOM liable in any way for any impacts on the forecasts or the earnings from the project resulting from changes in "external" factors such as changes in government policy, pricing of commodities and materials, price levels generally, competitive alternatives to the project, the behavior of consumers or competitors, and changes in the owners' policies affecting the operation of their projects.

This document may include "forward-looking statements." These statements relate to AECOM's expectations, beliefs, intentions, or strategies regarding the future. These statements may be identified by the use of words like "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "project," "will," "should," "seek," and similar expressions. The forward-looking statements reflect AECOM's views and assumptions with respect to future events as of the date of this study and are subject to future economic conditions and other risks and uncertainties. Actual and future results and trends could differ materially from those set forth in such statements due to various factors, including, without limitation, those discussed in this study. These factors are beyond AECOM's ability to control or predict. Accordingly, AECOM makes no warranty or representation that any of the projected values or results contained in this study will actually be achieved.

This study is qualified in its entirety by, and should be considered in light of, these limitations, conditions, and considerations.
