NOTICE

SLURRY SEAL RESURFACING

STREET CLOSURES

[No DRIVEWAY ACCESS FOR 1-2 HOURS]

8am- 6pm

See the map on the back for closure details.

Parking restrictions along the blocks may begin as early as 7 AM, to allow for prep work and street sweeping although closures won't go into effect until 8 AM. **Please see the "No Parking" barricades posted along the block for exact parking restrictions and dates**. Any vehicles parked on the street during the posted work hours will be towed at the vehicle owners' expense.

Your street will need to be CLOSED to traffic to complete the slurry seal work. To prevent the tracking of oil, vehicle traffic will not be allowed on the street, except emergency vehicles.

Under normal weather conditions, your block will re-open within 1-2 hours after the slurry seal has been applied. We will re-open the street to traffic sooner if the micro-surfacing has cured. Please DO NOT attempt to exit your driveway until allowed, as the oil will be fresh and can get onto your car. All streets will be reopened to traffic by 6:00pm.

Dates may be subject to change due to factors out of our control, such as rain, cold temperature, and equipment breakdown. **If the slurry seal is not completed on the day scheduled, No Parking signs will be updated with new dates.**

Thank you for your cooperation and patience.

Slurry Seal Resurfacing . . . It Makes a Difference
