City Manager's

Budget Message

EXECUTIVE OVERVIEW

Fiscal Summary

The City of Lowell's fiscal outlook is positive due to conservative fiscal management and adherence to the City Council's Strategic Master Plan. With the recent commercial development experienced in 2018-19 and approved residential developments coming online in the upcoming fiscal year, the City should continue to experience an upward trend.

Over the last three years the City has accomplished a number of set goals, all while increasing the City's General Fund Unobligated Fund balance to a healthy level. The current unobligated fund balance increased \$265,235 to \$786,133, which equates to 40.9% (up from 17% in 2016) of the annual operating expenses for the City. This is an indicator that the City is in much better position to deal with unexpected needs that may arise. The increased Fund Balance will also allow the City to fund future capital expenses on the horizon. In the 2019-20 fiscal year the City will undertake an Asset Inventory and Management Plan for its General Fund as it did for the Water and Sewer Fund this current fiscal year. The plan ensures the City's assets are used in the most efficient manner.

The sustainability of the Water and Sewer Enterprise Fund has been a major focus of the City Council. This self-sufficient fund may not be supported by tax dollars but by user fees. It was imperative to develop a plan to address the maintenance and capital improvements necessary to ensure the City could continue to provide water and sewer service to its customers well into the future. In 2017 the City Council commissioned a Capital Improvement Plan (CIP) along with a Utility Rate Study, both of which were adopted. This 10-year plan provides the blueprint to meet our current and future needs, while the rate study provides the recommended means to fund the CIP.

The City continues to be aggressive in seeking grant funding and will continue to do so. In this upcoming fiscal year, the City will be administering two Community Development Block Grants (CDBG) awarded to the City in the first quarter of 2019. One grant for \$750,000 will fund home repairs for low/moderate income qualified applicants while \$155,000 will fund repairs to our Community Center. The other CDBG grant for \$2,000,000 will fund much needed sewer line replacement projects in the City. The sewer line replacements will also reduce Inflow/Infiltration (I&I) that will reduce the burden on the Waste Water Treatment Plant.

The City's total long-term debt across both major funds decreased \$124,307 last fiscal year to only \$170,088. This is an extremely low debt service number and equates to about \$43 per person in the City. The City will utilize some of this debt capacity this fiscal year for needed capital items with long useful lives. The city's great fiscal standing and bond rating permit low interest rates. The use of debt financing for capital or infrastructure projects is justified by the benefits received principle, meaning that capital expenditures that will provide benefit over many years will benefit future users as well as current taxpayers, so the cost of the public investment should be borne by both. Using a portion of a taxpayer's dollars to pay off the debt for the capital expense is one way to ensure that future taxpayers bear their fair share of the cost. A list of capital projects is included in the budget document.

Key Operational Focus Areas

The FY2019-20 budget addresses a range of operational needs with a specific focus on the following:

- Public Safety Maintaining adequately staffed and trained Police Officers. Equip them with the necessary tools to perform their jobs at the highest level
- Asset Inventory and Management Plan for both General Fund and Water and Sewer Fund To ensure the General Government and Proprietary funds continue to provide a high level of service well into the future and prepare now for future needs so we

are well equipped to handle them.

- Maintaining streets, roads, and public facilities—Well- maintained streets, roads, parks and recreation facilities help protect property values and maintain Lowell's quality of life. It is fiscally responsible to maintain our streets, roads, and public facilities now, so they don't deteriorate and become more costly to fix in the future
- Strengthening the Local Economy Programs that retain, attract, and help expand localbusinesses in Lowell are important to creating a diverse and vibrant economy
- Improving our Utility Billing Efficiency -The Meter Replacement Project will be underway in 2019. This project will improve productivity, reduce reading errors, reduce staff time, reduce water loss and reduce water purchase cost.
 - Land Use Planning To ensure the highest and best use for future development in Lowell. To promote the efficient use of land and encourage uses that promote and improve the quality of life for Lowell and its residents.

Revenue

This fiscal year will see the results of a property reappraisal by Gaston County. The key to understanding the reappraisal process is distinguishing the difference between tax base (your property value) and the tax rate (the rate at with you are taxed on your property value). Counties are required by General Statute to conduct reappraisals at least every eight years. Gaston County conducted a reappraisal in 2019 and the last reappraisal in Gaston County was conducted in 2015. When a reappraisal occurs, the tax base changes because real property values are pegged back to market value. When a tax base changes and the tax rate remains unchanged, a change in revenue is also experienced, whether that be positive or negative. Lowell saw a decrease in 2015 revenues after the reappraisal and will realize an increase in 2020 due to an increase in property values. A revenue neutral tax rate is intended to show the tax rate that would keep the local government's revenue neutral given its new tax base.

To calculate the revenue-neutral tax rate, you first determine a rate that would produce revenues equal to those produced for the current fiscal year and then increase the rate by a growth factor equal to the average annual percentage increase in the tax base due to improvements since the last general reappraisal. This growth factor represents the expected percentage increase in the value of the tax base due to improvements during the next fiscal year. In Lowell the total assessed value increased from \$250,920,936 to \$283,655,610. It will not be known until the end of the upcoming fiscal year the true evaluation because the appeal process is still underway, which will ultimately reduce the total evaluation number but close to the current evaluation total. No tax rate increase is being proposed and it is recommended to maintain the current tax rate at 43 cents per \$100 of valuation. Because of the increase in property values the city will realize an increase of approximately \$146,247 in ad valorem property taxes. The revenue neutral tax rate is 40 cents per \$100 of evaluation.

Department Highlights

The City of Lowell Staff continues to provide a high level of service to Lowell residents. We have a dedicated group of public servants that care about the community. If you want to see results you must invest in your employees. The City is focused on providing our staff with the necessary tools to complete their jobs as efficiently as possible.

This proposed budget includes a 2.5% cost of living adjustment for all employees to maintain a

competitive advantage in the marketplace. This is also a recommendation of the personnel policy.

The City will see an increase in retirement expenses for the employees. The NC State Retirement System increased the City's contribution percentage. This increase will cost the city an additional \$12,243 this fiscal year.

Administration

Personnel	\$316,862
Operations	\$269,016
Capital Debt Service	0
Total	\$585,878

Administration expenses are projected to increase \$26,231 from the prior fiscal year. Administration encompasses a wide range of activities including Council expenses, Manager, Finance, Human Resources, Planning, Beautification and other general expenses.

Public Safety

Personnel	\$601,121
Operations	\$144,604
Fire Dept.	\$209,700
Capital Debt Service	\$33,000
Total	\$988,425

Public safety makes up almost half of the Lowell fiscal year budget at 46% (Police 36% and LVFD 10%). The highlights for the police department are the upcoming capital expenditures. This budget proposes two additional patrol cruisers to replace 2011 models. The existing vehicle fleet was poor in 2016 which resulted in extremely high vehicle repair bills as well as keeping vehicles out of service for repairs. We have replaced 5 of the 9 police cruisers over the last 3 years and continuing to replace the aging vehicles will reduce repair cost and keep our officers safe with cars with new safety features. We will continue to obtain the vehicles through the enterprise lease program which do date has

proven beneficial.

The Police Department will need to replace all their mobile emergency response radios as the County has moved to the 800MHz frequency rendering our existing radios obsolete and unusable. They will need to purchase 10 mobile radios and 10 portable radios for the vehicles. The cost from the preferred vendor Motorola is \$63,246. We have sought competitive financing rate and have received a rate offer (3.3%) which is lower than the rate the County secured.

The Police Department also desperately need new computers for the vehicles as well as for the office. The current computers are still functioning on the Windows XP platform and they are no longer supported. This expense is estimated to be \$20,000.

A change in this budget is the relocation of the LVFD expense from Administration to Police with the new department title of Public Safety. The Fire Department requested no increase in the upcoming fiscal year therefore the expense remained flat at \$209,700.

Public Works

Personnel	\$125,560
Operations	\$168,100
Capital Debt Service	\$5,332
Total	\$298,992

Public Works provides a variety of services that meet the needs of our citizens every day from streets to grass maintenance. Salaries saw and increase as the grass cutting has been brought back in house and the vacant ninth position was filled.

The purchase of a new F-150 service truck is included in the budget and the anticipated debt service payment is included at \$5,332.

It is anticipated that a new back-hoe will be needed. This is a large capital expenditure we are planning for in the 2020-2021 fiscal year.

Personnel	\$144,563
Operations	\$110,743
Capital Debt Service	0
Total	\$255,306

The Sanitation Department is partially supported by fees with the remainder supported by tax dollars. No fee increase is recommended this year. The department saw the addition of recycling in 2019. This budget continues to fund the recycling center which has been a huge success to date. Zero contamination has been seen once the addition of security equipment was implemented.

The long-range plan has the department needing a new Trash Truck in the 2020-2021 Fiscal year, so we are planning ahead for that large capital purchase.

Parks and Recreation

Personnel	\$55,562
Operations	\$90,700
Capital Debt Service	0
Total	\$146,262

Parks and Recreation is much more than athletics and the department has grown to provide a broad range of offerings to increase the quality of life for our residents. Parks and recreation is essential to create a sense of place and community people so commonly desire.

The largest expense line item is for Special Events. This expense is offset by the revenue that is projects from the events as well as the sponsorships that the new staff has been successful in recruiting to help pay for the events.

Water and Sewer Fund

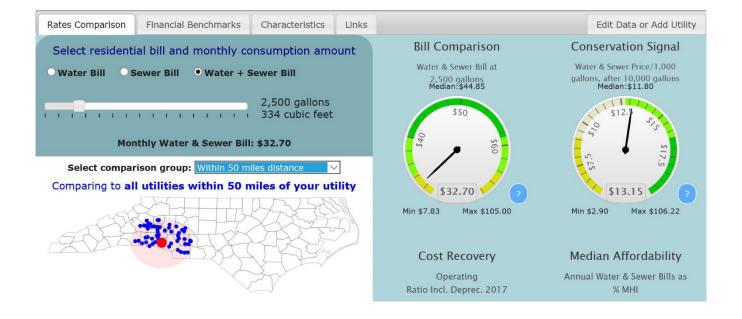

Water and Sewer	
Personnel	\$320,256
Operations	\$663,327
Capital Debt Service	\$42,000

Sanitation

Sub-Total	\$1,025,583
Waste Water Treatment	
Personnel	\$48,000
Operations	\$175,196
Capital Debt Service	\$8,704
Sub-Total	\$237,604
Total	\$1,263,187

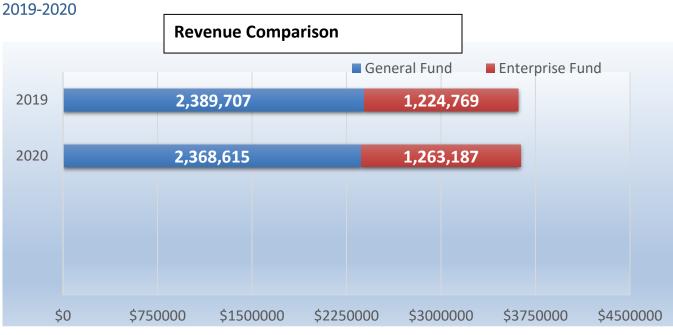

To cover rising costs and meet the demands of the Capital Improvement Plan a 3% increase in water and sewer rates is recommended per the adopted rate study. The capital expenditures required are a new Utility Service truck and a new Pump and the Waste Water Treatment Plant. The debt service payments for those items is estimated at \$50,704. while the 3% rate increase will realize approximately \$35,000 to offset part of the new debt service.

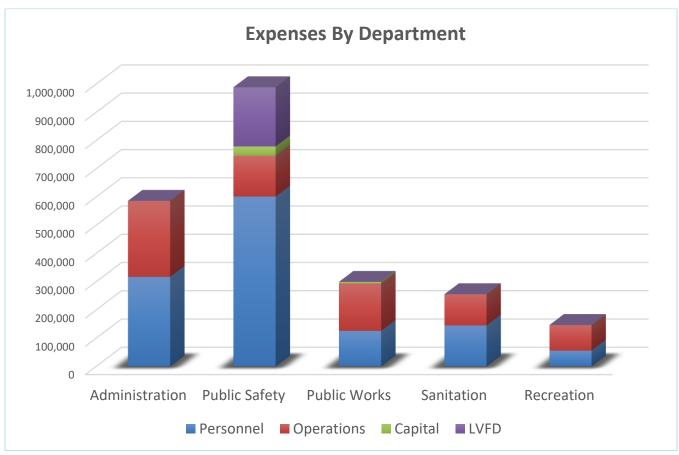

The City of Lowell's current rates even after recent rates increases are amongst the lowest in the State of North Carolina. Below is a diagram that compares Lowell's average water and sewer bill against all other cities within a 50 miles radius.

The Chart above compares an average water and sewer bill (based on the average consumption of 2,500 gallons) with all other towns within a 50 mile radius of Lowell. The average cost of water and sewer per month is \$44.85 and in Lowell that same amount of water would cost \$32.70 which is \$12 below the average.

Current Financial Analysis

On the following page are the results of an economic analysis performed by City Staff to provide a snapshot of Lowell's overall financial health

This matrix is a quantitative look at the current financial condition of the City of Lowell. This analysis looks at the key indicators of financial health and compares us with other cities of similar size. This provides helpful benchmarking data to evaluate our financial health on a year to year basis to ensure financial stability. The highest possible score indicating the strongest financial position is 20 and the City of Lowell's score of 12 indicates an overall healthy financial condition. The areas in which the City scored in the top 75%-100% are highlighted in green. The scores highlighted in yellow show the areas that should be closely monitored and make changes if needed to ensure these areas trend toward a healthy condition.
