

Special Needs Assistance Program (SNAP)

Lucas Fire Rescue has partnered with Special Needs Assistance Program (SNAP). SNAP is a database that enables Lucas Fire Rescue to register residents with special needs so we can better plan and respond to disasters.

Who is considered a special needs resident? – Anyone who has a special condition that might require assistance in the event of an emergency or disaster is considered a special needs resident.

What data is collected? – The information collected includes the name, gender, age, weight, address, primary language, and specific special need of the registrant. Examples of other information can be provided including the use of aids such as a walker or cane, crutches, a wheel chair, a guide dog, oxygen, or a life support system. The Tarrant County Office of Emergency Management maintains this database. Registrants' data is kept confidential and can only be accessed by authorized personnel of Lucas Fire Rescue.

Registering for SNAP – To register for SNAP, visit www.snapforyou.org, or if you do not have internet access you can have a family member, friend, or a caretaker register for you.
