Blondy Jhune Bridges Construction Update #9

Dear All,

This week all eight west bridge drill shafts were placed, and the concrete was poured.

As traffic detours from Blondy Jhune to the White Rock Trail detour, some of the neighbors have seen large trucks cutting the corners and not turning correctly. Please be sure to let me know about any issues relating to this. If you live on a corner, please consider documenting with a photo that there is no damage. There will continue to be a lot of large vehicles travelling the detour with the construction taking place at the bridges, in Tokalaun, and in Cross Creek.

Before

After

Sincerely,

Stanton Foerster, PE
Public Works Director/City Engineer
