Blondy Jhune Bridges Construction Update #16

Dear All,

This week the contractor, design engineer, and the city staff have resolved a few issues involving some erroneous survey work and plan interpretations. The project was stopped for about two weeks while the issues were ironed out and fixed. The work is back to full swing. Both bridges are being prepared for the decking pieces, and the slabs will be poured soon. All but two retaining walls have been poured.

In the photo above, the contractor is placing blue bracing members along the right side of the photo to support the deck pieces. The pieces fit together like large Legos.

If your driveway is impacted by the project, please contact me to verify we have your driveway plans correct.

The contractor is planning make up some of the lost time, and the estimated bridge openings are still scheduled for mid-May 2017.

Sincerely,

Stanton Foerster, PE
Public Works Director/City Engineer
