SUBJECT: Public Hearing and Adoption of the Ross Valley Watershed Flood Risk Reduction Program Storm Drainage Fee Update Report in Flood Control Zone 9, Supervisorial District 2

Dear Board Members:

RECOMMENDATION: 1) Conduct a public hearing, consider protests, if any; 2) Adopt the 2021 Flood Control Zone 9 Fee Update Report; and 3) Increase individual fee amounts by 3% from the 2020 Flood Control Zone 9 Fee Update Report.

SUMMARY: The Ross Valley Flood Protection and Watershed Program (Program) is predicated on a unified, regional, multi-objective approach to finding effective and environmentally sensitive solutions to flooding and watershed-related management issues in the Ross Valley. On July 17, 2007, your Board approved the levying of a fee to contribute funding toward the above program. A ballot measure approved by the property owners on June 25, 2007, and the ordinance passed by your Board on July 17, 2007, allow for a 0% to 3% increase in individual fee amounts. Staff recommends fees be increased 3% this year to keep pace with increases in Labor and construction costs. From June 2020 to June 2021, the average monthly unadjusted Consumer Price Index for all Urban Consumers increased by 3.2%[1] for San Francisco / Oakland / Hayward area and increased by more than 5%[2] when averaged across all U.S. Cities.

Although the 2021 Flood Control Zone 9 Fee Update Report describes potential program and project activities over the fiscal year period from July 1, 2021 through June 30, 2022, below is summary of most recent accomplishments from use of fee revenue received to date:

- July 2019 – Executed 5-year Cooperative Funding Agreements with Ross Valley Municipalities for Creek Maintenance (maximum of $75,000 made available to each municipality over a 5-year period)
- December 2019 – Transitioned the USACE/District Corte Madera Creek Flood Risk Management Project (CMCFRM) to a locally led District project
- December 2019 – Completed the Lower Corte Madera Creek Local Levee Evaluation partially reimbursed through Department of Water Resources (DWR) Prop 84 grant

[1] *https://www.bls.gov/regions/west/news-release/consumerpriceindex_sanfrancisco.htm#tablea (accessed 7/13/2021)*
[2] *https://www.bls.gov/news.release/cpi.t05.htm (accessed 7/13/2021)*

- August 2020 – Executed $910,000 Cooperative Funding Agreement with City of Larkspur for Pump Station and Storm Drain Improvements in the Hillview Neighborhood (City awarded the Construction Contract in June 2021)
- November 2020 – Completed Phase 1 of the San Anselmo Flood Risk Reduction Project (SAFRR) Sunnyside Basin
- February 2021 – Released the Draft Environmental Impact Report for CMCFRM
- June 2021 – Submitted application to California Department of Fish & Wildlife to renew programmatic stream maintenance permit

These are major project milestones that we plan to bring to your Board over the next two years:

- San Anselmo Flood Risk Reduction Project
  - *Sunnyside Basin Phase 2 Construction (Summer 2021 to late Summer 2022)*
  - *Downtown Flood Mitigation Construction (Summer to Fall 2022)*
- Corte Madera Creek Flood Risk Management
  - *Release Final Environmental Impact Report (late Summer 2021) and*
  - *Construction (Summer to Fall 2022)*
- Town of Ross Winship Avenue Bridge Replacement – Construction (2023)

Project level information and timing for upcoming public meetings can be found on the program website at *rossvalleywatershed.org*.

By State law, a professional engineer must submit an annual report that explains the methodology for calculating the fee and calculates the fees to be charged to each property by updating the fee list to incorporate any changes to parcel status. Parcel status updates reflect changes in the use code, parcel size, and/or square footage of improvements. The fee for each property is related to how much stormwater runoff it generates. The District retained the services of Kristin Lowell, Inc., to prepare this report and fees. Only parcels that were included in the election of 2007 are included in this annual report as required by Article XIIID, Section 6 of the State constitution (Proposition 218). If written protests against the Storm Drainage Fees are presented by a majority of affected property owners (those upon whose property a Storm Drainage Fee would be imposed), then the report shall not be adopted and the charges shall be collected separately from the tax roll and shall not constitute a lien against any parcel or parcels of land. A copy of the report containing the proposed owner's listing and fee amounts is available for review online at *rossvalleywatershed.org*.

EQUITY IMPACT: Reducing flood risk through programs and projects funded by the proposed fee increase will reduce historic impacts to members of the community which live, work, shop, recreate, and travel within the boundaries of the Ross Valley Watershed. During large flood events the public road right-of-way as well as emergency services are often temporarily affected thus impacting the community served by those services. The proposed fee increase continues to fund projects which reduce flood risk to homeowners, renters, local government facilities, and businesses and their employees.

Flood-prone businesses are subject to temporary or permanent closures following large flood events, which impacts business owners as well as employees of those businesses. Reducing availability of employment following flood-damage related business impacts is likely to result in increased unemployment rates. Per Employment Development Department 2019 year and preliminary December 2020 data, the Town of San Anselmo located at the center of the Ross Valley Watershed contained the highest percentage of unemployment compared to other City or Towns within Marin County limits[3]. Per Economic Policy Institute "State unemployment by race and ethnicity" for California during first quarter of 2020, unemployment rates by ethnic subgroups were first led by Black, then followed by Hispanic community members[4].

FISCAL IMPACT: There will be no net impacts to the General Fund Net County Cost as a result of your Board's actions. The requested fee amounts bring the estimated annual total to $2,639,894 for a net increase of $74,151 from the prior year fee revenue collected. This locally generated funding source provides the local match necessary to leverage State and local grants needed to fully fund the program. The fees are collected on the tax roll and deposited into Fund 3290 – Zone 9.

CERTIFICATES

The undersigned respectfully submits the enclosed Final Storm Drainage Fee Update Report as directed by the Board of Supervisors of the Marin County Flood Control and Water Conservation District.

Dated: July 9, 2021

TERRANCE E. LOWELL, P.E.,
For Kristin Lowell Inc.,
Engineer of Work

By Terrance E Lowell

I HEREBY CERTIFY that the enclosed Final Storm Drainage Fee Update Report was filed with me on the 27 day of July, 2021.

Diane Patterson, Assistant Clerk of the Board, County of Marin, California

By Diane Patterson

I HEREBY CERTIFY that the enclosed Final Storm Drainage Fee Update Report was approved and confirmed by the Board of Supervisors of the Marin County Flood Control and Water Conservation District, on the 27 day of July, 2021.

Diane Patterson, Assistant Clerk of the Board, County of Marin, California

By Diane Patterson

ENGINEER'S STATEMENT

This Report is prepared and submitted, as directed by the Marin County Flood Control and Water Conservation District Board of Supervisors ("District BOS"), pursuant to the Health and Safety Code Section 5473.1, as supplemented by Article XIIID Section 6 of the California Constitution.

The program which is subject of this report will be designed to:

> *Reduce damage due to flooding; maintain natural creek functions; reduce pollutants entering the Bay; incorporate habitat enhancements; and, improve fish passage.*

The duration of the storm drainage fee is for an additional six (6) years, terminating with fiscal year 2026/27, and an estimated budget for the program is set forth in Exhibit B. Fees will be subject to an annual increase of up to 3% per year as determined by the District BOS. Funding for the storm drainage improvements shall be derived from a property-based fee levied on each parcel that drains into the watershed. A detailed description of the methodology for determining the fee for each parcel is set forth in Exhibit C.

This report includes the following attached exhibits:

EXHIBIT A: Description of the program.

EXHIBIT B: The estimate of the program cost to be financed through the fee program.

EXHIBIT C: A statement of the method by which the undersigned determined the proposed storm drainage fee to be charged against each parcel, based on the relative stormwater runoff.

EXHIBIT D: A list of the names and Assessor Parcel Numbers of the owners of real property along with the proposed fee.

Respectfully submitted,

Terrance E Lowell

TERRANCE E. LOWELL, P.E.

ANNUAL UPDATE

In July 2007, the District BOS approved the levy of a storm drainage fee against those parcels that drain into the Ross Valley Watershed. The fee is to pay a portion of the annual costs for the flood protection programs, see Exhibit A for detail.

1. Every year the District BOS is required to approve an annual update report in order to levy the storm drainage fee for the following fiscal year.

2. Additionally, each year the District BOS may increase the fee by up to 3% to keep pace with actual program costs. For fiscal year 2021/22 the District BOS will increase the fee by 3%.

Please see Exhibit C for the fee methodology and rates.

EXHIBIT A: PROGRAM DESCRIPTION

History

The Ross Valley Watershed experienced flooding from a storm resulting in a 100-year flood on December 31, 2005. Engineers use that term to describe a storm that has a 1% chance of occurring in any given year, not a storm that occurs only once in 100 years. In fact, Ross Valley has experienced two 100-year storms since 1980 (1982 and 2005). Much of Ross Valley's drainage system currently provides a 6-year level of flood protection, meaning that it can be overwhelmed by a storm that has a 16.7% chance of occurring in any year.

The Ross Valley Flood Protection & Watershed Program (Program) is a multi-jurisdictional, regional effort with the Marin County Flood Control and Water Conservation District (District) as the lead agency. The Program is a partnership between the District, County of Marin, Towns of Fairfax, San Anselmo, Ross, and City of Larkspur along with the unincorporated communities of Greenbrae, Kentfield, Sleepy Hollow and Oak Manor. The overall goal is to substantially reduce the frequency and severity of flooding throughout the Ross Valley Watershed in an economically viable manner while prioritizing public safety and minimizing environmental impacts.

The Program's overall, long-range goal is to increase the existing 6-year level of protection to a 100-year level and it is currently organized around two phases of work to address flooding issues within the Ross Valley. Phase 1 of the remaining fee years (2019 – 2027), will continue the shorter-term target goal of between 10-year and 25-year level of flood protection. Phase 2 (2028 – 2050), depending on securing funding sources such as grants and a renewal of the storm drainage fee for the typically required local matching funds, will add additional measures to work toward achieving a target goal of 25-year to 100-year level of flood protection.

The District intends to meet the Phase 1 objectives through the following actions:

- Increase creek and floodplain capacity to convey floodwaters by:
    - Enlarging some channels through the removal, modification or replacement of existing obstructions to flow, such as structures or bridges
    - Containing flood flows as they move through the watershed
    - Conducting regular creek and channel maintenance
- Reduce and attenuate flows by increasing floodplain detention storage and stormwater infiltration
- Community flood education including flood preparedness real-time rain and stream monitoring, flood response checklists and information

The projects and studies featured within the Fiscal Year (FY) 2020 – 2021 Work Plan are reflective of the current Program goal and objectives. In FY 2021 - 2022 no new projects are being proposed and we are still proceeding consistent with the 2020 - 2021 Work Plan. Figure A (page 2) is a visual timeline of the projects and studies currently underway and part of the Program Work Plan.

Visit the Program website for the FY 2020 – 2021 Baseline Budget Report:
https://www.marinwatersheds.org/sites/default/files/2021-05/Z9%20Budget%20FY022-baseline.pdf

Figure A

Program Workplan is funded through a combination of funding sources including;

- Flood Zone 9 Storm drainage Fees
- State grant funds from the Department of Water Resources in support of the San Anselmo Flood Risk Reduction Project, Corte Madera Creek Flood Risk Management Project - Phase 1, and Local Levee Assistance Program for Lower Corte Madera Creek Improvement Study (additional grants are being pursued by project partners for Phase 2)
- Federal appropriations through the Army Corps of Engineers for the Corte Madera Creek Flood Risk Management Project (formally Army Corps of Engineers Corte Madera Creek Project, Units 2, and 3, and 4). Note: appropriations for new construction projects beyond 2019 are not anticipated
- County of Marin general fund (< $100k) to assist with ongoing maintenance and/or installation costs for the District led rain/stream gage program & alert system, and public engagement and outreach such as for the Community Rating System
- Federal Emergency Management Agency Hazard Mitigation Grant Program administered by the California Office of Emergency Services (e.g: as a funding source for residential home elevation grant applicants)

Proposed Projects and Program Activities

The Ross Valley Watershed Storm drainage fee, along with the other funding sources listed above, will support the continued development and implementation of the projects and activities outlined in the Fiscal Year 2021-22 Work Plan, described in more detail below. The District may explore financing options this fiscal year to ensure necessary cash flow is available during anticipated project construction. Please visit the Program website at www.RossValleyWatershed.org for the budget and more information.

1. **Corte Madera Creek Flood Risk Management Project**

   The objective of the project is to reduce peak flood flow water surface elevations while minimizing any downstream impacts; restoring sections of the existing concrete channel to provide more natural creek habitat and floodplain overflow areas where possible and improving fish passage through the concrete channel. In Fiscal Year 2021-2022, the locally led project will incorporate input from previous public workshops and community feedback to produce and circulate for comments a Final EIR and complete the CEQA process. Coordination with District Partners including Town of Ross, College of Marin, Friends of Corte Madera Creek, and regulatory agencies will continue to complete technical studies and finalize the project plans and specifications. The District will submit environmental permitting applications and seek US Army Corps of Engineers 408 approvals to modify the existing Corps project and plan for the project construction to begin in Spring of 2022.

   Learn more by visiting the project page:
   http://www.marinwatersheds.org/resources/projects/usace-corte-madera-creek-flood-risk-management-project

2. **San Anselmo Flood Risk Reduction Project**

   The objective of the project is to reduce both peak flows in Fairfax Creek and out-of-bank flow in San Anselmo Creek in concert with other flood risk reduction measures. In Fiscal Year 2021-22, the project will continue in design, permitting and construction of three project components: (1) Sunnyside Flood Diversion and Storage Basin at 3000 Sir Francis Drake Boulevard (Phase 2 Construction); (2) the removal of a building at 634-636 San Anselmo Avenue in San Anselmo, a structure that partially obstructs the flow of San Anselmo Creek; and (3) flood mitigation measures on downstream private properties that may see impacts from the project. Construction of the project started in 2019 and will continue in phases through 2023.

   Learn more by visiting the project page:
   http://www.marinwatersheds.org/resources/projects/san-anselmo-flood-risk-reduction-safrr-project

3. **Ross Valley Bridge Projects**

   The District will continue to work closely with the Towns of Ross, San Anselmo and Fairfax on final designs and environmental review for bridge modifications /replacements that will increase flow capacity in the creeks and reduce localized flooding. Nine (9) bridges were originally identified for replacement in the 10 Year Work Plan, seven (7) of which received Caltrans funding. The District has provided local matching funds for Design and CEQA

through local storm drainage fees and the towns will continue to provide project management. Five (5) of the bridge projects were approved for Caltrans funding (88.5%-100% funding by Caltrans) including:

- Azalea Avenue Bridge, Town of Fairfax

  [http://fairfaxbridges.com/about/azalea-avenue-bridge/]
- Madrone Avenue Bridge Replacement, Town of San Anselmo

  [https://www.sananselmobridges.org/Madrone]
- Nokomis Avenue Bridge Replacement, Town of San Anselmo

  [https://www.sananselmobridges.org/Nokomis]
- Sycamore Avenue/Center Boulevard Bridge Replacement, Town of San Anselmo

  [https://www.sananselmobridges.org/Center]
- Winship Avenue Bridge, Town of Ross

  [https://www.townofross.org/publicworks/page/winship-bridge-replacement-project]

Funding is currently being sought by the Towns for the replacement of the Bridge Avenue Bridge in the Town of San Anselmo and the Sir Francis Drake Boulevard Bridge in Town of Ross. Although Caltrans has placed funding of the bridge projects on hold the Towns are seeking funding sources to proceed in replacing the bridges.

4. Lower Corte Madera Creek Improvement Study

The Study provided a comprehensive assessment of the current condition of the levee and creek system downstream of the concrete channel and identified and provided recommendations for improvements including how to achieve the equilibrium channel dimensions for Corte Madera Creek (also known as the Geomorphic Dredge study). The Study considered potential project concepts that could be partially funded for final design and construction under the Department of Water Resources Local Levee Assistance Program or from other funding sources. In Fiscal Year 2019-20, the Local Levee Evaluation Study was completed and is available from the project page:

http://www.marinwatersheds.org/resources/projects/lower-corte-madera-creek-levee-evaluation

Work in Fiscal Year 2021-22 will continue to develop a future technical paper to describe the Geomorphic Dredge study.

5. Hillview Stormdrain and Pump Station Project

Led by City of Larkspur with Caltrans provided funding to the City for the pump station component, the proposed project includes drainage improvements in the Hillview neighborhood and seeks to minimize the need to perform sediment removal in Corte Madera Creek at existing storm drainage outfalls. Periodic sediment removal has been necessary in the past to provide pathways from these outfalls to the main creek channel

to properly discharge Hillview neighborhood drainage. The initial conceptual design to improve the drainage in the neighborhood was envisioned to redirect storm drains within Hillview Gardens to a new pump station on Bon Air Road being constructed through the City of Larkspur Bon Air Road Bridge Replacement Project. In Fiscal Year 2020-21 the District continued coordination with City of Larkspur on environmental review, final design, and construction planning and awarded the construction contract in June 2021 with construction planned for summer of 2022.

Learn more by visiting the project page:
http://www.marinwatersheds.org/resources/projects/hillview-pump-station-stormdrain-improvements

6. Annual Creek Maintenance Program

The District is continuing the annual creek maintenance program within unincorporated and incorporated areas in coordination with the municipalities to manage debris, sediment, and flow-inhibiting vegetation before the winter rainy season. The District may also continue to work with Ross Valley public agencies to facilitate local community creek cleanups.

Maintenance activities, including Town and City led efforts reimbursed by the Flood Zone 9, may occur on the following creeks: Corte Madera Creek concrete and earthen channel, Bothin Creek, Fairfax Creek, Larkspur Creek, Murphy Creek, Ross Creek, San Anselmo Creek, Sleepy Hollow Creek, Sorich Creek, Van Winkle Creek and connecting culverts, and City of Larkspur drainage ditches on publicly maintained lands near 600 Magnolia Avenue and 444 block of William Avenue. Stream maintenance programmatic permits are being renewed with CA Department of Fish & Wildlife in Fiscal Year 2021 and with the San Francisco Regional Water Quality Control Board in Fiscal Year 2022.

Learn more by visiting the activity page:
http://www.marinwatersheds.org/resources/projects/ross-valley-creek-conveyance-and-habitat-maintenance-program

Stream Maintenance Manual:

https://www.marinwatersheds.org/resources/publications-reports/marin-county-stream-maintenance-manual

7. Program Activities

Completing and/or updating necessary hydrology/hydraulic modeling, collecting finished floor elevation information, purchase of land for flood risk reduction purposes, storm and flood monitoring systems (such as creek/tide gauges, creek monitoring cameras, real-time website, public information), flood preparedness outreach, and overall program implementation and administration (such as obtaining and administering grants and bonds, and regulatory permits, California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) documents, and integrated flood control planning with local jurisdictions).

The District will continue to pursue outside funding opportunities for the 10 Year Work Plan projects as funding opportunities arise. This includes participation in the Marin

County Multi-Jurisdictional Local Hazard Mitigation Plan in order to be eligible for FEMA Hazard Mitigation Assistance.

Other on-going activities include participation in local fish passage and habitat enhancement projects, required annual maintenance and inspections and repairs to the concrete channel section and downstream sections of the U.S. Army Corps of Engineers project.

EXHIBIT B: COST ESTIMATE

The following table identifies the *approximate* cost to provide the program related work as outlined in Exhibit A for Fiscal Year 2021/22.

Program Description	Program Cost
Flood Protection Programs *	$9,245,994
LESS: Other funding sources	($6,606,100)
Total Cost Assigned to FY 2021-22 Fee	**$2,639,894**

** Estimated costs for Fiscal Year 2021/22, if all projects and programs identified in Exhibit A are constructed. The estimated program cost includes proposed project expenditures that are not captured in the $1,988,337 Zone 9 baseline budget approved by the District BOS on June 28, 2021, such as estimated $1,557,657 in prior year carry-forward contract encumbrances which, when included, increase current the Zone 9 budget to approximately $3,545,994. The intent of the baseline budget is to fund ordinary maintenance, programmatic costs, and project planning costs only initially, with the expectation that major project costs such as design and construction contracts be approved by the District BOS along with budget adjustments. The Zone 9 budget will be adjusted as needed and authorized by the District BOS to award major project contracts.*

EXHIBIT C: FEE METHODOLOGY

General

The Health and Safety Code allows the District BOS to charge a fee for acquiring, constructing, reconstructing, maintaining, and operating storm drainage facilities. As discussed in Exhibit A, the District has outlined the intended storm drainage improvement programs to alleviate the localized flooding. In order to fund these improvements, the District intends to levy a fee to parcels that drain into the watershed.

Fee Methodology

The fee for each property is related to how much stormwater runoff it generates. Land that is developed, for example, with a house, commercial building or parking lot, creates more stormwater runoff than a vacant piece of land. The more hard surface coverage a parcel has the more "impervious" area and stormwater runoff it generates. Typically, the smaller sized developed parcels have a higher impervious factor than the larger size developed parcels with the same amount of hard surface coverage. The reason being is that the smaller size parcel has less undeveloped ground to absorb the stormwater. Generally, an impervious surface is a hardened surface (concrete, rooftop, asphalt, compacted gravel, etc.) that does not absorb stormwater. Such features do not allow stormwater to soak into the ground thereby generating runoff. This runoff may increase the potential for flooding, pollutants flowing into the water basin and lower stream base flows, and decreased infiltration of storm water into the soil.

Even though every parcel drains into and uses the storm drainage system, not all parcels use the system to the same degree. In order to determine the benefit relationship between the parcels we assign a "Basic Drainage Unit" (BDU) factor to every parcel. In this way we relate the single-family parcel, the most common land use, to all other land use types; multi-family, condominium/townhome, commercial/industrial. The median single-family parcel in the Watershed is approximately 0.19 acres with an average impervious factor of 31%. As an example, a parcel consisting of a completely impervious parking lot without any landscaping would be considered 100% impervious. Within each land use type we have further defined parcel sizes into 5 size categories. Each land use type is separated into the following parcel size categories, in acres;

0 - 0.15,
0.151 - 0.25,
0.251 - 0.50,
0.501 – 1.0,
1.0 and greater.

Each land use type also has distinct impervious surfaces by size category. The following table illustrates the BDUs for each land use type by size category and basic drainage unit factors.

Basic Drainage Unit (BDU) Factors

Acres	Single Family, BDU	Condos/ Townhomes, BDU	Multi Family, BDU	Commercial/ Industrial, BDU
0.0 - 0.150	0.862	0.240	0.687	1.251
0.151 - 0.250	1.000	0.879	1.120	2.300
0.251 - 0.500	1.183	0.000	1.577	5.168
0.501 - 1.00	1.684	0.000	2.418	9.130
> 1.01	2.791	0.000	Individual*	Individual*

*Individual BDU calculation is described in 'Fee Calculation' section below.

Fee Calculation

As discussed, each parcel is assigned a BDU factor. One BDU will receive a stormwater fee amount of $153.76 (increased 3% from last year's fee amount of $149.28. That is to say that a single-family parcel in the 0.151 - 0.25 size category will be charged a fee of $153.76. Whereas, a condo/townhome parcel in the 0 - 0.15 size category will be charged a fee of $36.92 because its BDU factor is 0.240 ($153.76 x 0.240 = $36.92). All land use types and size categories are calculated in like manner with each receiving a unique fee amount. Single Family Residence fees are capped at $221.40. Because of the unique characteristics and development of the parcels greater than one acre for multi-family and commercial/industrial, each of those parcel's fee amounts will be calculated individually. The individual calculation for multi-family commercial/industrial parcels greater than one acre incorporates the acreage, impervious percentage of the individual property, and single BDU cost of $153.76 to determine the individual fee amount.

The following tables illustrate the fee amount for each land use type and size category.

Single Family:

Acres	Drainage Fee per BDU	# of Parcels in Range
0.0 - 0.150	$132.48	3,414
0.151 - 0.250	$153.76	4,334
0.251 - 0.500	$181.86	2,723
0.501 - 1.00	$221.40	1,245
> 1.01	$221.40	740

Condos/Townhomes:

Acres	Drainage Fee per BDU	# of Parcels in Range
0.0 - 0.150	$36.92	1,582
0.151 - 0.250	$135.08	6
0.251 - 0.500	$0.00	0
0.501 - 1.00	$0.00	0
> 1.01	$0.00	0

Multi Family:

Acres	Drainage Fee per BDU	# of Parcels in Range
0.0 - 0.150	$105.64	237
0.151 - 0.250	$172.20	234
0.251 - 0.500	$242.38	122
0.501 - 1.00	$371.80	42
> 1.01	Individual	24

Commercial/Industrial:

Acres	Drainage Fee per BDU	# of Parcels in Range
0.0 - 0.150	$192.32	168
0.151 - 0.250	$353.56	77
0.251 - 0.500	$794.50	87
0.501 - 1.00	$1,403.62	51
> 1.01	Individual	44

EXHIBIT D: OWNER LISTING and FEE AMOUNT

The total estimated fee revenue for Fiscal Year 2021/22 is $2,639,894.

The complete owner's listing and fee amounts is included in Attachment A.
