6 & up	\$	1,157.63

#### **SECONDARY METER RATE**

For water service where no return to sewer is involved such as outdoor irrigation systems or various industrial processes, a secondary meter may be installed at the property owner's expense to measure the consumption for such secondary use in order to avoid a sewer charge on that portion of the water consumption. When such secondary meter is installed, it will not be subject to a minimum bill but only charged the variable rate for all usage metered based on the same rates charged at the main meter.

The rates set forth by Ordinance No. 17-012 and Ordinance No. 18-021 shall be assessed for all services billed on or after October 1, 2019.
