Verbal De-Escalation Train the Trainer Program *Surviving Verbal Conflict*®

Today's increased service demands and scrutiny placed upon public safety professionals have resulted in a growing need to master verbal conflict management skills. When negative verbal encounters escalate to the point where physical intervention is used, criticism often results when it is later discovered that there is little evidence of verbal de-escalation techniques employed by officers. Administrators are now asking, *"Is this an area in which the training tape has run out? Have we adequately trained our personnel to successfully manage and respond to verbal confrontations in a professional manner?"*

Surviving Verbal Conflict® training provides public safety professionals with **time-tested communications skills proven to help de-escalate volatile situations**, safeguard fellow officers' emotional and professional well-being, and significantly enhance the agency's professional image. And, in the event that de-escalation proves impossible, the utilization of these techniques make use of force decisions more readily defensible in the courtroom and in the public eye. The train the trainer course provides public safety professional trainers with the skills and ability to provide the training to others within their agencies.
